NiDV DEFENCE & SECURITY

THE NETHERLANDS INDUSTRIES FOR DEFENCE & SECURITY

Colophon

This is a publication of the Dutch Industry for Defense and Security.

Bezuidenhoutseweg 161
2594 AG The Hague
The Netherlands

This brochure appears every two years with an update of the NIDV participants. Although this guide is created with the greatest possible care, no rights or claims can be made from this guide to the correctness and completeness of the content.

Are you also interested in participating in the NIDV or would you like more information about our foundation? You can find us at www.nidv.eu. You can contact us via +31 (0)70 364 48 05 or office@nidv.eu.

Foreword by Director NIDV Hans Huigen

In its 40 years of existence the NIDV has grown to around 220 member organisations. With these companies and knowledge institutions, we represent an excellent cross-section of what the Dutch defence and security industry has to offer. From companies that supply directly to the armed forces, such as ICT service providers, packaging specialists and logistics service providers, to companies that play an important role in national and international supply chains, high-tech developers and Dutch OEMs. And for all sectors: land, air, space, maritime, IT and Cyber. Even though the political focus on defence and security has been far from constant, the NIDV has never lost its relevance in these 40 years. Bringing the defence and security industry together with parties at home and abroad is what NIDV does; and what we are good at!

Bringing parties together will be more important than ever in the coming years. With the renewed focus on defence and security and the ambitions set out in the recently presented Dutch defence white paper, we as the NIDV, but also society as a whole, have a big task ahead of us. I am convinced that the NL-DTIB can and will make an important contribution. There is ample knowledge and quality available. And perhaps more importantly, there is a lot of pride and even more enthusiasm to contribute to the security of the Netherlands and Europe.

Various countries are making the necessary budgets available to invest in our overall security. It is important to ensure the right preconditions to create long term commitments. That is essential for scaling-up and for true long-term international collaboration. It will require more intensive cooperation between all parties involved, because scaling up, accelerating and innovating will only be possible if we understand each other better and build on trust between governments and the defence and security industry. The NIDV team remains committed to this. As an information provider, advocacy - and network organisation. This is how we contribute to the security and resilience of our democratic society.

In this industry guide you will find brief introductions of our member companies. We are certain it will inspire you to reach out, connect and cooperate!

Hans Huigen,

Director NIDV

About NIDV

The NIDV Foundation facilitates the sustainable positioning of the *Defensie- en Veiligheidsindustrie (DVI)* in national and international orders (from the government and elsewhere) and in national and international supply chains. It is a strategic partner of the government in the area of defense and security and a key figure in the triple helix collaboration between the government, knowledge institutions, and the business community.

Information provider

Current information on the new plans, projects, desires, and needs of government organizations and national and international companies is essential for NIDV participants. The NIDV has a digital information database. Participants receive a password that allows them to log into this directory of information.

Promoter of interests

The NIDV has excellent working relationships with government institutes in both the Netherlands and abroad. It also promotes the interests of international companies with a contractual obligation to engage Dutch businesses. The NIDV maintains close contact with Dutch politicians on behalf of its participants. When it comes to new and existing government policy that affects participants, the NIDV serves as a conversation and sparring partner.

Service provider

The NIDV works both nationally and internationally on increasing the visibility of participants through joint market research and a joint market approach. As part of this, it supports and facilitates its participants in participating in trade missions and international trade fairs. A special think tank for the SME sector aims to increase the position of these small to medium-sized enterprises in the defense and security market. The NIDV serves as a source of information for its participants who have questions about export, subsidies, innovation, and so on.

The NIDV platforms

The NIDV has ten platforms, five business platforms, four policy platforms, and one aimed at young professionals. Business platforms act as meeting places for companies with a common interest. There are specific platforms, for example, for companies that play a role in the construction and maintenance of ships, submarines, aircraft, land-based equipment, and command and control systems. The NIDV platforms create opportunities for participants by facilitating contact with representatives of such organizations as the Ministry of Defence and the Ministry of Justice and Security, as well as knowledge building, information sharing, collaboration with knowledge institutes and universities, a joining of forces and collectively approaching a specific market segment. The companies that participate in a NIDV-business platform are more successful in the market thanks to the power of collaboration. This includes a strengthening of the collective supply chain, jointly achieving a higher technological level, that opens up international doors for the entire Dutch industry. The three policy platforms deal with Europe (Netherlands Knowledge institutions and industry advisory group), trade compliance and logistical support.

About the Material and IT Command (COMMIT)

As part of the Netherlands Ministry of Defence, the Material and IT Command (COMMIT) ensures that military personnel has modern, robust and safe materiel to work with. COMMIT is involved in the procurement, maintenance and sale of materiel. Procurement and sale

COMMIT maintains Defence materiel throughout its entire life-cycle, from purchase via sustainment to disposal, whether ships, aircraft, helicopters, vehicles, fuel, ammunition, clothing, computer systems or weapons are involved.

Technological innovation

The Material and IT Command devotes a great deal of attention to technological innovation. In cooperation with research institutes and industry, COMMIT is continuously looking for improvements in technology and materials.

Services responsible for logistics

After procurement, COMMIT hands over the purchased materiel to the relevant armed forces Service, which is then responsible for its sustainment. The logistics divisions of the Service then ensure maintenance and further distribution of the materiel.

About the Commissariat for Military Production (CMP)

The Commissariat for Military Production (CMP) helps the companies concerned by putting them in touch with potential buyers. The CMP is part of the ministry of Economic Affairs. The government also promotes the participation of Dutch companies in international cooperation programs to develop or purchase military materiel.

Activities

- To develop and execute industrial participation policy in case a foreign supplier obtains an order of the Netherlands' MOD for the delivery of defence material in the amount of or exceeding €5 million; foreign supplier can be obliged to offer industrial participation.
- To promote and support export initiatives of the Netherlands defence related industries and the Netherlands contributions at international defence shows and exhibitions (CMP coordinates between foreign governments, the Netherlands ministries a.o. MoD and the Netherlands defence related industries).

Defence Support Command (DOSCO)

As part of the Netherlands Ministry the Defence Support Command performs support tasks for the armed forces.

Activities

DOSCO provides catering services, healthcare, buildings, training areas, education and personnel services. In this way the navy, army, air force and military police can focus on their main tasks, operations at sea, land and in the air for freedom, security and prosperity.

The Defense Support Command also supports the armed forces with education, knowledge centers and research.

And the armed forces can respond in time to global changes in military operations.

Police Services Department (PDC)

The police are always there, for a safer Netherlands. The police protect democracy, enforce the law and are the authority on the streets. Where necessary, the police lend a helping hand. In emergency situations, they take enforcement action. Where others take a step back, police officers take a step forward, if necessary with use of force, and if necessary at risk of their own lives. The police work with citizens and partners actively. They have eyes and ears for what is happening in society. The police are there for everyone.

Serving with vigilance.

3M Nederland BV

3M is a global science-based company. Our technologies can be found almost everywhere: in your home, in your office, in production and processing, in defense and security, in healthcare, in your computer, or in your car. 3M Science is improving our lives in hundreds of ways every day.

We bring to the market over 55 000 different products: In product development, 3M has 51 basic technologies at its disposal, which are constantly being combined in new ways. These include, along with adhesive, foil and grinding technology, microreplication, filtration and nano-technology.

In the defense sector, 3M provides solutions for personal safety protection, which includes protective eyewear, hearing and full communication solutions (3M Peltor). 3M also offers material for maintenance and repair environment like abrasive systems (3M Cubitron), bonding solutions and adhesive tapes (3M VHB) and for office staff, display security/privacy films.

From a mining company to a multi-technology group, 3M stands for Minnesota Mining & Manufacturing. The company was founded in the USA in 1902, is headquartered in St. Paul, Minnesota, and operates in 70 countries with sales in 190 countries.

3M is also present in The Netherlands with two manufacturing sites in Amersfoort and Kerkrade. Its headquarter, including the 3M Customer Innovation center, is located at the TU Delft Science Park Technopolis. A science park focused on high-tech companies and start-ups, in a knowledge-intensive environment where sustainability is also of paramount importance.

We would like to welcome you to get inspired in our Customer Innovation Center. Share your challenges with us! With the great diversity of our technology platforms, there is a good chance that we have a solution for you.

aalbers|wico

aalbers|wico: metalwork company and security specialist

The history of aalbers|wico can be traced back to 1966, when the company Aalbers was founded as an engineering workshop in Renswoude. In 2001 the company name was changed to aalbers|wico, following Aalbers' takeover of the structural security firm Wico.

2 divisions, 100 employees and 160,000 ft² of floor space

We now have more than 160,000 ft² of floor space at our production locations in Renswoude and over 100 expert employees work within our two independent divisions: defence & security and metal & technology.

metal & technology: technical solutions in steel, stainless steel and aluminium

aalbers|wico's metal & technology division has made a name for itself as a reputable all-round supplier of technical solutions in steel, stainless steel and aluminium. These solutions range from semi-finished products and metal constructions through to complete machines. To ensure we can continue to provide our clients with the best possible service in this area, we are constantly striving to improve our processes, methods and techniques.

defence & security: specialist in structural security

Our defence & security division is a leading specialist in the field of structural security. This division focuses on four disciplines: intruder resistance, ballistic resistance, blast resistance and fire resistance. We are keen to be counted as one of the international leaders in these areas. A great deal of attention is therefore devoted to R&D and product innovation. It is also important to us that we are regarded as a reliable and honest partner.

AAR Aircraft Component Services

AAR is a global aftermarket solutions company that employs more than 5,000 people in over 20 countries. Based in Wood Dale, Illinois, AAR supports commercial aviation and government customers through two operating segments: Aviation Services and Expeditionary Services. AAR's Aviation Services include inventory management; parts supply; OEM parts distribution; aircraft maintenance, repair and overhaul; and component repair. AAR's Expeditionary Services include airlift operations; mobility systems; and command and control centers in support of military and humanitarian missions. More information can be found at www.aarcorp.com.

AAR Component Repair – Amsterdam specializes in maintenance, repair and overhaul of aircraft components for both civil and military markets. AAR Component Repair has built up extensive experience in servicing components for F-16 fighter aircraft for Air Forces in Europe, The United States and other FMS customers. Additional experience is gained on other military aircraft e.g. Chinook, C130 and Apache.

In general AAR Component Repair – Amsterdam inspects, repairs overhauls and test pneumatic, hydraulic, electrical, fuel, mechanical components and instruments. F-16 end items serviced by AAR Component Repair include the Jet Fuel Starter, The Acc. Drive Gearbox, The Emergency Power Unit and the Convergent Exhaust Nozzle Control.

AAR Component Repair designs and manufactures test stands and provides on-site training on delivery. Both Universal test stands as well as tailor-made have been supplied to customers worldwide.

Accenture B.V.

Accenture is a leading global professional services company, providing a broad range of services in strategy and consulting, interactive, technology and operations, with digital capabilities across all of these services. We combine unmatched experience and specialized capabilities across more than 40 industries – powered by the world's largest network of Advanced Technology and Intelligent Operations centers. With 700.00 people serving clients in more than 120 countries, Accenture brings continuous innovation to help clients improve their performance and create lasting value across their enterprises. We are proud and happy to service many important organizations in Defense, Public Safety, National Security and Justice both in The Netherlands as well as abroad.

The broad spectrum of services that Accenture offers its clients, is something that makes us unique in the market. Besides being a trusted partner for delivering strategic advice, innovative IT solutions and outsourcing, Accenture has become one of the largest digital marketing and experience agencies in the world, has dedicated practices for Industry X.O., Product & Service Design, Embedded Software, Applied Intelligence and many more that enable us to stand out from the rest. Our drive to offer our clients maximum value through integrated and end-to-end services, has also led to a continuous stream of acquisitions of prominent and innovative companies.

For any type of organization, Accenture offers a reliable, innovative solution with smart, result driven professionals to help work towards a safer and more resilient future.

Acecore Technologies JL B.V.

Based in the Netherlands, Acecore Technologies is a UAS developer and integrator for high demanding professional and military applications. Acecore focuses on high-performance, durable aerial systems designed to excel in challenging environments and enhance mission effectiveness.

Acecore was founded in 2013 to raise the bar in terms of performance in the UAV world, born from real-world experience in cinematography in the most extreme environments. Today, Acecore manufactures customized UAS solutions tailored to specific operational requirements. Their heritage as end-users pushes Acecore's focus on stability and precision, resulting in performance- and reliability-based products with zero margin for error.

Acecore UAS are widely deployable and all-weather capable, making them ideally suited for demanding applications like ISR, mine detection, situational awareness, and transport. Offering comprehensive support services, including on- and off-site training, local service and maintenance, and a modular design that enables component upgrades and replacements, ensuring long-term system viability and adaptability to evolving mission needs.

ACE development & engineering

ACE development & engineering's vision

Technological developments are moving at an exponential rate. Companies that depend on the use of technology are increasingly becoming companies with an increasing integration of this in their business processes. New and modest access to specialized subjects and the competence to use them in innovative applications will be critical to their success.

ACE development & engineering's mission

ACE development & engineering will play an essential role as an inventive partner in the development of new machines, constructions, systems and products. Based on a multidisciplinary approach, ACE development & engineering organizes the necessary and in-depth knowledge for this. By organizing and combining specializations and collaboration with carefully selected partners, ACE development & engineering will be the binding factor.

Our engineers do this from an inventive basic attitude and with shared values. They use the broad experience of our market-oriented Business Units and their in-depth technical knowledge to arrive at inventive and integrated solutions.

ACL Technopanel B.V.

ACL has been in the market since 1984 and has developed into a leading supplier of customised control panels and complete systems.

We manage the entire process from design, engineering, prototyping and mass production to lifecycle management (service, repair, refurbishment, etc.).

It is our passion and motivation to work together with our customers to develop an optimal operating solution that is tailored to the end-user. This is often through the use of touchscreen technology, but other technologies are also possible.

Thanks to our knowledge of integration and sophisticated in-house production, ACL stands for customised work of the highest quality and maximum flexibility. For us, the solution is only optimal when it offers the right functionality under all circumstances – using the most appropriate technology – and fits in seamlessly with the customer's identity.

ACL strives for long-term partnerships with both customers and suppliers. We continuously develop new knowledge and improve our processes. As a result, we have been able to supply our customers with state-of-the-art products for almost 40 years.

Addit BV

Addit is a strategic partner for Precision Sheet Metal & Contract Manufacturing.

Specialized in the development and manufacture of complex precision sheet metal parts, mechatronic modules, machines and devices. Together with our multidisciplinary engineering department and modern machinery, we can develop, construct, produce and assemble your ideas with the highest quality and sustainably.

Our specialty is: High Mix - Low Volume - High Complexity. We provide various solutions for the defense and aerospace industry. At Addit, we understand the requirements of these demanding markets down to the smallest details. Our rigorous emphasis on quality control, detailed inspections and testing guarantees that our outputs meet the stringent demands of the defense sector.

Together with our customers, we take care of:

- Advice, engineering & prototyping
- Production, manufacturing & assembly
- Quality, inspection & testing

Examples:

- Sheet metal modules and mechanical modules for armored vehicles
- Complete lighting systems for armored vehicles
- Complete emergency power supplies for army tanks
- Complete power system modules
- Control and management systems for naval ships

Adimec Advanced Image Systems BV

Adimec specializes in the development and manufacturing of high-performance cameras that meet the application-specific requirements of key market segments, including machine vision, medical imaging, and outdoor imaging. Founded in 1992, the company partners with major OEMs around the world to facilitate the creation of industry-leading cameras. The unique Adimec True Accurate Imaging® technology provides new levels of precision and accuracy to vision systems. Its diverse line of camera products meet a wide range of performance, size, cost, interface and application requirements. Adimec has offices around the world focused on creating customer value and satisfaction through local, personalized support.

ADSE Consulting & Engineering

We are ADSE! An independent Dutch engineering and consulting firm, passionate about transport systems. Planes, trains, ships and automobiles, that's what we like!

We are with 70+ highly skilled engineers and consultants and have our main office in Hoofddorp, The Netherlands. Since we were founded in 1996, we have shared our extensive knowledge of the aerospace industry with customers in many other domains. Next to aerospace, we serve the rail, defence and maritime industry. For more than 25 years, our mission is to enable safe, sustainable and efficient transport together with our customers. We serve customers worldwide, and our services include engineering, consulting, certification and technical project management.

We structure complex projects, where integration, validation and verification of different systems is required. Our approach prevents delays, rework and cost overruns.

In addition, our EASA 21J Design Organization Approval (DOA) gives us the authority to design and certify repairs and modifications to aircraft. We have an accreditation from the Military Aviation Authority in The Netherlands as a Military Design Organisation (MAA-NLD A-21-018).

Our defence experts have decades of combined experience in the segments Sea, Land, Air and Authorities. Not only in The Netherlands, but also with our European partners.

And last but not least. We bring renewable energy to military operations and help to reduce operational emissions.

Our armed forces protect what we value. We enable them with the transportation systems they need. That's our mission!

AEC Skyline

Founded as a company in 1991, AEC Skyline offers state-of-the-art tactical data and training services that are aimed at the air, land and naval domains. Under contract with the Netherlands MoD, the Belgian military and the United States Air Forces in Europe, we have a proven track record of over 30 years of successfully providing fast air support to a wide range of customers. In addition, AEC Skyline is serving various armed and security forces by delivering customised ISR support while at the same time providing them with a growing number of advanced, best in class critical data solutions to choose from. This results in our company nowadays supporting a wide-ranging series of ambitious digitisation efforts by the Netherlands and other countries' militaries and public safety agencies, all aimed at enabling the successful conduct of true intel driven operations. While our company's focus is on the evolving needs of today's and tomorrow's warfighter, AEC Skyline's customers also include some of the Netherlands' renowned domestic research institutes as well as various actors in the defence & aerospace industry.

Contract Air Operating out of Groningen Airport Eelde, Breda Airport and our forward operating location in Zweibrücken, Germany, AEC Skyline's full scope of aerial services encompasses:

- Close Air Support
- Adversary Training
- Remote Sensing
- Electronic Warfare
- Target Towing
- Calibration & Testing.

We Got Your Data Covered Part of AEC Skyline's critical data solutions division, our comprehensive C4ISR & Cyber products and services portfolio includes:

- Systems Integration
- Consultancy
- Communications & Networks
- Data & Analytics
- Secure Roaming Services, the latter as part of our Whisper brand.

S

AEC Skyline can also rely on a widespread, global network of business partners in the defence & aerospace industry, many partners of which we represent in the Netherlands. In short, AEC Skyline provides "bang for the buck" by delivering professional, realistic and cost-effective support to armed forces at any stage during operations, exercises and training.

AERONAMIC

F35

Aeronamic B.V.

Aeronamic has an impressive track record in the aerospace industry. With a team of over 250 enthusiastic professionals spread across four strategic locations in the Netherlands and Romania, we are leaders in the design, manufacture, testing, repair and maintenance of advanced turbomachinery, engine-driven systems and critical components for the commercial, advanced air mobility and defense aerospace industry. All of this is done in-house, with vertical integration being a key element. We continually strive to improve our lead times using the latest manufacturing technologies and lean/six sigma methodologies.

With a strong focus on innovation and sustainability, as evidenced by our Mission Zero program, we strive to set new standards in Air and Thermal Management. Based on our proprietary ultra-lightweight e-compressor technology, we develop products for sustainable aviation that contribute to the realization of more electric and carbon-neutral aircraft systems. Our R&D department is located at the Technology Base in Enschede.

At Aeronamic Services in Woensdrecht, we are fully operational and proud to maintain the PTMS system of at least all European F-35s for the next 40 years, with ambitions to expand.

We have proven ourselves in an industry with long-term programs, exclusive partnerships and stringent safety and quality requirements from leading customers such as Honeywell, RTX Collins, Lockheed Martin and Pratt & Whitney. Operating in a complex landscape of technology and document management, from large systems to micro-level precision machining, we meet the challenges of the modern aerospace industry.

For more than 35 years, we have been committed to safe and sustainable aviation, driven by innovation and growth in this dynamic industry

Aerospace Propulsion Products B.V.

Aerospace Propulsion Products B.V. (APP) develops and produces gas generators for many applications.

Our gas generators produce hot or cool gases and can be used for rocket motor ignition, starting a rocket engine turbo pump, expelling a powder for dust explosion suppression or fire extinguishing, providing pure nitrogen for inflation or fire extinguishing etc. etc.

Our company was founded in 1989 by TNO, the Dutch Organisation for Applied Research. APP's first activities were dedicated to producing rocket propellant for the igniters and starter of the Ariane 5 Vulcain rocket engine. In 1995 Stork joined TNO as a shareholder of APP and our activities expanded to the complete production of the Vulcain igniters and starters. Since then our activities have increased with the development and production of many new gas generators for space and industrial applications. APP is a 100% subsidiary of ArianeGroup SAS, which is a joint venture of Airbus and Safran.

Today APP employs about 40 people, but the company is steadily growing. We have all capabilities and facilities in-house available for technology development, engineering and production. Our activities can be performed compliant with the highest quality standards as required for example for our space products.

AET Europe B.V.

AET Europe B.V. (AET) is a software development company that develops middleware and card management systems for smart cards and USB tokens. AET is the biggest independent cryptographic middleware specialist worldwide.

AET's products are typically used for:

- Enterprise security
- Government and Digital ID
- Banking / EMV
- Mobile applications

SafeSign IC is the linking pin between applications and devices. It is middleware for cryptographic tokens, delivering strong authentication, digital signing and secure transactions & information through encryption.

BlueX Digital ID Management is a well-known and extremely adaptable system supporting the simplification and automation of all digital ID management processes. ConsentID combines our products and other state-of-the-art technology into a mobile authentication and signature service.

AET is headquartered in Arnhem, The Netherlands and has currently over 40 employees.

Airborne B.V.

We help you to disrupt in composites

At Airborne, we are always looking to push the boundaries in composites, to change the status-quo and to develop technologies and products that create new opportunities that help you to be better than the competition. And ultimately, we want to enable composites to make the world more sustainable.

Airborne offers digital automation systems, that are extremely flexible and do not require any programming. We can support you both with automation and manufacturing of composites parts.

Investing in automation can be a big step or maybe the timing is not right yet. We can bridge this gap by providing the service of manufacturing and running the automated systems for you. When you are ready, we transfer the systems to your factory and you take manufacturing in your own hands.

Airborne has a strong legacy in the design and manufacturing of composite parts for the aerospace industry. We are a leading supplier on ultra lightweight structures for the space industry, a AS9100 certified production company and have all the required processes in house to manufacture your parts.

Airborne has been supplying robust, highly loaded by lightweight structures for the Maritime and offshore industry for many years. Being able to manufacture thick-walled composite structures is a special capability of Airborne and we understand what it takes to design and manufacture parts for the harsh maritime environment, whether above or below surface.

Through applying digital and automated manufacturing processes we are making composite structures more affordable for our customers.

We live and breathe composites. Already for more than 25 years.

Airbus Defence & Space Netherlands B.V.

Airbus Defence and Space Netherlands B.V. supplies high-tech products and services for the aerospace industry. Its portfolio includes solar arrays, launcher structures, instruments & services, optical communication and fighter training products. Airbus DS NL powers scientific, earth observation, military, as well as telecommunications satellites, delivers vital lightweight structures for the Ariane and Vega launchers, has substantial know-how in test & verification and simulation, and develops reputable earth observation instruments such as Tropomi.

Airbus DS NL operates in defence, security and civil markets with aerospace product spin-offs, of which simulators form an important part. Activities include real-time simulation SW, distributed simulation for engineering and training. With NLR, Airbus DS NL has developed an embedded training system for fighter aircraft (E-CATS), which is fielded in production F-35 Block 3F's since 2018. This innovative application enables F-35 fighter pilots to train securely against realistic constructive threats anywhere, anytime. Scenario Editor and Verification SW provide tools for designing and testing E-CATS training scenarios. As part of an internal R&T program, E-CATS is currently being developed into a Live-Virtual-Constructive (LVC) application for other platforms. The expanding customer base fuels further broadening of the E-CATS applications.

Following the national demand for data services, Airbus DS NL collaborates with Airbus Connected Intelligence in ISR-related earth observation data and data (fusion) tools. Data products and services both in the field of defence and security, as well as climate and air quality, are being developed and delivered to various customers.

Airbus DS NL is part of Airbus, global leader in aeronautics, space, defence and C5ISR related products and services.

Alewijnse Netherlands B.V.

Alewijnse has 130 years of experience in marine and industrial technology and undertakes projects around the world. As an all-round systems integrator, the company supplies a comprehensive range of technical solutions.

Our company works on a great number of vessels and industrial installations every year in sectors that include yachting, naval & governmental, dredging & offshore and industry. This work includes contracts for new build, refit, repair and maintenance projects. In response to the ever-increasing need for sustainable operations, Alewijnse is at the forefront of designing environmentally friendly propulsion and energy-efficiency systems for maritime and industry.

Naval & governmental

Over the years, Alewijnse has been a partner in various programs in the naval & governmental segment. For both shipyards and end users Alewijnse is your partner of choice because of our high quality of service, efficiency, availability and flexible deployment of personnel and the perfect co-operation with our customers and partners. Besides the Dutch government and shipyards we work with many international customers in the following areas of expertise.

- Navigation and communication
- Vessel automation
- Design and installation of electrical systems
- (Hybrid) Propulsion systems
- Testing of existing systems
- Life cycle advice
- Maintenance
- 24 /7 On call service

Through our many years of experience in the defence & security segment, we have built up broad expertise in the new construction, renovation, upgrades, life time extensions, after sales and service & maintenance of highly complex naval vessels, such as most recently multi-role aviation training vessels, PKR frigates, long range ocean patrol (POLA) vessels, ocean going patrol vessels (OPVs), supply & research vessels, hybrid tugs, naval support vessels, such as joint support ships (JSS) and combat support vessels (CSS).

Allplast BV

Although being a relatively small plastics and composites processing company, Allplast holds a diverse clientele, including big names like Tyco and Thales. Over the years Allplast has gained expertise in the assembly and production of high-tech plastic and composite products. One of Allplast's specific interests is the development of bullet resistant protection products and materials, including composites and transparent laminates.

Mission

Allplast is convinced of the ongoing technological developments and design freedom of plastic and composite materials and the added value these materials possess regarding a wide spectrum of applications. Allplast's activities are focused on the development of high-quality parts and assemblies.

Why Allplast BV?

Allplast offers a unique combination of production techniques in plastics and composites, combined with in-house design- and engineering capabilities. This leads to product- and process innovations and the ability to assist clients regarding design, materials and production processes.

Ballistic protection

- Design and development of ballistic protection products: visors, shields
- Ballistic composites processing
- Ballistic laminates: bullet resistant glazing, burglary resistant glazing

Composites and laminates

- Autoclave, pre-preg processing, vacuum injection
- Transparent laminating

High-quality glueing and assembly

- Special technologies for glueing and assembly
- All series sizes

Plastics processing and -converting

- Wide range of conventional production facilities for plastics
- CAD/CAM, CNC routing, hotline bending, cold bending, drape forming, laser cutting

AMST Aviation

AMST Group is a worldwide leader in solutions for flight simulation, aircrew training and aeromedical applications. Since 1982, AMST prepares aircrew for extreme situations to make flying safer. Comprising of the business units Aerospace Medicine, Civil Aviation and Visual Systems, the group of private companies strives to provide its customers with industry-leading solutions that lift training capabilities to the next level.

AMST developed a wide range of specialist solutions that can simulate the experience of high G forces, spatial disorientation and high altitudes. The portfolio also includes flight training devices, sports training equipment and systems for pilot selection. AMST also offers human factor trainings such as spatial disorientation and night vision training.

Through its business unit Civil Aviation, AMST makes its advanced technologies available to the civil aviation sector. This allows AMST to deliver equipment such as Full Flight Simulators that exceed the standard of current industry devices.

The business unit Visual System focusses on the development of visual system solutions for the simulation industry. With its ground-breaking VISIM Image Generator, the business unit started its activities in the field of OTW visualization and continues to invest in the development of a cutting-edge product portfolio to become a turn-key solution provider for visual systems.

Apex Global B.V.

Apex Global B.V. has been a leading provider of tactical, specialist products and services for Police, Military, and other government branches since 1999, both in the Netherlands and abroad.

Due to our absolute focus on quality, we unburden many customers through our products and services in the following segments:

- Breaching (Method of Entry)
- Specialist Maritime Propulsion and Equipment
- Armoured Vehicles and Elevated Tactics
- Counter IED and Road Clearance
- Robotics
- Personal Protection

Innovation, Integrity, Commitment, and personal support are characteristics of Apex Global B.V., that allowed us to welcome many government organizations among our customers over the past 20 years.

Arena Red BV

EVER WONDERED HOW WE CAN SPEED UP THE GLOBAL ENERGY TRANSITION IN AN ECONOMICAL AND ENVIRONMENTAL SUSTAINABLE WAY? WE BELIEVE WE DO HAVE THE SOLUTION AND IT'S NOT ELECTRIC... IMAGINE A REVOLUTIONARY NEW ENGINE MANAGEMENT SYSTEM, PROVEN FOR ANY COMBUSTION ENGINE, ALLOWING ANY FUEL, SAVING 100% FOSSIL CO₂ AND EVEN RAISE FUEL EFFICIENCY... Combustion pressure based controlled ENGINE MANAGEMENT

Diesel to CO₂-neutral

ArenaRED offers a dual fuel conversion kit to enable any diesel engine to run on sustainable CO₂-neutral fuels like methanol or ethanol. These fuels behave like gasoline and can be put in the existing diesel tank.

Current status

The application has been successfully realized on the river ship MTS Argonon equipped with Caterpillar 3500 engines. Running world's first RCCI combustion strategy resulting in ultra clean emissions, increased efficiency and reduced engine noise.

Advantages with ArenaRED

Low TCO thanks to the 10% increase fuel efficiency, no SCR (no urea), and no DPF. Short time to market due to the ArenaRED closed loop Combustion Pressure Based Control (CPBC), every stroke is optimised, no matter the fuel properties or state or type of the engine. Hazard monitoring the CPBC monitors every combustion cycle and the state of the engine. Fuel flexibility the self-adjusting nature of CPBC allows a high variety of fuel types, qualities, and blends.

Package

The ArenaRED package consist of an engine controller and fuel injectors with integrated combustion pressure sensor. We smooth the energy transition.

Askové Kunststof Industrie BV, part of Askové Solutions

Askové Solutions is a leading company in the design and manufacturing of industrial equipment, based on thermoplastic material. Askové has its own engineering department that develops customized solutions in close cooperation with the end-client. These solutions range from small components to turn-key installations for a variety of applications such as chemicals, food, pharmacy, waste treatment, odour control and defense.

For the Netherlands Air Force, Askové has engineered and manufactured customized Ground Support Equipment to solve challenges encountered during daily operations and deployments. The range of products consists of components for the F16, such as connectors for the airco system, fuel collection adaptors, HUD covers, impact proof transport cases for the hydrazine tank and plugs for the engine to prevent fuel loss during air lift. Although developed for the F-16, these products are easily modified for other aircraft such KDC10 and F18. Recently Askové redesigned the connector to a perfect fit for the F35 aircraft. Besides the RNLAf, the USAF, BAF and IAF are using Askové products for their fleets.

Founded in 1965, the company has approximately 30 specialized employees working in the departments marketing & sales, engineering, production, assembly and maintenance.

Eviden is a global leader in digital transformation with approximately 100,000 employees in 72 countries and annual revenue of around € 12 billion. The European number one in Big Data, Cybersecurity, High Performance Computing and Digital Workplace, The Group provides Cloud services, Infrastructure & Data Management, Business & Platform solutions, as well as transactional services through Worldline, the European leader in the payment industry.

With its cutting-edge technologies, digital expertise and industry knowledge, Atos supports the digital transformation of its clients across various business sectors: Defense, Financial Services, Health, Manufacturing, Media, Energy & Utilities, Public sector, Retail, Telecommunications and Transportation.

Eviden in Defence

Eviden helps defense and security agencies meet ICT priorities, sustaining mature IT solutions and managing collaborative resources on a global basis. 30 years' experience with defense/security agencies including those of Australia, Brazil, Canada, France, Germany, NATO, the Netherlands, Spain, and the UK. Key strengths:

- Unique partnership with Siemens
- Trusted cloud enablement for secure and dynamic deployment
- Global scope but sensitive to local culture

Strong in lean management and process outsourcing. Specialties include:

- Mission-critical solutions: network-enabled capabilities, network-centric warfare, battlefield simulation, command and control -systems, and mission planning.
- SAP defense command/control solutions for general and expeditionary logistics
- Cyber-security/space capabilities
- Military education, training and development

Avient

Dyneema®, the world's strongest fiber™, is a premium brand of ultra-high-molecular-weight polyethylene (UHMWPE). We've been driving material science innovations for more than 30 years, enabling unmatched performance and protection in a wide range of end products and industries where failure is simply not an option.

As the world's only backward-integrated producer of high-performance fiber, we use molecular engineering to create uniquely strong fibers – and weave them into unidirectional (UD) sheets that provide unrivaled ballistic protection in personal and vehicle armor applications.

Home to more than 1,100 employees worldwide, Dyneema® supports customers with our advanced technical expertise, global manufacturing footprint, and commitment to innovation, collaboration, and sustainability.

Since 2022, Dyneema® has been part of Avient Corporation (NYSE: AVNT), a leading provider of specialty and sustainable material solutions that turn customers' challenges into opportunities and bring new products to life.

Bio-based Dyneema® fiber – certified by the ISCC and produced according to the mass balance approach – is also available. It offers a more sustainable alternative to conventional Dyneema® with no compromise on performance.

Axians

Axians (Koning & Hartman B.V.) is part of VINCI Energies

In an ever-changing world, VINCI Energies focuses on networking and integration, performance optimization, energy efficiency and data. We do this to accelerate the rollout of new technologies and to support two important changes: the digital transformation and the energy transition. VINCI Energies is a network organization, based on entrepreneurship and sharing expertise through its networks. Operating in 53 countries worldwide, our 1,800 business units are active in infrastructure, industry, services and information and communications technology (ICT). VINCI Energies is the technology division of VINCI, an originally French listed company with employees all over the world.

Axians is a leading company providing system integration, mission critical solutions and services in the field of information and communication technology like Private Mobile Radio Tetra/DMR, Private Mobile Networks 4G/5G, IoT, LAN, WLAN. With our expertise and dedication, we support defense/public safety customers but also technology providers and vendors with our solutions and services. We innovate by investigating and incorporating new developments and we work together with start-ups for novel solutions like frequency scanning and artificial intelligence. Our expertise fields are radio design, engineering / Integration / remote + on-site 24x7 services, which we can deliver worldwide.

We have excellent customer references and are open to share our expertise in different kind of corporations such as a partnership in a consortium, as a Single point of Contact for projects or as services & integration support for technology companies.

Bagira Netherlands B.V.

Bagira Systems is a leader in the field of training and simulation systems with a track record of delivering high-end, customized, cost-effective solutions for Mission Readiness. Bagira's simulators are being used by hundreds of thousands of soldiers at more than 40 sites worldwide. Bagira's training applications and systems share a common infrastructure the B-One simulation engine.

Providing complete and customized solutions, the company's specialists, drawn from fields with significant operational experience, analyze the needs of each client and design and deliver a solution tailored to the specific requirements of each project. Upon project completion, Bagira provides a technical and maintenance network that enables routine operation of the systems without impairing the customer's activities. The technical and logistical aspects are supported by qualified field technicians and include Help Desk support and spare parts storage.

BarentsKrans

BarentsKrans Coöperatief U.A.

BarentsKrans is a specialist, independent firm of lawyers and civil-law notaries based in The Hague.

At BarentsKrans Coöperatief we like to take on complex cases. Both domestically and cross border. Cases that demand quality and character. That's the service we provide. Successfully and with pleasure. You can depend on our team of over 95 attorneys-at-law and civil-law notaries.

At our independent firm, specialists tackle challenging cases in compact teams, transcending individual disciplines and areas of specialisation. We know the field and the issues involved. Our approach is pragmatic and our and we are to the point. Wherever you are based, our people are your dedicated sparring partner. For litigation, legal opinions and with transactions.

BarentsKrans has a number of clients in the Defence and Security sector. Our EU & Competition team advises and litigates about procurement cases and partners of our firm participate in a cross border group of lawyers from more than ten countries globally that organize annual Defence workshops.

BarentsKrans decided to join NIDV because of interests in the sector. Enterprising and continuously evolving, BarentsKrans is at your service, from start to finish.

Bavak Security Group

Bavak Security Group, a Dutch technology company is manufacturer and global supplier of electronic, cyber- and physical security solutions for critical infrastructure. The company was founded almost 50 years ago and is committed to deliver the utmost best in security solutions and services to its customers. The mission of Bavak is: To make the security risks of our customers manageable. Together with our customers we analyse what needs to be protected. We advise, develop, realize and maintain state-of-the-art security solutions. At Bavak the customer comes first.

Defence Security Solutions

The Defence Security Solutions business unit provides tailor made solutions to NATO and UN for base protection. Bavak's Remotely-Operated-Military-Access-Point (ROMAP) solution has been proven very successful in operation in Afghanistan, in Germany and in Mali. The solutions consist of a complete containerised security management system and includes access control, CCTV, X-ray scanning equipment, biometrics, ABIS databases, intercom and a base-wide Public Announcement system. The sole purpose of the system is to save lives and allow seamless operation of the base.

Bavak Security group has a wide range of products and a large team of skilled professionals. They will advise the best solution for every possible threat. This will range from a boom barriers to bi-folding speedgates or roadblockers. From complete security management systems to drone-detection and from an autonomous surveillance drone to various screening solutions which even include large mobile X-Ray systems like truck- or train scanners. At Bavak Security Group, we are committed to serving our customers with the highest quality of products and services available in the security industry, with the combined strength of expertise, experience and quality.

Betalight B.V.

Betalight Tactical is a global leader in providing specialized lighting solutions for military applications, offering a wide range of custom systems designed to meet the specific needs of diverse operational environments. From personal equipment to vehicle, ship, aviation, and shelter lighting, we deliver tailored solutions that enhance mission effectiveness and safety.

Our core expertise focuses on cutting-edge technologies, particularly in LED, blackout, infrared, and tritium-based lighting systems. These solutions are engineered for maximum performance in the most demanding conditions, offering durability, energy efficiency, and reliability for critical military operations. Whether ensuring covert operations with blackout and infrared lighting or enhancing visibility with advanced LED technology, our products are designed to meet every tactical requirement.

We are committed to working closely with our clients to provide fully customized solutions that address their unique challenges. At Betalight Tactical, we understand that no two missions are the same, and we pride ourselves on delivering bespoke products that ensure optimal functionality in any scenario.

In addition to lighting, Betalight Tactical offers advanced identification systems, helping military personnel and assets stay safe and easily recognizable in the field. Our identification solutions are designed to improve communication and safety, even in the harshest environments.

With a strong emphasis on innovation, quality, and reliability, Betalight Tactical is dedicated to supporting military operations worldwide with state-of-the-art lighting and identification systems.

Boeing Defence, Space, and Security

Boeing has been a part of the Netherlands aerospace community for more than 80 years, contributing to and benefiting from the country's tradition of innovation and excellence. Today, Boeing and its Dutch airline customers and supplier partners are interdependent. The company maintains strong connections and solid relationships with stakeholders across the Dutch aviation ecosystem, including the government, customers, suppliers, research and development organizations, nonprofit organizations and regulatory bodies.

As a matter of fact, Boeing has partnered with the Dutch industry for eight decades. In the 1930s, Royal Dutch Airlines — known as KLM, for Koninklijke Luchtvaart Maatschappij — became the first airline outside the United States to fly a Douglas airliner.

Boeing currently has nearly 350 employees in the Netherlands. The Boeing Amsterdam office is a diverse team with more than 20 nationalities and 40 languages spoken. Other offices are placed at a number of locations, including the Spare Parts Center near Amsterdam's Schiphol Airport and a team of engineers at Woensdrecht Air Force Base in the south of the Netherlands.

Boeing has delivered more than 350 commercial aircraft to Dutch customers, and the company highly values its long record of working successfully with Dutch military customers and supporting the country's defense, service and supply chain industries.

Bolidt Kunststoftoepassing b.v.

Bolidt is a family owned company founded in 1964. Bolidt's synthetic products and systems can be found in (industrial) resin-based flooring, ship decks, off-shore applications, sports flooring, road constructions, and in commercial and industrial buildings. These systems meet the specific mechanical, chemical, electrical, and aesthetic demands of the market. The strength of Bolidt is that all products are developed and produced at our in-house laboratory and production facility. As a result, Bolidt is able to guarantee constant improvement and innovation. The future in synthetic products and systems is already available today.

This makes Bolidt a reliable partner in defence organisations worldwide. You can find the Bolideck systems onboard a large variety of navy ships all over the world such as frigates, combat support ships, amphibious transport ships and submarines. Besides decking systems, Bolidt also supplies solutions for very specialized navy (submarine) applications, embedded constructions and grouting - and ballast compounds.

Also, for many years now, Bolidt is a valuable partner in various R&D programs led by TNO and in co-operation with the Dutch navy, suppliers to defence and naval shipyards. Extensive research is carried out in the field of Target Echo Strength reduction and Radar Absorbing Materials.

The main aim is to strengthen the position of Bolidt in the domestic market while structurally increasing market shares abroad through marketing 250 flooring systems in a modern way and through entering into strategic alliances.

BOSCH

Invented for life

Bosch Energy and Building Solutions

The Bosch Group is a leading global supplier of technology and services and has positioned itself as one of the largest IoT companies in the world. Bosch Energy and Building Solutions is part of the Bosch Group and serves the Dutch market with a full suite of solutions and services to increase the safety, comfort and efficiency in living and working environments. We combine our expertise, technologies and partnerships with the understanding of customer needs, to create end to end solutions that anticipate to the future, are sustainable and inspire new opportunities.

For decades, we've specialized in implementing basic to complex control room solutions and are represented in various areas as a brand independent solution integrator, such as high-end safety, security and mission-critical environments. Solutions we offer are, but not limited to, high-end video security solutions, access control, intrusion detection, fire safety, Announcement and evacuation systems preferably integrated in one control room solution. Because of our full range of services we cover all aspects, from advice, design, engineering and implementation to management and maintenance of both hard- and software.

Within the Defense organization we rely on more than 25 years of experience.

Therefore Bosch is ABDO certified and meets all the legal requirements set by the Ministry of Defense. This certification is based on the military standard MIL-STD-495 and fully supports the ISO and AQAP quality standards.

BREMAN
EXTREME PRECISION

Breman Machinery B.V.

Extreme Precision

At Breman Machinery, we specialize in the manufacturing of complex, high-end products with extreme precision. Our team of highly skilled professionals excels in creating large-scale, critical steel components with exceptional accuracy. Serving a wide range of industries, offshore wind energy, oil and gas, aerospace, heavy machinery etc. Whether it's machine construction or specialized project execution, we turn challenging ideas into reality.

State-of-the-Art Manufacturing

We utilize a cutting-edge manufacturing process to deliver high-quality products. Our advanced welding capabilities (manufacturing capabilities), certified to meet the highest standards and our extensive range of precision milling, boring, and turning machines ensure that we can handle the most demanding projects with unmatched accuracy.

Facilities for Exceptional Results

With extensive facilities designed to accommodate large-scale projects, we ensure that every product is crafted with care and precision. Our preservation department offers advanced protective solutions to ensure the long-term durability of each piece. Situated near open water, our location allows easy access to international shipping routes, ensuring seamless project delivery.

Brookx Company B.V.

Brookx Company B.V. ("Brookx") is a young company with a great history.

Brookx was established October 1st 2003 via a MBO of the Power Electronics business operations of Thales in the Netherlands. Our history goes back to 1926.

Brookx serves global defence and aerospace technology companies as an integrated, full-service partner and supplier with high-end Power Electronics.

Integrated by providing all key functions to our customers: development, design (including build-to-spec), engineering, manufacturing (including build-to-print), marketing and after sales services. Of customer-specific power conversion and control solutions including AC/DC and DC/DC converters, DC/AC inverters, UPS systems, Control Units and Battery Chargers for extreme environmental conditions. Full-service by working with our customers on their Power Electronics requirements, from the earliest stages of system design and establishing product specifications to long-term after sales services.

We work with our partners in long-term relationships, sometimes over 30 years. Our customers include BAE, Boeing, General Dynamics, Lockheed Martin, Northrop Grumman, Patria and Thales.

Brookx has a track record of 100% quality and 100% delivery performance scores with our major customers. In 2006 Brookx received the Lockheed Martin Star Supplier Award.

We operate from a 4.000 m² office and production facility in Zoetermeer, The Netherlands including state-of-the-art Surface Mount Technology and Environmental Stress Screening facilities.

We manufacture all of our products in-house in flow cells, whereby we follow an active in-sourcing strategy, providing our customers unique benefits in product quality, delivery performance and efficiency.

BSS Holland B.V.

BSS, founded in 2008, is a Dutch company leading the way in integrating robotics, AI, and human-machine teaming in warfare.

1 - What We Believe | At BSS, people come first. Our aim is to improve operator safety and effectiveness by reducing cognitive load, enabling faster decisions. Collaboration is central to our approach, and we foster ecosystems with clients and suppliers to solve problems effectively. Partnerships and information sharing are key components of our philosophy, as we continually demonstrate the effectiveness of our capabilities.

2 - What We Do and Why We Do It | BSS provides unmanned aerial and ground vehicles, as well as C5ISR components to integrate sensors into customer networks. We collaborate on Concept Development & Experimentation programs and offer comprehensive training, service, and repair support. Movement, quick formation, and rapid dispersal are essential to avoid detection. Our solutions are designed to support these strategies.

3 - Our Perspective on Technology's Role and Its Transformative Impact on the Military | Next to their primary function, robotic/autonomous systems are evolving into flying, driving, and sailing computers, sensors, and communication hubs. These serve as crucial data and comms hubs in modern net-centric warfare. The surge in sensor data demands advanced analytics, compact hardware, and sufficient bandwidth. Future ISTAR systems will generate massive amounts of real-time data, requiring automated support for processing. We prioritize data fusion, automated analysis, and visualization to manage cognitive load and to speed up the OODA loop. Despite the significance of technology, we recognize that fundamentals such as morale, leadership, and adaptability are equally crucial for success in military operations.

4 - Products and Services | BSS offers a range of robotics and C5ISR equipment for military and homeland security applications. Robotics include UAVs, counter-drone equipment, land robots, sea robots, and payload carriers. C5ISR encompasses communications equipment, intelligence, surveillance, and reconnaissance systems, and tactical operations centers. We also provide consultancy, training, service, and repair support. Our consultancy focuses on tackling complex challenges, guiding customers through technology integration, and ensuring rapid knowledge transfer for sustained project success.

Bureau Veritas Nederland Holding B.V.

Bureau Veritas is a global business-to-business testing, inspection and certification service provider, referred to as TIC services. Founded in 1828 in Antwerp, the Bureau Veritas Group employs some 76,000 people in over 140 countries worldwide through a network of over 1,400 offices and laboratories. Its headquarters is in Paris.

MISSION

Bureau Veritas' mission is to reduce our clients' risks, help them improve their performance and support innovation. In doing so, we facilitate our clients in meeting challenges related to quality, health, safety and well-being, environment and corporate social responsibility.

CORE BUSINESS: TIC SERVICES

Our core business - testing, inspection and certification - focuses on ensuring that our clients' assets, products, infrastructure and business processes comply with customer specifications, national and international standards and relevant legislation and regulations (compliance).

TESTING

Testing and analysis activities concern the verification of conformity of products and goods in order to ascertain that their properties meet set requirements. Testing and analysis take place within the context of relevant requirements, standards, specifications and applicable laws and regulations. Testing is carried out in our laboratories and on clients' premises and focuses on manufacturing and process organisations.

INSPECTIONS

On-site inspections are carried out to check that products, services, equipment and installations comply with predefined requirements or perform as expected. Bureau Veritas' inspections cover a wide range of fields and are essentially aimed at verifying quality, quantity and conformity with applicable laws and regulations.

CERTIFICATE

In its role as an independent certification body, Bureau Veritas certifies national and international organizations based on recognized management system standards. These cover a wide range of topics, including quality, safety, health and welfare, environment, information security and personal data protection, energy management, food and feed safety and corporate social responsibility.

CLT Metal Services B.V.

CLT Metal Service – Smart metalworking at the highest level

Since its foundation in 1996, CLT Metal Service has developed into a leading specialist in metalworking, based in Horst, Limburg. With its advanced machinery, the company offers a wide range of processing options for metal pipes, tubes, profiles, and sheets. These include pipe laser cutting up to a diameter of 715 mm and a length of 16 meters, sheet laser cutting and bending up to 6.2 meters, and cutting up to 30 mm thick.

What sets CLT apart is their focus on quality, dimensions, precision, and speed. Thanks to their unique combination of craftsmanship and technology, they can produce complex metal products quickly and efficiently, with minimal waste and maximum accuracy. Each project is approached with an eye for detail and tailored to the specific wishes of the customer.

CLT Metal Service thinks about the process with you, from design to final delivery. By proactively collaborating with clients, the company contributes to smart solutions and a smooth production process. Whether it concerns single pieces, small series, or large projects, CLT is known for its flexibility, reliability, and technical expertise.

The company serves customers in various sectors in the Netherlands, Belgium, and Germany, including the food industry, logistics, agricultural technology, and the process industry. With a team of approximately 40 professionals and years of experience, CLT is a strong partner for both standard and custom metal solutions.

CLT Metal Service proves that innovative metalworking can go hand in hand with personal service and high quality. A smart choice for companies looking for precision, speed, and partnership all in one.

Compusult Europe B.V.

Compusult Europe B.V. established in 2019 is a subsidiary of Compusult Limited, Canada. Based in The Hague, Compusult Europe B.V. provides governmental, non-governmental and corporate organisations with access to Compusult's unique expertise in geospatial software engineering.

We supply enterprise-level solutions to organisations such as the United States National Geospatial Intelligence Agency, Canadian Department of National Defence, Natural Resources Canada, and the United States Geological Survey. Compusult's flagship geospatial product - Web Enterprise Suite (WES) - has played a key role in

meeting the continual demands of supplying vast amounts of geospatial information to their users.

WES is a comprehensive geoportal solution, which provides end-to-end system providing geospatial interoperability, publishing, data discovery, data management, data access, data analysis, user management and collaboration: all within a secure, industry-standard environment. Designed to rapidly integrate new functionality, provide connectivity from legacy or heritage systems, and meet new internationally-based standards, WES manages spatial and non-spatial datasets for your whole enterprise, as well as enabling the visualisation of the information on a map through the user's web-browser. Organisations can use WES as a stand-alone product and/or integrated with other specialist geospatial products.

Compusult is a diversified information technology company with over 36 years of experience in geospatial software, custom-software development, hardware and consulting services to government, military, business, technical and scientific sectors.

Key products and services:

- Geospatial Data Discovery and Management Systems
- Mobile Applications/Services
- Asset & Item Tracking / Inventory Control
- Custom and Commercial Software and Electronics

Comtest Engineering

Accelerating Readiness in a Shifting Security Landscape

In today's rapidly evolving defence environment, the pressure to accelerate development and scale production is greater than ever. Reliability, speed, and security are non-negotiable.

At Comtest, we understand that testing is mission critical. That's why we empower defence organizations and contractors with full control over their EMC and antenna testing, eliminating uncertainties around test capacity, travel logistics, security, and inconsistent test conditions.

From initial concept to turnkey delivery, we design, build, and certify test chambers tailored to your specific needs. Whether it's a new facility, a performance upgrade, or annual maintenance, we ensure your test environment meets the highest industry standards—on your terms.

In addition to our proven test solutions, Comtest also delivers Tempest shielding for secure communications. We design and install shielded enclosures for classified conference rooms, crypto spaces, secure datacentres, and deployable facilities enabling secure speech and data exchange, both on premise and in the field. With 40 years of experience, we've partnered with defence ministries across NATO, including the Netherlands, Denmark, Belgium, Spain, and Finland, as well as defence leaders such as MBDA, Lockheed Martin, Airbus and Thales.

As a family-owned company, we put people at the core of our technology. Because ultimately, it's not just about engineering—it's about enabling your team to deliver reliable, high-performance solutions faster and with confidence.

Let's work together to create secure, best-in-class solutions that not only meet today's challenges but grow with your mission, built on trust, partnership, and a shared commitment to long-term success.

Contour Advanced Systems

Contour Advanced Systems (CAS) is an independent, professional and innovative technique organization, founded in 1905. Currently CAS operates in 6 markets: 1) MOD/Security; 2) ICT-Data; 3) Logistics; 4) Energy storage; 5) Mechatronic Modules and 6) Special housing (Nuclear/Food). CAS is a multi-disciplined company with a wide range of quality products and it is a reliable partner for its (inter-)national customers. With a 'One Stop' strategy, CAS has an unique position in the market, which makes it able to act as 'Chain Manager' for Governments, SME's and OEM's. Employees are familiar with and aware of Corporate Social Responsibility, Legal regulations and Standards. CAS is specialized in: design, build, integrate, test, document and maintain (ILS) systems, incl. training and environmental.

Market/Product examples are:

- Modular solutions: Shelters, Containers & Trailers;
- Energy storage (Lithium, Flow battery & Hydrogen);
- Power solutions;
- Modular/Mobile Data Centers;
- High Fidelity Simulators;
- Electrical;
- Mechanical
- HVAC solutions;
- Special Housing: Nuclear, Food and Industry market;
- Control room: cabinets, 19-inch and Consoles (ergonomic);
- C2-Networks and Cabling (incl onboard ships);
- Sheet Metal solutions
- CNC solutions.

CAS delivers high standard quality products to its customers. For this, CAS has all required quality certificates (e.g. ISO 9001, ISO 14001, ISO 45001, AQAP 2110) to fulfill customer needs and CAS is familiar with handling crypto. In addition, CAS employees are MOD screened, and CAS is assessed by HPE, Lockheed Martin and NL-MOD for ABDO.

Conway & Partners

Conway & Partners is a highly specialized law firm focused on providing top quality services in various industry sectors, including manufacturing, defense, maritime, construction and engineering and new technologies.

Our clients include market leaders in their respective industries, as well as smaller firms who are in the early stages of development. Our market-specific knowledge helps us to provide well-tailored legal representation and advice to our clients. It is because of our focus on particular industries and practice areas that we are retained by firms of all shapes and sizes interested in receiving expert representation in their particular area of need, either with contract drafting, negotiations or other assistance to realize the business needs.

We work closely with our clients to avoid and minimize the risk of disputes from the structuring of the deal through the performance to achieve business goals. At Conway & Partners we have built a diverse team with considerable expertise in the area of international commercial contracting and transactions. Because of our experience in assisting companies to structure complex transactions throughout the world, we are accustomed to working with local lawyers just about anywhere.

Few firms in the Netherlands can represent themselves as having the expertise in dispute resolution that Conway & Partners has. Members of our ADR practice have been instrumental in establishing ADR in the Netherlands and internationally. Unfortunately, disputes cannot always be avoided. International arbitration is the traditional tool for resolving cross-border business disputes. It is a specialist field and requires lawyers who know the terrain. Conway & Partners's experience in this area sets us apart. Our common law trained attorneys work closely with Dutch advocates

S

to provide our clients with the skills necessary to achieve the desired results.

Also at the core of Conway & Partners is our litigation practice. Our team has considerable experience in the area of civil litigation and is regularly called upon to act in large, complex matters. We are conscious of the disruption and expense that can come with litigation and consequently work hard to represent our clients effectively and efficiently.

Categories Services

Daedalus Aviation Group

Daedalus Aviation Group is ISO 9001:2000 certified. The work takes us all over the world. Each company of the Daedalus Aviation Group is working in a specific area of the aviation industry and employs specialists accordingly. Several strategic alliances and a very wide network of contacts in the aviation industry worldwide make Daedalus Aviation Group a valuable partner in aircraft maintenance and the timely provision of parts and components.

Daedalus Aviation Inc.

Is an American company that has contracted the onsite maintenance and upgrading of F-16, Chinook, and Apache helicopters for the Royal Dutch Air Force. Daedalus Aviation Inc. also hires the specialists, needed to fulfil this contract. Daedalus Aviation Inc. is also assisting the Royal Norwegian Air Force in flight line operations.

Daedalus Projects & Trade BV

Contracts on site maintenance and upgrade programs for (military) aircraft outside the Netherlands. The company also represents a number of American OEM's in Europe.

Daedalus Personnel BV

Acts as an employment agency for technical specialists in the aviation industry. Also provides medium and higher technical staff in other technical branches. See www.daedalus.nl for job opportunities and further information.

Daedalus Components BV

Provides for aircraft- and motor parts on demand. These parts are tracked through a worldwide network of long standing contacts. Also supports Inventory Management on any desired level. Scrap replacement and material review through our understanding of the most advanced repair techniques can preclude replacement.

The know-how of advanced engine- and component overhaul ensure the best cost-quality ratio with shortest turn around times.

Daedalus Avionics Support Centre

For maintenance and repair of avionics for military aircraft. Daedalus Aviation Group has formed a joint venture with the US company IEL Inc. The support centre, servicing the European theatre, has its workshop in Tilburg, the Netherlands.

DAF TRUCKS N.V.

DAF Trucks N.V. is a wholly owned subsidiary of the American company PACCAR, one of the world's largest truck manufacturers. In its core activities DAF concentrates on the development, production, marketing, sales and service of premium medium and heavy duty commercial vehicles, offering highest quality and transport efficiency as well as optimal driver comfort. DAF's range of vehicles with electric driveline illustrates that the company is an environmentally leader as well.

DAF Trucks N.V. has production facilities in Eindhoven (NL), Westerlo (B) and Leyland (UK) and an extensive network of some thousand sales and service dealers in Europe and beyond, guaranteeing first class after sales and parts support. DAF is a global player and is offering its trucks and services in more than 70 countries world-wide. By tradition, in the Netherlands one out of every three trucks sold in the 15 tons and above segment is a DAF.

DAF's relationship with the Dutch Ministry of Defence dates back to the 1930s with the supply of a full suite of military solutions. Already in 1955, DAF delivered the 5,000th vehicle to the Dutch army and many, many followed in the decades there-after. Between the mid-seventies and the mid-nineties DAF supplied some 15,000 vehicles, including the famous 4 tons YA 4440 4x4 still in service, as well the YAZ 6x6 and YBZ 6x6 wrecker vehicles.

At the beginning of this century, a next highlight in the relationship with the Dutch Ministry of Defence was the delivery of 102 tractor/semi-trailer combinations for transporting armored vehicles and tanks. Today, DAF continues to work closely together with first class partners to provide the best military trucks on the market. These suppliers include manufacturers of semi-trailers, bodies, cranes and ballistic packages, just to mention some examples, resulting in a single point of contact and shortest communication lines. Latest innovation within DAF's military portfolio is the impressive DAF CF Military truck, available in 4x4, 6x6 and 8x8 configurations, powered by highly reliable 10.8 and 12.9 liter PACCAR MX engines. Thanks to the unique Tatra chassis concept with a central backbone tube and an independent suspension of half-axles, off road capabilities and driver comfort are unparalleled, even when driving through the most challenging terrains.

Damen Schelde Naval Shipbuilding B.V.

Damen Naval

Damen Naval is the dedicated naval shipbuilding division of the Damen Shipyards Group, which brings together all the naval activities of the group, both in the Netherlands and abroad.

With roots stretching back almost 150 years – to the Royal Schelde yard in Vlissingen – Damen Naval is the only naval original equipment manufacturer (OEM) in the Netherlands. Having delivered more than 400 vessels to customers all around the world, we are a trusted partner in the international marketplace, known for our role as full-service provider, or integrator, throughout the lifecycle of our products. While taking pride in our heritage, we are looking towards the future.

Experience

Covering the whole range of naval design, engineering, production and delivery, Damen Naval acts as Original Equipment Manufacturer (OEM) within the Netherlands Naval Cluster of highly sophisticated co-makers, suppliers, and renowned maritime research institutes. Constantly striving – with partners from this cluster – to deliver the best to our customers. The customers are primarily our Ministry of Defence and the Royal Netherlands Navy, and further include NATO and EU partner nations such as Belgium and Germany.

Home market

Damen Naval has already created a pedigree of several generations of Frigates, Amphibious and Support Ships and Oceangoing Patrol Vessels for the Royal Netherlands Navy as launching customer. Close cooperation between the customer, industry, and R&D entities in the so-called Dutch Golden Triangle guarantees state-of-the-art ships for the Royal Netherlands Navy. At the same time, we offer (or contribute to?) lean and efficient innovation within the Netherlands Naval Cluster, bolstering our position in the international markets. Now, Damen Naval stands ready for the necessary upcoming modernisation programmes of the Royal Netherlands Navy, realizing the Combat Support Ship and ASW- Frigates and, as partner of Swedish Naval shipbuilder Saab, propose the new next generation submarines for the Netherlands.

DAWN Aerospace Nederland

Dawn Aerospace delivers best in class chemical propulsion systems for satellites in orbit. Our CubeDrive and SatDrive technologies offer high thrust and high performance at a fraction of the cost and leadtime of conventional systems.

Using Dawn's space-proven building blocks and common architecture, we can deliver complete turn-key propulsion systems, customized to your mission. For satellite builders who are driven by affordability, responsiveness, and work on resilient LEO systems, our SatDrive technology offers high thrust, low cost of ownership and low lead time. Additionally, propellants are domestically available with virtually no lead time, simplifying logistics for customers.

We deliver customized turn-key propulsion systems using Dawn's TRL9 components, including thrusters, tanks, valves, instruments and electronics. We will work with you to design, build and qualify a system specific to your in-orbit mission. Dawn takes a broad partnership role in supporting all of your spacecraft mobility needs. This includes early design and mission planning, full hardware support, onsite training, delivery and export logistics, launch site integration and propellant loading, and on-orbit commissioning.

As a next step, Dawn is building highly reusable satellite launch vehicles. Same-day Reusable Launch Vehicles that do not require specialized space-launch infrastructure, integrate with everyday aircraft in nearby airspace, and launch as often and routinely as commercial aviation. We are a full-service partner, helping you with everything needed to deliver, position and return your satellite.

Defenture BV

Defenture is an innovative driven and dynamic designer and manufacturer of special light vehicles for military, law enforcement and specialist. We have a rich automotive engineering knowledge accumulated in the automotive industry and various motorsport disciplines. Our vehicles in the range from 1 to 10 tons, are appreciated by and sold to the Dutch MOD's SOF units and among other NATO countries.

Defenture BV deploys a systematic project approach in solving objectives in the development of vehicles. Customer demand is key and results in close development together with the customer to create an optimal deployable solution. "Out of the Box" thinking, an ambitious vision, "proven constructions" and simplicity are the pillars of the Defenture development philosophy. A very experienced R&D department and additional various external specialists, enabling us to manage the development process with a relatively short "time -to -market" and to fulfil the explicit customer demands. A private test site supports us to verify the developed vehicles and to support relatively short lead times.

Defenture's unique design and manufacturing process involves close cooperation with local partners to ensure a win-win result for all parties involved. These strong partnerships contribute to local business activity as well as cost and lead-time reduction. Defenture complies to all relevant certifications and international quality standards.

Delft Dynamics B.V.

Delft Dynamics B.V. (DD) is an innovative, high tech company founded in The Netherlands in February 2006. The company is specialized in developing and building drones that can be used as stable, easy to control sensor-platforms.

DD has provided UAS (Unmanned Aircraft System) engineering services to thirdparties and has developed and manufactured several types of drones (RH2 'Stern', RH3 'Swift', RH4 'Spyder' and DroneCatcher). DD has been involved in many national and international drone and counter-drone (CUAS) research and development projects together with well-known knowledge institutes, universities and industry, e.g.:

DroneCatcher: DroneCatcher is a drone, that is armed with a netgun to catch unwanted drones. With the use of multiple onboard sensors, the netgun can be locked on the target. Thanks to DroneCatcher's track & trace capabilities, the drone will be caught by shooting a net. After the catch, DroneCatcher can bring the captured drone attached with a cable, in the air to a harmless place.

- Dutch Defence Project U-Drone: In this defence technology project DD develops tethered drones that can be used inside buildings, tunnels, underground passageways, etc. to map the surroundings and find points of interest in a safe and non-jammable way.
- EDF Project DeterMine: The goal is to develop a multisensory and multiplatform solution for the detection of hidden threats such as Improvised Explosive Devices (IEDs) and landmines.
- EDF Project E-CUAS: This project aims to develop solutions to counter unmanned aerial systems including technologies such as passive and active sensors, soft kill and hard kill effector technologies and others.

DeltaQuad

The Netherlands. We're proud to be one of the most reliable and user-friendly VTOL platforms on the market, which specializes in intelligence, surveillance, and reconnaissance for security and defense applications.

Our flagship DeltaQuad Evo stands out with its superior performance features, building on the successful foundation laid by its predecessor, DeltaQuad Pro. Evo boasts an extended flight time of up to 4.5 hours and can manage operations over a range of up to 270 kilometers, ensuring comprehensive coverage and prolonged operational capability. Evo features a dual flexible payload bay that allows payloads to be swapped easily. It can house two standard payloads at the same time, or a single larger payload. This enables the operation of 2 payloads simultaneously, or extended flight time of a standard payload with an auxiliary battery.

Demcon defense & security systems BV

In our current society armed forces, governments and global organizations are facing with unpredictability and increasingly complex challenges to achieve and maintain national security, to protect their citizens and infrastructure and to make the world safer. We aim to contribute to the world's progress and safety by delivering meaningful and innovative technological solutions to protect our people, our national security, and our society in general. As a system supplier, Demcon defense & security systems can fully meet the needs of its customers, from proof-of-principle, prototype and pre-production to serial production, building on system engineering as its key competence, combined with a wide range of engineering disciplines. This enables us to carry out challenging projects and meet demanding specifications, thus delivering exceptional technological innovations for the defense and security market.

The Demcon Group (with over 1000 employees) develops, produces and supplies technology and innovative products and systems that offer solutions for the technical and social challenges of customers and end users worldwide. Our focus areas are high-tech systems, medical systems, industrial systems and defense & security systems. The Demcon group has branches in Enschede, Eindhoven, Delft, Leiden, Maastricht and Groningen (all in the Netherlands), Münster (Germany), and sales offices in Singapore and Tokyo.

Anticipating future challenges and threats, Demcon defense & security is fully equipped to provide safe solutions.

DeRegt Marine Cables

Cable solutions for challenging circumstances

Whether it's for seismic purposes, for Defense or for the Oil & Energy industry, we provide high quality cable solutions for any given challenge. Be it high up in the sky or deep down in the oceans our products are made to withstand swirling currents or icy blizzards. With over 90 years of experience in engineering cables, we know how to build solutions that will perform in even the most severe environments.

Wide scope of services

At our Dutch headquarters our well-trained craftspeople design and manufacture custom made, multipurpose cabling and strong and solid termination. We do our own research, development, design and engineering. Our clients have full insight in our design and production processes as we highly value collaboration. Each of our unique cable solutions is tailored to our clients specific needs and wishes. But we do more than engineering, we provide aftercare and full service maintenance in our factory or on site.

Perform with excellence

We are committed to deliver excellence in everything we do. We strive for performance quality and innovative engineering solutions. Our experts know your market, your portfolio and understand your challenges. We are flexible, innovative creative and apt to new solutions. But above all we have integrity: what we say is what we do. We take responsibility and ownership over every project we take on. This is why we won't stop before we have the perfect solution and keep delivering outstanding technical solutions for our clients around the globe. And that's why customers keep returning for new projects.

A Sercel company

Ever since 1912 quality, craftsmanship and innovation are the pillars on which we have built our leadership in the development and manufacturing of high-quality cable solutions. Nowadays we are proud part of the Sercel Group. World's leading designer and manufacturer of innovative seismic equipment and reservoir monitoring instruments.

Destinus'

Destinus NL B.V.

Destinus Energy develops, manufactures and services state of-the-art gas turbine systems, and is headquartered in Hengelo, The Netherlands. Our advanced turbine technology has turned the OPRA OP16 Gas Turbine into a masterpiece of technology allowing us to serve global markets with clean, distributed energy solutions. Setting the standard in terms of availability, reliability and low maintenance costs, OPRA OP16 Gas Turbines allow for very cost-effective 'always-on' generation of electricity and heat. Thanks to its unique combustion technology, OPRA OP16 Gas Turbines can even turn dirty fuel gas that would otherwise be flared, vented, or simply wasted into green power and clean exhaust gas. We are convinced that our gas turbine systems will continue to be a structural component of tomorrow's green energy landscape, and drive the world's energy transition!

DNV

Driven by our purpose of safeguarding life, property and the environment, DNV is the global independent expert in risk management and quality assurance, operating in more than 100 countries. Through its broad experience and deep expertise DNV advances safety and sustainable performance, sets industry benchmarks, and inspires and invents solutions. Whether assessing a new ship design, optimizing the performance of a wind farm, analysing sensor data from a gas pipeline or certifying a food company's supply chain, DNV enables its customers and their stakeholders to make critical decisions with confidence.

In the energy industry

DNV delivers world-renowned testing and advisory services to the energy value chain including renewables and energy efficiency. Our expertise spans onshore and offshore wind power, solar, conventional generation, transmission and distribution, smart grids, and sustainable energy use, as well as energy markets and regulations. Together with our partners, we drive the industry forward by developing best practices and standards. Our 4,500 energy experts combine industry expertise, multi-disciplinary skills and innovation to solve complex challenges for our customers in delivering a safe, reliable, efficient and sustainable energy supply.

In the Naval industry

As the world's leading classification society DNV has been a trusted partner for many Navies in the world. DNV brings a wide range of competence and experience to this special ship segment. Responding to the demands of naval shipyards and navies for greater standardization of both safety and ship-design standards, DNV has developed specific standards for naval surface vessel and submarines. In other segments of the security and defence industry our experts support customers primarily by delivering services covering: Technical assurance, advisory, certification, testing and risk management.

DTEC Naval Industries B.V.

DTEC Naval Industries specializes in providing industrial participation services for the global defence and security market, primarily in the maritime domain. The company was founded in 2017 by DTEC Industries as a dedicated business unit, in response to the increasing demand for an independent specialist provider of industrial participation services in the maritime domain.

The DTEC Industries Group with its headquarters in Singapore, can be defined by two business units:

- Industrial participation: this unit provides independent and specialist industrial participation services.
- Financing Services: By combining industrial participation and financing solutions in an early stage of the project the most suitable structure can be defined. Financing can be done locally. Besides arranging financing for the export transaction also the investments as part of the industrial participation obligations can be financed.

DTEC Naval Industries possesses a distinctive combination of experience in the fields of defence shipbuilding, maritime infrastructure, and related industrial participation projects.

We continue to build relationships with our clients and provide value-adding services for their specific needs in a professional, timely and compliant manner. The clients we serve include national governments and commercial enterprises (smaller and larger size) that operate in the defence and security markets.

Our services range from drafting value propositions, fulfilment of industrial participation obligations, trading services to selection and development of industrial partnerships and from designing transfer of technology plans to industrial participation contract management.

Dutch Military Vehicles BV

Based in the Netherlands, Dutch Military Vehicles specialises in developing and producing military vehicles and components. Whether we act as contractor for an end-customer or as a sub-contractor, our company values are always what guides us.

A small team of highly dedicated and skilled professionals ensure that, a high quality product is delivered that measures up to the customers' expectations. On time and on budget at any location worldwide. Not only vehicles or components are among our possibilities, we also provide service and specialised training around the globe.

Dutch Military Vehicles originates from DEBA Bedrijfswagens / IVECO Schouten. As an IVECO-dealership we have a long tradition of supplying customers with specialised vehicles varying from small vans to purpose build 60 ton trucks. Due to its vast experience in bodybuilding, world-wide offered services and training programs we were invited to act as a sub-contractor for IVECO Defence Vehicles to deliver 33 heavy trucks to the Dutch MOD. These vehicles would be put in to service in the Dutch Caribbean. Our skills in training and world-wide component deliveries where of added value to the contract. We have a strong relationship with IVECO Schouten, that enables us to supply service throughout The Netherlands.

Dutch Military Vehicles' first major defence contract as a lead-contractor was in 2018 with the AnacondA, supplying the Dutch MOD with 46 vehicles that were also bound for the Royal Netherlands Marine Corps based in the Dutch Caribbean. Later, 14 AnacondA's were delivered in the Netherlands within the same contract.

We have the ambition to use our no nonsense knowledge to provide service and product in a wide range to defence customers is The Netherlands and abroad.

Dutch Tree B.V.

We are a premier Dutch system integrator specializing in the defense industry. Founded by professionals with deep expertise in IT, mathematics and industrial engineering.

We are dedicated to delivering state-of-the-art solutions that address the evolving challenges of modern defense. Our multinational team, representing diverse European backgrounds, brings together a wealth of knowledge and innovation. Via rapid development technologies we are capable to seamlessly integrate advanced AI technology with a suite of high-end proven defense solutions, we ensure precision, reliability, and efficiency. We are committed to driving technological progress and securing the future of defense across Europe.

Dutchview Information Technology

ED Controls by Dutchview Information Technology

Smart digital project management for the defence industry Ed Controls is an easy-to-use software solution designed to enhance project management in construction. By connecting teams, workflows, and data, it streamlines processes, ensuring better overview, saving time, and enabling teams to deliver on their promises with real-time insights and easy communication.

Always a clear overview of your construction project Plan more efficiently, work more clearly, and stay on schedule. Ed Controls brings everything you need for your construction project together in one place.

Get more done in less time Collaborate seamlessly with your team and external partners. Fewer misunderstandings, fewer delays—more time for quality and growth.

Quality assured, every step of the way Successful handovers that exceed expectations: on budget, high quality, and client-approved.

Committed to security and data privacy At Ed Controls, we take security and privacy seriously, ensuring that all project data is handled with the highest level of protection. Our platform is built with security measures to safeguard sensitive information and maintain compliance with industry standards. Ed Controls holds two ISO certifications: ISO 9001 (quality management) and ISO/IEC 27001 (information security), demonstrating our commitment to maintaining the highest standards of quality and data protection.

SecurEd: Ed Controls for high security projects

For organizations that require the highest level of security, SecurEd offers a specialized, ultra-secure version of Ed Controls tailored for industries like defense, government, and critical infrastructure. Designed to meet the strictest data protection requirements, SecurEd provides flexible hosting options to ensure total control, compliance, and confidentiality:

- Private data center hosting: Data is stored in a dedicated, secure environment with a custom domain name, ensuring full control over access and compliance.
- Private cloud option: Hosted on an isolated server, completely separated from other users for enhanced security and independence.
- Stand-alone version: A fully self-contained system without an internet connection, ideal for classified or highly sensitive environments.

Dynamic Ear Company B.V.

Dynamic Ear Company (DEC) is based in Delft, the Netherlands and part of Sonova AG. DEC designs, develops and manufactures in-house, in-ear acoustic solutions. The product range includes passive shooting hearing protection solutions with (tactical) communication interfacing.

Expertise

- In house R&D, Production and Testing.
- 100% Acoustic testing of hearing protection acoustic filters.
- Projects in defence, police and law enforcement communications, worldwide.
- Patented Impulse hearing protection technology, specifically designed for the defence industry.

Our offerings

- Specialist knowledge in hearing protection, impulse noise protection, measurements and attenuation of sound transfer to the ear.
- Sound measurement equipment for measuring sound on location (e.g. at the shooting range).
- Manufacturing of ambient hearing protection solutions that offers sound specific protection (e.g. impulse noise) whilst maintaining situational awareness.
- Joint development projects.
- Direct cooperation with companies associated with NIDV and defence.

Certificates

- ISO 9001:2015 certified
- Certified according to PPE regulation (EU) 2016/425, Annex VIII. Module D.
- CE, ANSI and ANSI IPIL certified products
- NATO Stock Numbers (NSN) issued

EASP AIR BV

NL EASP AIR is the Dutch service provider for special aerial mission support. EASP AIR is operating Maritime Patrol and ISR surveillance missions, SAR and support to Fire Fighting operations. Included is the provisioning of the cloud based, enhanced I-COP® C3-SA Command & Control Mission Tool.

EASP AIR missions are carried out with an own fleet of Long Endurance/Long Range DORNIER DO328-100 Special Mission Aircraft, each equipped with advanced sensors and (SATCOMMS) systems.

EASP AIR's services are primarily focused to (supra)-national and governmental bodies, as well as to Civil / Military Authorities. Since 2017, the EU Commissions' FRONTEX EU Border and Coast Guard Agency is one of EASP AIR's main clients. Ever since, EASP AIR has been operating aerial surveillance support and SAR operations in Spain, Albania, Monte Negro, Italy, France, Greece, Malta and Belgium. In March 2022, EASP AIR started training Indonesian Air Force TNI-AU Officers with Maritime Patrol Training. Early 2025, the Republic of Malta became one of EASP AIR's customers.

EASP AIR provides its customers with the most innovative and cost-efficient, enhanced Common Operational and Situational Picture. The C3/SA Command & Control component of its operations is enabled by the cloud-based I-COP® C3/SA Mission Tool. I-COP® C3/SA allows NL EASP AIR to operate in integrated operations, as well as in remote mission areas on an autonomous basis.

Elfa Elementenfabriek B.V.

Elfa is an expert in batteries and lighting. For every question in this field, Elfa has the solution or is developing it. As a reputable wholesaler, Elfa supplies top products from major brands in primary or secondary batteries and pocket and head lamps. The core assortment includes some 3500 different articles. Practically all of these are immediately deliverable from stock.

Elfa's total range is at least five times larger as it can actually supply the entire assortment of all the A brands it represents. These standard products are complemented by customised products. The quality and safety of each product that Elfa carries must be proven before they are included in the range. In addition, products must complement the existing range before they are added to it.

Elfa has a broad and deep product range, covering more than 90% of demand. Elfa also supplies customised solutions that it develops on a customer-specific basis. Sometimes these involve adjustments to existing products but just as often completely new products are developed based on the enormous expertise that has been built up here over more than a century. Elfa is able to make statements on the total cost of ownership based on its market and price knowledge and lifetime calculations. Especially where Elfa is involved in the early stages of product development, it can make a valuable contribution to the quality of the end product.

EMX Powertrain B.V.

EMX Powertrain is an independent Dutch electric technology company and contributes to the worldwide sustainable powersport industry. EMX designs, engineers, and builds high-performance electric powertrain solutions, prototypes and production vehicles. We are specialised in the engineering and production of complete electric drivetrains for motocross, enduro, trial, utv (side by side), atv, quad, light all-terrain vehicle, light utility vehicle and amphibious all-terrain vehicle for street legal as well as non-street legal application.

EMX has developed a scalable electric powertrain technology, enabling efficient and customer-specific application to be developed in a wide power range. This means lower inventory costs, volume advantages and standardization in production for the customer. Our technology is characterised by its compact design, high energy density, high reliability, low weight and high efficiency. Additionally, we have deep knowledge and experience in the development of chassis construction, transmission and drive unit.

We are a turnkey provider from a blank sheet through to low volume production, enabling us to significantly de-risk and accelerate new products for our customers. From global OEMs to start-ups, we apply an identical process to deliver and integrate high performance electrical powertrains for the highest of standards.

We develop and produce the applications, sub- and basic components in the Netherlands and distinguish ourselves by a short lead time of prototyping and development of these components. Our partnerships mainly consists of selected Dutch and European strategic partners and suppliers.

Engels Logistiek B.V.

Engels Logistiek is a leading provider of robust and smart packaging solutions, specifically designed to meet the stringent requirements of military logistics, storage and transportation. With a focus on sustainability and operational efficiency, we provide high-quality plastic totes, pallets, pallet boxes and specialized packaging for defense organizations worldwide.

Our solutions withstand extreme conditions and long-term heavy use. Engels understands the need for safe storage and transportation of military equipment, weapon systems and sensitive materials under varying and often demanding conditions. That's why we offer custom solutions that meet military specifications and international standards.

Engels' supplies include:

- Heavy-duty plastic bins and boxes for the storage and transport of military equipment and sensitive components.
- Durable pallet and pallet box solutions tailored to the need for efficient supply chains and streamlined logistics operations.
- Flight cases, ExoCases™ and Heavy duty cases, specifically designed for military applications, with shockproof and waterproof properties (ip67) for maximum protection of sensitive equipment.
- UN-certified packaging for hazardous materials, in compliance with ADR, RID, IMDG and IATA standards, for safe transportation of fuels, chemicals and other strategic materials.
- Seals for securing confidential goods.

With ISO 9001 and ISO 14001 certification, Engels guarantees the highest quality and environmental standards. We work closely with defense partners to drive innovation and improve operational efficiency. Our products contribute to secure and sustainable military logistics, both in the Netherlands and internationally.

Enginia B.V.

Enginia is a Siemens Digital Industries Software partner for Product Lifecycle Management, including 3D CAD, CAE and Data Management. Enginia delivers and supports secure and standards based data management solutions for engineering, manufacturing and service. With the Siemens software and a full range of services Enginia leads customers in the manufacturing industry to Industry 4.0. Our services are based on the premise of 'Leadership, people, strategy and software'. By providing a broad and integrated suite of software we ensure the flow of technical information, like drawings and bills of material, through the entire company and beyond. For a closed loop scenario we provide cloud services and low code platforms. These solutions harvest in-use data and transform this data into valuable information. This information can be focussed on predictive maintenance as well as simulation driven innovation. To increase the cooperation between government and industry Enginia provides software and consultancy services for Data Exchange between contractors and governmental materiel organizations based on ISO10303 (STEP) and Sx000i. Enginia is founded in 1997 and employs 50 highly trained professionals working from offices in Nootdorp, Amersfoort and Hengelo. We support more than 1000 companies in the discrete manufacturing industry with CAD (NX and Solid Edge), CAE (Femap and Simcenter) and PLM (Teamcenter).

Our services comprise

- Full suite of Siemens Digital Industries Software (Xcelerator portfolio)
- Digitalization Maturity Scans
- Value Discovery Analysis
- PLM architecture consultancy
- IT Project management
- PLM implementation services
- Application and functional training courses
- Leadership and change management training courses
- On-site and remote PLM application development
- Customer service
- Full service first and second line helpdesk

ESRI Nederland B.V.

Geo-information plays an increasingly important role within Defence. Having the correct information of an area at the right time enables commanders to make the right decision. Taking action against an irregular opponent in an urbanised area and on unknown terrain requires insight into the entire situation.

Situational Awareness

For missions in unknown areas, it is important to know the possibilities and impossibilities in order to be able to determine one's own action. Having insight into a situation supports decision-making. In order to have insight into the situation, units, materiel and capacity both outside and inside the Dutch borders, it is essential to bring together data from different sources to achieve the desired result quickly, effectively and efficiently.

GIS supports defence organisations within processes such as the intelligence chain, terrain analyses, deployment of capacity, strengthening the NEC concept and decision-making. It makes it possible to record information about locations, use it for analyses, visualise it in images and on maps and integrate it with other systems. This enables effective and efficient action, better decision making and more insight into the situation.

Etteplan Netherlands B.V.

At Etteplan we excel in the creation, management, and publication of technical documentation tailored for Defence applications. Our expertise aligns with international ASD directives and national Programs of Requirement, ensuring that we meet the specific documentation needs of Defence organizations. We assist Original Equipment Manufacturers (OEMs) by transforming complex requirements into manageable information.

S1000D/S2000M/ASD-STE100

As a recognized leader in the production of AeroSpace Defence (ASD)-compliant technical documentation, we adhere to the S1000D and S2000M specifications. Additionally, we are proud to offer one of the foremost Simplified Technical English checkers in accordance with the ASD-STE100 standard.

Over 1,000 documentalists across multiple NATO countries

With a network of over 1,000 skilled documentalists across multiple NATO countries, Etteplan Netherlands is part of the Etteplan Group, which has a presence in the Netherlands, Germany, Denmark, Poland, Sweden and Finland. Our collaborative efforts in Europe encompass both national and international technical documentation projects. Beyond Technical Communication Services, we also deliver expertise in Engineering and Software & Embedded Systems.

For Defence and Civil assets and products

We are committed to providing our clients with high-quality and cost-effective solutions. Our extensive knowledge in technical writing and editing, combined with advanced techniques in content management, Simplified English, terminology management, and translation management, ensures that our technical documentation is effective, clear, and consistent. Leverage our proven techniques and best practices. Benefit from the insights gained through our extensive experience and partner with a specialist who understands the unique documentation requirements in the Defence industry.

Everllence

Everllence

Everllence is a leading system provider of high efficient integrated propulsion and energy solutions for the marine and offshore market.

Everllence enables its customers to achieve sustainable value creation in the transition towards a carbon neutral future. Addressing tomorrow's challenges within the marine, energy and industrial sectors, we improve efficiency and performance at a systemic level. Leading the way in advanced engineering for more than 250 years, we provide a unique portfolio of technologies. Headquartered in Germany, Everllence employs some 14,000 people at over 140 sites globally. Our after-sales brand, MAN PrimeServ, offers a vast network of service centers to our customers all over the world.

Our mission is to convert energy into sustainable progress and prosperity, driving the transition towards a carbon-neutral world. As being a preferred partner of choice for our customers in the marine-, energy- and industrial market, we build on our unique range of capabilities in order to create pioneering solutions to master the business-, technical- and operational challenges of decarbonization.

Everllence | PrimeServ is the integrated, company-wide organization combining the after-sales activities of all Everllence products, ensuring global accessibility of spare parts, service, maintenance and repair of the complete Everllence product portfolio.

Faes

FAES is an industrial packaging manufacturer that designs and engineers custom packaging solutions. We produce custom (flight) cases with custom interior and provide additional services such as system integration, cleaning and refurbishing.

We are experts in the field of UN certifications and understand the packaging requirements concerning NEN, Mil-specs and STANAG. We advise companies on how to protect fragile and sensitive equipment to ensure safety throughout the logistics chain. We understand nothing is more important as properly working equipment during a mission.

We are proud of the almost 30 years of cooperation with Defense. Besides DMO, Faes does business with MatLogCo, KCT and 11 Airmobile Brigade of the Army, DMI and MARSO of the Navy and LCW of the Air Force. For Defense, we supply packaging materials in all shapes and sizes: weapon cases, aluminum cases, half 19-inch IT housings (TITAN), 19-inch racks for data centers, a wide variety of ruggedized plastic cases of high-quality plastic (especially SKB) and all kinds of flight cases to think of. We are the exclusive partner in Europe for the SKB brand: Mil-Standard Waterproof Cases (MIL-C-4150J / IP67). In order to provide the right knowledge within the defense market, we employ consultants with defense experience. We understand that defense is a "specialty market" that almost always needs specials and hardly ever standard solutions. We understand the "green" environment and always keep an eye on developments surrounding Defense. Read our story in 'Materieel Gezien' https://magazines.defensie.nl/materieelgezien/2019/08/05_een-klik-in-verpakkingen. Our clientele also includes companies active in the field of nano and medical technology, such as ASML, Medtronic and Philips. All these organizations often transport very expensive and sensitive parts, under sometimes extreme circumstances. Faes' packaging experts think along with them and develop advanced packaging solutions. Additionally Faes analyzes your entire supply chain and packaging policy which can reduce up to 50% of your total costs.

Fokker Services Group

Building on over a century of experience, aviation aftermarket businesses Fokker Services and Fokker Techniek deliver innovative total support solutions from facilities in Europe, Asia and the Americas.

Fokker Services creates tailored solutions for the maintenance of regional, commercial and military aircraft. The organization engineers, repairs, upgrades, and delivers high-quality solutions to facilitate and support the competitive operations of its customers. Services range from type certificate holder-related product support services to flight hour based component availability and repair programs, spare parts, engineering, modifications and documentation support.

Fokker Techniek excels in complex projects. With a strong engineering background, the team specializes in green aircraft completions, conversions, upgrades and refurbishments, for both the VIP and special mission markets. Furthermore, the organization provides full MRO support to private, commercial and military customers. This includes lease transition maintenance, together with extensive capabilities such as heavy maintenance, modifications, parts manufacturing, component maintenance and aircraft painting.

Fortinet B.V.

Within our unified platform, three solutions redefine cybersecurity, helping you to respond to an ever-evolving cybersecurity landscape to meet constantly accelerating business needs. The solution to simplifying complex networks, distributed users, and hybrid applications is the convergence and consolidation of security, all with flexible consumption models to make buying easy.

The Fortinet Security Fabric enables automated protection, detection, and response along with consolidated visibility across both Fortinet solutions and a broad ecosystem of over 500 third-party solutions. Fortinet holds 1,015 U.S. patents—nearly three times more than comparable network security vendors—a testament to our dedication to organic innovation that delivers industry-leading cybersecurity and networking solutions. The vast majority of Fortinet's R&D is based in North America and the company has support and centers of excellence across the globe. FortiOS, Fortinet's flagship operating system, is organically built on a common management and security framework and uniquely enables the convergence of networking and security. FortiOS also serves as the foundation of the Fortinet Security Fabric, the industry's highest performing and most expansive cybersecurity platform.

Fortinet is the only security vendor to develop and build custom security processing units (SPUs). These purpose-built ASICs offer the best price/performance and value in the industry with Security Compute Ratings that are far higher than other vendors.

Every day, FortiGuard Labs uses one of the most effective and proven AI and ML systems in the industry to process and analyze more than 100 billion events, sending actionable real-time threat intelligence to immediately increase defenses against even zero day threats. The unique combination of FortiOS, purpose-built SPU technology, and AI-powered threat intelligence delivers superior protection driven by our commitment to cybersecurity innovation and excellence.

Glow Management Nederland B.V.

20+ years of experience in project and resource management have become a foundation for the creation of a next-generation AI-driven resource management solution for complex multi-project environments. Being guided by researchers who have developed a unique approach to multi-project resource management, Epicflow is the only solution in the market that leverages the power of artificial intelligence to meet the needs of businesses in the successful delivery of multiple projects with a shared resource pool.

Epicflow is an ideal solution for mid-size and large-scale companies with 200+ employees. Our software lets businesses grow by delivering more projects with the same number of resources and within the approved time and budget frames. Our unique methodology behind the software solution organizes work at a company in a manner that resources can deliver better output without being overloaded. Companies that use Jira, MS Project, Oracle Primavera, or any other tool can enhance their software with Epicflow's advanced functionality with ready-made and custom integration opportunities we provide.

We serve the following industries:

- Defence and Aerospace
- Telecommunications
- Manufacturing
- Automotive

The functionality we provide with our solution:

- Enterprise and portfolio management
- Resource allocation and management
- Multi-project planning and control
- Performance and progress tracking
- Task management
- Time and budget management
- Risk management and decision-making
- AI-driven project flow predictions

Being JOSCAR-accredited, we provide our clients with the highest-level data security measures and design additional functionality upon request, depending on a company's needs. ,Epicflow is the trade name of Glow Management Nederland B.V.

GKN Fokker (GKN Aerospace)

GKN Fokker, founded by aviation pioneer Anthony Fokker in 1919, was acquired by GKN Aerospace in 2015. Fokker's outstanding people and technologies are now fully integrated into the GKN Aerospace business. GKN Aerospace is the world's leading multi-technology tier 1 aerospace supplier. GKN Aerospace develops, builds and supplies an extensive range of advanced aerospace systems, components and technologies and is market leading in aerostructures, engine systems, transparencies and wiring systems. The company operates in 12 countries at 38 manufacturing locations employing approximately 15,000 people.

GKN Fokker companies in the Netherlands are specializing in:

- Design, development and production of light weight Aerostructures, based on Thermoplastic and Thermoset Composite Technologies, and a patented solution for Ballistic Protection;
- Design, development and production of Electrical wiring interconnection systems based on the unique Wiring Design and Manufacturing System, allowing configuration control throughout the life cycle with focus on the development phase, and digital connection between engineering and production;
- Design, development and production of Landing gear systems and components;
- Radar technology based on Frequency Modulated Continuous Wave technology providing Low SWAP-C suitable for UAV's;

GKN Aerospace has well established positions on all major defense and civil platforms. Examples in the defense market are the F-35: flaperons, wiring harnesses, inflight opening doors, arresting system, NH-90 landing gear, door and empennage, Apache composite forward avionic bays and MQ-9 landing gear.

GXO Logistics Netherlands B.V.

Changing the game in logistics

GXO is a world leader in providing cutting-edge logistics solutions for multinational companies and blue-chip market leaders. Our ultimate vision: create game-changing opportunities for the world's best companies.

GXO Logistics, Inc. (NYSE: GXO) is the world's largest pure-play contract logistics provider and is capitalizing on the rapid growth of e-commerce and automation. GXO is committed to providing a world-class, diverse workplace for more than 130,000 team members in more than 970 facilities, totaling approximately 200 million square feet. The company partners with the world's leading blue-chip companies to solve complex logistics challenges with technologically advanced supply chain and e-commerce solutions. GXO is headquartered in Greenwich, Connecticut, USA. High-performing, mission-critical aerospace, government and defense logistics solutions. GXO is the industry's leading innovator of global aerospace logistics – serving all sectors and products across government, commercial and military domains. Whether you need outsourced support for the maintenance of aircraft fleets in service, the launch of new aircraft or Lean manufacturing processes, we can ensure exceptional performance. We'll customize aerospace logistics solutions to your requirements and manage distribution to maximize uptime. Your supply chain will have the full benefit of our cutting-edge solutions, delivered by operations certified to AS 9100 and 9120 quality standards.

Key capabilities

- Production, assembly and Maintenance Repair and Overhaul (MRO) support including Just-in-Time (JIT) manufacturing
- Global spares management, and product lifecycle sustainment support including performance-based logistics
- Inbound material, warehouse, and order management
- Fleet readiness maximization through Aircraft on Ground (AOG) response support
- Logistics support in contested environments
- Global managed transportation
- Smart application of automation and technology to maximize efficiency, continuity of service and end-to-end supply chain visibility

HEIGHT TECHNOLOGIES

HEIGHT TECHNOLOGIES – Always A Step Ahead

Your partner for high-end Unmanned Systems, Components and R&D projects. Always ahead of the game - ensuring an ongoing advantage for our worldwide client base. We offer products with a proven track-record and a partner who ensures a smooth implementation in your organization. Our goal is to deliver total solutions that are cost-effective, well-executed and operationally ready. This means dedicated advice, a clear scope and a product that does what it promises. Adapted to any application, mission or environment to overcome every challenge. Our [mini] UAV system is a leading platform in the tactical UAS industry, developed as military drones with unmatched performance for defence and public safety. Using aviation-grade materials and field-proven sensors & components to meet field requirements and MIL-standards. The best on endurance, autonomy and connectivity. Human Telepresence Technology enables every person to fly a UAS within 30 seconds like a professional user: indoor & outdoor. We believe that sending machines before humans can save lives and allows to make safer, smarter and faster decisions. The nested UAS solution offers a full autonomous Guard in the air. With advanced AI capabilities, it automatically detects, tracks and reports unwanted situations – 24/7. We like R&D projects, integrating any solution into your C2 system because it's made for it.

Unmanned Systems

- MIL-SPEC mini-UAV Systems, for covert ISTAR missions with extreme endurance
- Counter UAS solution [net, kinetic]
- Human Telepresence UAV system [tactical indoor & outdoor]
- Human Telepresence UAV system for cargo and EOD applications

Components

- EO/IR gimbal cameras
- C2 P2P / MANET encrypted communication
- Multipath LTE encrypted communication
- Swarm layering autonomous UAV solution – in development
- Nested UAS solution
- Fixed Wing V-TOL Systems
- UGV Systems
- R&D and System Integration
- Anti-GPS Jamming/Spoofing
- [AI] Software analytics
- All kinds of tactical payloads

HEINEN & HOPMAN

Heinen & Hopman

The most challenging requirements are set for naval ships. As a result, naval vessels must be able to sail anywhere in the world in short term, including regions with extreme climates far from the supply lines. Heinen & Hopman has long-established and wide ranging practical experience in the maritime field. We also provide global coverage and 24-7 service availability thanks to major service points and spare part depots around the world. All components used in Heinen & Hopman units are subject to shock and vibration criteria and can be mounted on absorbers. Heinen & Hopman's specializations are diverse and vary from heating systems to heat recovery systems and from ventilation systems to provision cooling.

Examples of products are:

- NBC filter installation
- Shock-resistant chiller units
- Booster coolers
- Central air handling units
- Local fan coil units
- Self-contained units
- Steam humidifiers
- Air distribution grilles
- Fire, smoke and other air dampers
- Explosion-proof ventilation/
- AC units for ammunition storage
- Cooling units for storing food and waste
- Electromagnetic interference (EMI) components

Heinen & Hopman has equipped, among others, the following naval ships abroad:

- Sigma PKR 10514 class frigates
- Diponegoro class frigates
- Sigma FMMM class frigates
- Car Nicobar class patrol ships
- EL Mellah training vessel
- MV Sycamore training vessel
- HMNZ Canterbury amphibious transport ship
- A range of patrol vessels for the Middle East, Caribbean, Asia, Europe and Africa
- Mine hunters for a North African Navy

HENSOLDT

HENSOLDT is a leading supplier for platform independent offerings deployed across the domains air, sea, land, and security for armed and security forces worldwide.

HENSOLDT's portfolio includes sensor technologies, which, when combined, allow detection capabilities to be improved substantially. Our main areas of activity include, air defense, mission management and platform self-protection, force protection, signal intelligence and data links, as well as night vision devices, laser rangefinders and optronic targeting equipment. In addition, our portfolio also comprises of mission avionics such as avionics computers, mission planning systems and autopilots.

As a system integrator, HENSOLDT offers platform-independent, networked complete solutions. With our wide product range, we cover all types of applications in air, sea, land, and security missions and enable our customers to maintain superiority when it comes to monitoring the electromagnetic spectrum.

Our solutions are deployed on various platforms, including helicopters, aircraft, unmanned aerial vehicles, ships and submarines, armoured vehicles as well as satellites.

HIGH EYE

High Eye

High Eye is a SME that designs, builds and sells unmanned helicopters. Our long-range VTOL UAV, the Airboxer, has a great performance and a small logistical footprint.

Key points of our Airbox

Robustness:

- STANAG 4738 documented
- Dust and Waterproof IP-67
- EMI-shielded
- Corrosion Protected
- Rugged and Weatherproof

Performance:

- Endurance: 3 to 4 Hours
- Up to 7 kg Payload
- Maximum take-off weight (MTOW): 31.7 kg
- Range: 100km
- Multiple Hours of Hovering

Practical:

- Multiple Payload Integration (350 W available)
- Low Logistical Footprint
- Lightweight (21 kg empty)
- Fuel: Gasoline

Safety:

- Multiple Redundancies
- Tested Autorotation
- Emergency Flotation System
- DES-Encrypted Datalink
- ITAR free

Designed and built by engineers and manned aviation pilots. Privately owned and run by a seasoned entrepreneur and its management, which makes doing business personal and dedicated. High Eye focusses entirely on this product alone. The Airboxer is a very handy (light and small) VTOL UAV that is capable of missions with the toughest conditions above the sea, in the artic, in the desert and, of course, above land.

High Voltage Potting & Coating B.V.

High Voltage Potting and Coating BV (HVPC) is a privately held company established in 2002. HVPC has the knowledge and experience to achieve the best HV solutions for your High Voltage issues. We facilitate in each production step starting from high level specifications to full assembly and testing. HVPC is ISO:9001 [2015] and ISO:14001 [2015] certified. Compliant with MIL standards and IPC-J-STD-001G. Our own engineering department can support with the design of High Voltage related products or solutions on both electronic and mechanical level. All is done according to appropriate design rules, needed for High Voltage applications. One of the main activities is potting electronics (under vacuum) to ensure that the High Voltage design works. This will result in reliable products with high MTBF (Mean Time Between Failure). Several materials (epoxy, silicon and oil) are used for potting depending on the application.

In the defence and avionics sector HVPC also applies parylene coating on electronic assemblies.

Parylene is a conformal coating with excellent moisture barrier properties. It is used to protect high end electronics to harsh environments. Parylene is also used in medical and space applications.

To ensure reliable High Voltage electronics with high MTBF and predictable lifetime we have our Partial Discharge measurement facility. Depending on the product different test cycles can be applied and voltages up to 60 KV DC and 30 KV AC. Specific custom coils, transformers, and linear actuators can be produced (winding) for low to medium volumes. Our expertise is in special designs/ geometries and material.

At HVPC we are able to produce efficiently thanks to the in-house vertical integration of all our processes. This gives us the ability to produce efficiently and create High Voltage products of high quality.

From design to end-product HVPC can offer you a solution to your High Voltage applications.

Hive Aerospace Collective

Welcome to Hive Aerospace Collective, an international aerospace maintenance, education and training hub. Situated on the Dutch-Belgian border, roughly halfway between Rotterdam and Antwerp and bordering Woensdrecht Air Base, this aviation hotspot boasts an attractive strategic location. The military air base itself has been home to aviation, maintenance and training facilities for some 75 years and includes Logistics Centre Woensdrecht, the maintenance base of the Royal Netherlands Air Force. Together, we form a unique Civil-Military Aerospace Cluster, working closely together to offer state-of-the-art maintenance, repair, overhaul and upgrade (MRO&U) services to both the civil and defence markets. In addition, the site is growing into an Aerospace Innovation Hub, building a start-up community.

Innovative Aerospace Maintenance

Hive Aerospace Collective and its surroundings have all the necessary ingredients to grow into a leading European service centre for both civil as well as military aircraft and helicopters. At present, more than twenty aerospace companies are present, generating around 2,500 jobs. Hive Aerospace Collective is the Dutch one-stop-shop for innovative aerospace maintenance and also a knowledge exchange centre, with innovative field labs for composite repairs and drone development and applications.

Attractive location & capabilities

Important for foreign companies is the attractive location within the Dutch province of Brabant, which offers an excellent living environment, educated workforce and high- tech research network. On the part of military services, the location has F-35 sustainment capabilities, both on-base as well as on the business park. Furthermore, helicopter maintenance services are being expanded and a venture into unmanned air systems ("drones") is taking off as well.

HML - Holland Marine Lifts B.V.

Holland Marine Lifts designs, builds, installs and maintains lifts (elevators) that fulfill a custom need. Passenger lifts, freight lifts, service lifts and various specials for Offshore, Navy and Super yachting. We are experienced in new situations and unique challenges. Since 2002, we have exclusively worked on custom projects. We thus fill a need that is answered by few in our market. With a team of 25 enthusiasts, our people have the space and the responsibility to utilize all their technical creativity. The space, because our product benefits from close collaboration between the disciplines. And the responsibility, because we are regularly forced to think outside all the usual solutions.

We custom-create lifts like:

- Hydraulic (container) platforms up to 25 tonnes
- Passenger lifts
- Crew lifts
- Dumbwaiters (food lifts)
- Ammunition lifts

The perfectionism of a family business

As a family business, Holland Marine Lifts is small enough to be deeply and earnestly involved in projects. The technical draftsman peeks over the welder's shoulder, and vice versa. With a family business, you often see a bit more of a sense of responsibility. After all, it is our name, and our product.

Our craftsmanship is a solution for maritime architects who do not want to let themselves be limited by existing options and projects in which an extreme environment is a challenge. All our lifts are designed and produced in The Netherlands conform to the international design rules and are tested by different agencies like ABS, BV, DNV, and LRS.

Whether the project is a new build vessel or a refit, we are always ready to discuss our solutions with you.

Holmatro Industrial Equipment B.V.

The Holmatro Group, founded in the Netherlands in 1967, is a leading privately owned global supplier of hydraulic equipment and services. With over 300 employees the Holmatro Group consists of divisions located in the Netherlands, USA and China. From our main headquarters in the Netherlands we serve all customers in Europe, Middle East, Africa, Oceania, East and South East Asia and South America. From our American headquarters we serve all customers in North and Central America. From the headquarters in China we serve all customers in mainland China, Hong Kong and Macau.

Besides our three headquarters our brand is represented in more than 160 countries by our extensive global sales and service network, consisting of more than 400 active authorized business partners. This makes us the single biggest global supplier for innovative high-pressure hydraulic tools.

To support our global headquarters, subsidiaries, representatives and business partners we have centralized Research & Development and Product Management in the Netherlands. Our full-fledged highly automated and state-of-the-art manufacturing facilities are located in the Netherlands and in the USA. Marketing, Sales and Service support is decentralized in the three divisions.

GMCENTER

Hospitainer's mission is to deliver quality healthcare even in the most challenging environments. We offer turn-key medical solutions for emergencies, conflict zones, and remote areas worldwide. Since its start in 1996, Hospitainer has grown into a sustainable social enterprise operating across all continents. We work with a wide variety of clients, differing from Ministries of Health or Defense to international and local non-governmental organizations. Our clinics, housed in containers or tents, are adaptable to various settings, whether mobile, semi-permanent, or integrated into existing infrastructure. We offer ruggedized solutions with furniture, equipment, and consumables suitable for military medicine deployments. Our structures operate independently with water, sanitation, electricity, and climate control facilities. We provide installation training and maintenance services.

Mobile clinics

We provide mobile clinics, housed in containers (on trucks) or tents, to cater to surgical, emergency, dental, maternal, and primary care needs. All solutions can be delivered with consumables and medicines and containers can be finished as STANAG 2920 anti-ballistic units.

Field hospitals

Our mobile field hospitals are comprehensive tertiary facilities, modular and scalable to accommodate partners' requirements. The field hospital can contain a multitude of beds (20-200) and can be set up in 12 hours (50 beds). With customizable configurations, they support Role 1, 2B/E, and 3 military medicine provision.

Isolation and testing centers

For epidemic outbreaks like Ebola or COVID-19, we offer tailored isolation and testing centers in tents or containers.

Medical evacuation

We provide medical evacuation solutions for military contexts across all terrains.

Huisman Equipment BV

Huisman, founded in 1929, is a worldwide operating company delivering step changing technical solutions to world's leading companies in the oil & gas, renewables, leisure, civil and defence industries. Products range: Cranes, Pipelay Equipment, Drilling Equipment, Winches, Vessel Designs and Special Projects.

Reliable Partner

Due to our strong belief in partnerships with our clients, our commitment to finding new technical solutions and our dedication to delivering turnkey projects, we are internationally valued as a solid, reliable partner.

Turnkey Delivery

Our in-house design and engineering expertise, in combination with our production, testing, commissioning and installation facilities, enable us to deliver custom-designed equipment on a turnkey basis.

Innovative Solutions

We are constantly working on new solutions and systems which we believe add value to the market's existing technologies. Our internal disciplines include Mechanical, Structural, Naval, Hydraulical, Electrical and Software Engineering.

Submarines:

- Pressure hull segments for submarines and joining of the segments.
- Sub frames with the option to full assembly of the installation.
- Final assembly and launching in Schiedam the Netherlands.

Surface Ships:

- Heave compensated cranes
- Special full electric and torque controlled winches
- Maintenance and upgrades of the submarine during its lifetime.
- Own harbour including all facilities to assemble submarines and its equipment.
- Engineering and securing knowledge during the lifetime of the submarine.
- Special complex constructions / frames including assembly of the hydraulic & electric systems

Hull Vane B.V.

Hull Vane BV is specialised in improving ships' performance with hydrodynamic devices. The company is the sole licensed producer of the patented Hull Vane®, a submerged wing at the transom to improve the performance and seakeeping of displacement ships, and Foil Assist, a mid-ship mounted foil to improve the efficiency and ride comfort on fast planing boats.

Our conviction We master hydrodynamics and we believe ships can always be better, faster and more efficient. We ensure maximum pitch stabilisation, performance and efficiency for vessels.

Product Hull Vane® is a proven energy saving and seakeeping device for patrol vessels, corvettes, frigates, mine countermeasure vessels, unmanned surface ships and support ships. Each Hull Vane® is optimised for a ship to achieve the highest level of performance.

Main benefits:

- Higher top speed & higher range speed
- Reduced fuel consumption and CO₂ emissions (5-26%)
- Improved seakeeping
- Reduced noise and signature
- Less generated waves

An active version of the Hull Vane®, called Dynamic Hull Vane®, is controllable to reduce ship motions in waves even more, providing a more stable platform for helicopter or drone operations, radars, weapon systems and launch & recovery of daughter craft. Foil Assist is applied on planing boats, such as naval interceptor craft, RHIBs, police boats, customs boats, etc. In essence, it's a small wing mounted amidships under a boat's hull, which carries up to 50% of the weight at maximum speed.

Main benefits:

- Reduced pitching and slamming
- Improved safety – less injuries
- Higher sustained speed in waves

Proven results Over 70 Hull Vanes have now been sold and the concept is more than proven with before and after trials and intensive use over many years. Eleven Foil Assist systems have been built.

Hyllus Systems B.V.

Hyllus Systems is a defence company located in Enschede, Netherlands. Hyllus Systems is a company comprised of subject specialists – including former military personnel of several NATO members. Our selective engagement and communication with relevant senior government/defence officials and industry specialists – have granted us insight and expertise in the chemical, automotive, and aerospace sectors, with a particular focus on additive manufacturing. We are proud to support the EU's Defence Industry, working with Dutch partners in both the public and private sectors.

Our Mission

We are committed to providing pragmatic and scalable drone solutions designed for the realities of modern warfare. We understand that complex problems require custom solutions. Our commitment to strategic autonomy leads us to work with local suppliers and experts in the European Union.

What We Do

- Unmanned Aerial Systems (UAS): We specialize in manufacturing UAS.
- Expansion: We aim to expand our operations into Electronic Warfare (EW) systems, Unmanned Maritime Systems (UMS), Long-Range Loitering Munitions, and other emerging technologies.
- Additive Manufacturing: We utilize cutting-edge additive manufacturing techniques to print in-house designed frames with modular applications.
- Rapid Production: We integrate front-line feedback to ensure that it only takes six weeks from product ideation to mass production.
- Modular Design: Our UAS come in kits for ease of transportation, with ground assembly in just 60 seconds.

Hyperion Technologies B.V.

AAC Hyperion, part of AAC Clyde Space AB, is a Delft, NL based company that specialises in high performance nanosatellite components and is renowned for their reliable attitude and orbit control technologies and innovative laser communications.

AAC Hyperion offers a full range of high-performance sensors for attitude determination, advanced attitude control solutions, integrated ADCS, navigation components, payload processing units and laser communications solutions for nanosatellites. AAC Hyperion's Star Tracker holds the title as the world's smallest and is among the most popular products in their catalogue.

AAC Hyperion follows the philosophy to provide the best-in-class products to its clients worldwide, scratching at the limits of the physically possible within the scope of miniaturisation. High robustness, reliability and extensive testing are the leading principles.

Their commercially focused solutions have demonstrated impressive capabilities in space stretching across a wide range of customer applications. AAC Hyperion has a strong track record in the market, with government, commercial, and educational organisations around the world, their small satellite subsystem range offers excellent functionality with unparalleled support for seamless integration, bringing clients back for multiple projects.

Idetrading Electronics BV

Specialist with commitment

Brandsma BV is a specialized supplier of electrical cable related products, with a market focus on the Benelux. Commitment, both towards customers and suppliers, is a keyword in our organization. This implies not only going further, running harder, for our customers. It means that we work close together with a selected number of leading manufacturers who's quality standards are beyond any doubt. Resulting in Brandsma being a truly specialists as well as an 'extension' of both customers and suppliers.

Started in 1985 as first Raychem distributor in the Benelux, our approach made us a trustworthy partner for passive electro technical connecting products. We are a supplier for companies like Alstom, ASML, DAF, Dutch Defence, Stork and many others, such as the service industry. Customers are often active in cable-assemblies, medical electronics, defence, aviation, engine building and MRO. Our commitment to our suppliers has led to a partnership/franchise with Federal Mogul (Systems Protection Group), Panduit (Electrical Group), Tyco Electronics (GIC) and Zero Cases. Changes since 2006 enabled our move to Eersel, ISO 9001:2000 certification and increase of our sales department.

Brandsma's capabilities reach far beyond customization and kitting of products. Our specialism enables customers to benefit from our knowledge during design, prototyping and investigation of total cost of ownership. This knowledge combined with our independence allows us to offer the right solution for the job, which is more than a sole manufacturer can offer. More flexible than any sole manufacturer can offer and more specialized than a pure logistically oriented wholesaler. Furthermore Brandsma performs complete assembly and update of electronic devices for industrial and military applications. Our knowledge and experience makes for a fruitful cooperation before and during projects, resulting in cost effective solutions for (customer) design faults and other problems that need attention during complex projects. Brandsma has built a great track record in military assembly and update projects.

I.E.S. Asset Management B.V.

Our expertise in implementing asset management allows us to guide clients in optimizing their added value. This includes both tangible benefits such as financial and operational excellence, as well as intangible benefits such as improving their reputation, considering the environment, and promoting sustainability. We believe that by working together, we can create a better world.

SENGINEERING

We take pride in being engineers who specialize in asset management, but with a unique perspective that recognizes that asset management is much more than just applying technical skills and tools. We believe in the power of people behind technology, in the human dimension in organizations. That is why we call our engineers, sengineers and our working method sengineering. By giving trust, responsibility and space, employees grow and the results of the organisation rise structurally.

The defence industry specific

Beside implementing asset management and asset management education, we are active in the defence industry to support organisation with ILS. This in combination with reliability engineering supported by reliability block diagram, FTA and system engineering knowledge.

IHC Merwede Holding B.V.

We support your mission. IHC Defence is a reliable partner to its customers, not only in The Netherlands, but also globally for the design, build and maintenance of navy vessels, delivering equipment and accessories.

Based on the experience of Royal IHC - gained since 1642- IHC Defence offers solutions and support for the full life cycle of navy vessels, encompassing:

- Research and Development
- Design and Engineering
- Production
- Equipment
- Services (ISS/ILS)

All of Royal IHC's industry-related knowledge and capabilities are brought together within IHC Defence, including the ability to deliver on specification, budget and in time. The necessary infrastructure and IT-related requirements also guarantee the highest degree of confidentiality. We work to the highest safety and security standards, ensuring the protection of your personnel, assets and operations.

Naval operators benefit from seamless integration of proven cost-effective technology with military specifications. This approach ensures you receive unrivalled operational performance improvements while maintaining a balanced total cost of ownership. Operate with fewer personnel, maximise uptime and availability, enhance overall performance, and undertake more missions, thanks to our robust project management capabilities and cutting-edge processes.

Improve operational efficiency, and a more sustainable performance

IHC Defence is part of Royal IHC, a leading designer, builder and supplier of integrated vessels, equipment and services to customers in the dredging, offshore, mining and defence industries. We deliver reliable solutions that improve operational efficiency and allow for a more sustainable performance. As we navigate new waters, our aim remains unchanged: to discover the smartest and safest way forward for both our customers and our people.

ILIAS A&D B.V.

ILIAS Solutions delivers a management software suite to support military commanders in doing more with less. A true force multiplier.

The platform covers the entire armed forces value chain. It aligns operations and training with maintenance, supply and procurement. The platform provides the means to assure effective execution of processes, captures key information and enables military commanders to manage their defense capability in accordance with the doctrine and within the constraints of their budgets.

From the start, a tri-service comprehensive solution was the basic requirement. The platform is designed as one consistently integrated solution, which retains the flexibility to match the specific requirements of our military customers. This way, we complement their current ICT landscape with our defense specific functionality.

Depending on the situation, we start with Fleet Management capability for an initial weapon system or Depot Level Maintenance, with the potential to grow to Total Asset Visibility for the full force over time. We have a compelling mix of IT and military SMEs to implement and support meaningful solutions. All our clients have the same code although we fulfill a wide variety of use cases.

Our platform is the result of 25 years of consistent focus on defense. We have harnessed know-how that can be turned directly into value for our customers. Our approach encompasses best-practices, ensuring low implementation cost, time and risk.

ILIAS Solutions is ISO 9001 certified. and complies with the requirements of the Cyber Essentials Scheme and Cyber Essentials certified.

InterDam B.V.

InterDam: Blast, fire and shock protective solutions to protect personnel and equipment.

InterDam Naval & Military our expertise and focus InterDam has developed blast, fire and shock resistant products for the defence industry focusing on Navy ships as well as onshore bases. Our fire, blast and shock protective products protect personnel and equipment, preventing the escalation of events following weapon impact and subsequent fire or impact damage. We continuously invest in R&D to improve our existing products and to develop new innovative products based on the needs of defence organisations worldwide.

Products Explosion-resistant, shock resistant, watertight and fire-rated hinged and sliding doors for the Naval defence industry. Our products are an important element in Resilient Ship Design and Ship Survivability.

- Explosion resistant (7 bar) and fire-rated hinged and sliding doors for Army, Air and Naval bases

InterDam, strengths and USP's:

- Solid partnership and cooperation with professional bodies and knowledge centres
- A mature R&D department and focus on continuous product development
- The ability to invent and innovate practical solutions, combining our R&D, engineering, manufacturing and installation capabilities
- ISO 9001, ISO 14001 and OHSAS 18001 certified
- Cyber Essentials Plus certification and compliance with cyber security standards of multiple defence organisations worldwide
- Qualification, test and certification
- Comprehensive management and control of all stages from design, engineering, and manufacturing to installation or supervision on-site or at the yard.
- Proven track record of delivering quality products and solutions to the world's most demanding customers across multiple industries
- In business for over 110 years

Intergraph Benelux B.V. (HEXAGON)

Who is Hexagon?

Hexagon is a global leader in digital reality solutions, focusing on the integration of advanced sensor, software, and autonomous technologies.

Why Choose Hexagon?

Hexagon's solutions are crafted to empower defence & security integrators and OEMs, whether they are large-scale companies or emerging start-ups.

These solutions ultimately benefit national and supranational organizations in defence and public safety, helping them accomplish their missions effectively and efficiently.

Intronics

Intronics is a distributor specialised in the development and supply of connectivity solutions for information and data supplies, retail and electronics. These connectivity solutions represent various kinds of connections; from the traditional connection as the cable or the connector to the connections between KVM or digital signage applications. Intronics' complete program is built from these (basic) connections and accessories.

Besides supplying standard stock products, we create customer specific solutions. We focus on the wishes and demands of our customers. Communication and cooperation with these customers are the factors to come to a successful result. Intronics has offices throughout Europe; besides the main office in Barneveld and an office in Belgium, there are more foreign sales offices. This makes Intronics a suitable business partner in the international market.

Membership TKH Group

Since 1999 Intronics is a member of the TKH Group N.V. The TKH Group is listed on the Euronext stock exchange in Amsterdam.

ISISpace Group - Innovative Solutions In Space B.V.

ISISPACE is a vertically integrated small satellite company, focused on providing highly value, cost effective space solutions by making use of the latest innovative technologies. As one of Europe's leaders in the nanosatellite domain, ISIS offers contract research, innovative satellite systems, turnkey space solutions and satellite-as-a-service to a broad range of customers for small satellite applications such as remote sensing, ESM and telecommunications.

Based in the Netherlands, ISISPACE employs over 120 specialist employees, all of which have a background in space technology and engineering, and operates from different sites in Delft, Germany, Australia, Sweden and South Africa.

The company's core competencies lie in the application of space systems engineering in combination with an expertise in the following technical areas: radiofrequency systems and payloads, deployable systems and hold-down and release mechanisms, attitude determination systems, and embedded systems.

ISISPACE offers engineering services, and small satellite equipment, but its core competence lies in the provision of turnkey solutions and services based on small satellites to its customers. This includes science missions, commercial missions as well as defence and security missions, where ISISPACE implements small satellite infrastructure (including launch, operations, training, ground segment) for various military organisations.

Next to project/mission based space infrastructure implementation ISISPACE also offers its capabilities in a small-satellite-as-a-service model, in which dedicated space infrastructure is implemented and operated on behalf of the customer, allowing the customers to avoid lengthy investment project acquisition processes and working off of a monthly fee for the data provided or telecom capacity provided to the end-user.

KLM Engineering & Maintenance (KLM E&M)

KLM Engineering & Maintenance (KLM E&M) is the maintenance division of KLM, with its main base located at Amsterdam Schiphol. Together with Air France Industries (AFI), it is an integral part of Air France Industries KLM Engineering & Maintenance (AFI KLM E&M), a world-leading multi-product MRO (Maintenance Repair & Overhaul) provider in the aircraft maintenance industry. AFI KLM E&M's global network offers tailored, fast-turnaround and cost-effective services.

With a workforce of over 12,800, AFI KLM E&M offers comprehensive technical support for airlines, ranging from engineering and line maintenance to engine overhaul, aero structure and more. AFI KLM E&M supports almost 2,800 aircraft operated by 200 major international and domestic airlines. One of the key strengths is its ability to mobilize its global MRO network and expertise to meet the specific needs of defense organizations. This includes technology advancements, safety measures, compliance with regulatory requirements, and rapid response capabilities. AFI KLM E&M understands the critical nature of defense operations and ensures that its solutions are designed to enhance the readiness, efficiency, and effectiveness of military fleet. The adaptive defense solutions of AFI KLM E&M covers a wide range of services, including aircraft maintenance, engine and component support, logistics and supply chain management, fleet management, and technical training. AFI KLM E&M leverages its experience in maintaining commercial aircraft to provide high-quality maintenance services for military aircraft, ensuring they are mission-ready at all times. Moreover, AFI KLM E&M has formed long-standing partnerships with several defense organizations, including the French and Dutch air forces. Additionally, the company has been entrusted with providing dedicated support for the Airbus A330MRTT used by the Australian, French, and NATO air forces, as well as specialized support for the E3 AWACS fleet for the French and NATO air forces. AFI KLM E&M is committed to delivering innovative and cost-effective defense solutions that enhance the operational capabilities of military and government fleet. With its global network, expertise, and track record, the division is well-positioned to meet the evolving needs of defense organizations and contribute to their mission success.

KMWE Group

KMWE Group is a leading supplier and partner for the High Tech Equipment- and Aerospace Industry with worldwide 880 employees. The Aerospace division of KMWE Group offers manufacturing of structures and complex fabrications for Aerospace customers, while being supplier and partner to global leading world class OEMs within the Aerospace such as Airbus, Boeing, Lockheed Martin, GKN, Collins, General Electric, Rolls-Royce, Pratt & Whitney and Safran. Within Aerospace & Defense KMWE Group's portfolio ranges from single part manufacturing to complex, 'ready to install' (sub-) assemblies for aerostructures and aero engines. Core capabilities are automated high performance machining, assembly, sheet metal fabrication, thermal spray and additive manufacturing, with materials ranging from aluminum through super-alloys. We additionally offer value engineering for best value solutions. Moreover our in-house special processes and capabilities allow us to offer a 'one stop shop' capability.

Aerospace products

- Aerostructures, e.g.: ribs, brackets, beams, panels, etc.
- Aero engine parts, e.g.: nozzle flaps & seals, casings, frames, etc.
- Aircraft Systems, e.g.: parts for landing gear, environmental control system parts & assemblies

Capabilities

- High performance & automated machining
- One-stop-shop capability for fabrications
- Cutting | Forming | Welding | Heat Treatment & Brazing
- Assembly
- Thermal Spray | Additive Manufacturing
- Non Destructive Testing | Material laboratory
- Value engineering

KMWE Aerospace has relocated in 2024 to the Brainport Industries Campus in Eindhoven, where you will now find all production facilities under one roof. KMWE also has facilities in Malaysia and China. KMWE Group as a whole is AS9100 certified as well as Nadcap certified for its NDT and special processes.

KPN

KPN helps to make society safer by ensuring that everyone gets connected when every second counts. Safety is part of our DNA. We connect and enable operators in the defense and public safety domain with cutting-edge products and tailored services. Robust, scalable and innovative solutions are at the core of our partnerships with clients. We deliver 24-hour performance and security in a domain that requires adaptivity through connectivity. Our mission is to enable our clients with the digital solutions that are necessary to act in any scenario. Our expertise includes end-to-end control of designing, installing, managing and maintaining vital communication systems under all circumstances.

KPN Defense & National Security is a division of KPN, the #1 supplier of telecommunications, cyber security and ICT services in the Netherlands one of the most sustainable telecom companies in the world. Being a Dutch company, KPN is unique in the connectivity sector in the Netherlands. With over 150 employees, KPN Defense & National Security combines dedicated customer focus and flexibility with the scope and expertise of the KPN Group. Our extensive knowledge of and experience with communication-, Cloud- and cyber security solutions in fast changing and demanding environments, allows KPN to operate as a trusted partner of government organizations and (inter)national enterprises. Through our continuous drive for innovation we deliver future-proof technology, end-to-end solutions and services that enables defense and security organizations to adapt to current and future challenges and guarantee continuity.

Kuyer Metaalwerken B.V.

At Kuyer we commit ourselves to delivering the highest possible quality in the field of metal engineering. We are innovative, flexible and quality-conscious and we work with high-end partners in mechanical engineering and the industrial field. We specialize ourselves in certified work. Our production site is more than 8.000 square metres, with over 80 employees.

Our services

We deliver on customer specs and machines in measurements from 10 to 6000 milimeters. Our skillful employees are experts in one-off, small and large-scale productions. We operate in the Netherlands (70%), in Germany (20%) and in Belgium (10%). Because of our continuous innovation we are a preferred partner for companies that demand high-end quality and pioneering.

Our clients

We create an environment of cocreation with our clients. Our highly trained staff is equipped to adapt to each challenge and find a solution that fits your standards. Our clients are state of the art, for example: Rheinmetall, Defenture, Krauss-Maffei Wegmann, Weber Hydraulik and Dutch Railways.

Quality

We offer strict and high-quality guarantees, with our certifications as proof. We carry out some certifications as one of the few in the Netherlands. We follow ISO9001 and EN1090 and work according to the welding standards of (Dutch) Defense (ISO3843 and DIN2303) and Rail (ISO3834 and EN15085). Our work also complies with the American welding norm ASME.

Quality in our processes

We add all applicable standards into our ERP-system, so every employee has the right information to work with. Our quality manager oversees the entire process and does regular internal audits on both project- and process level. This approach results in a reject rate of only 1.4%. All our employees follow (re)training frequently to maintain their skills. Every employee of the welding shop is certified.

Kyndryl Nederland B.V.

Kyndryl is a \$19.4B technology services company with 90,000 highly skilled practitioners worldwide, with deep expertise in mission-critical digital environments and the skills, IP and tools to drive continuous innovation at scale that the world depends on every day. The separation of Kyndryl from IBM has gained a new freedom to reshape our strategy in ways favorable to our long-term development. Kyndryl's name comes from two words that are important to our identity. It is derived from the word kinship, referencing the belief that people are at the center of everything the company does, and that relationships are built and nurtured over time. "Dryl" is derived from tendril, which brings to mind the notion of continued growth and that –together with our customers - we are continually advancing human progress. Kyndryl empowered teams, being close to our customers and with a broad range of partners, are able to anticipate and agilely respond to your needs.

As a World leading organization, we are committed to the health and continuous improvement of the vital systems at the heart of the digital economy. With our partners and thousands of customers, we co-create solutions to help enterprises reach their peak digital performance. Our ability is to invest in capabilities across technology stacks — with a broad ecosystem of partners — allowing us to engage in the transformational services market, doubling the size of our market opportunity. We support our customers objectives by innovating at scale with a strong foundation in applied data, automation, and operational AI – and new investments in 5G, edge, cloud, security and resilience to help and improve the customer and employee experience, accelerate time to value, improve resiliency, reduce risk and increase efficiency. Our highly skilled practitioners are dedicated, passionate professionals who understand the current environments, are continuously upskilling, with the flexibility to integrate a broad range of technologies to support today's heterogeneous environments. Kyndryl has already announced strategic partnerships with Microsoft, VMware, SAP and Google and others and we are pivoting to participate more fully in a broader ecosystem and invest in transformation services that are aligned to customers' digital journeys (cloud, data, security, and intelligent automation).

Lamers Tooling B.V.

Your AS9100 certified supplier for Tooling and Parts

We make technical ideas real.

Machined Parts/Components, single or series?

But precise, complex or special materials?

Export military goods?

Efficient production?

Aerospace domain?

Assembly parts?

We Make it!

That's fine!

we are experienced with that!

5-axe robotized machining!

Fine, AS9100 certified!

Sure!

Lamers Tooling B.V. is a family company (2nd+3th gen.) and precise machining is what we do the most. With our team and modern automated machinery. Long term experience with special Tools like injection moulds for plastic/aluminium or fixtures for handling, assembly, control or machining.

Our own developed, designed and produced Press Moulds for UHMW-PE ballistic military helmets we export worldwide.

Precise machined parts for High-tech Industry (like semicon) , Defence Industry (like camera housings) and the Aerospace Domain.

Looking forward in new cooperation's!

LenGo Nederland BV

LenGo Netherlands is part of the LenGo Automotive Group. We currently employ approximately 1.700 people in three countries: The Netherlands, Poland and Russia. In all these countries, we aim to provide a total services package for the commercial vehicle branch. DAF is our number one brand, followed by GINAF, Fiat Professional, IVECO, Kögel en Kässbohrer.

LenGo Automotive Group has an extremely broad service network with modern and well-equipped workshops. Service and customer approach are our trademarks. Despite our impressive growth, LenGo is still very much a family firm, where employees and customers feel at home. LenGo Nederland has 8 branches in the south of the Netherlands. More than 100 well trained and professional mechanics can offer a round the clock service on many vehicles. We are famous for the personal approach combined with expertise and service for over more than 60 years.

Your partner for the Department of Defense

Beside the total services package for the commercial vehicle branch LenGo Nederland is also specialized in the maintenance of military vehicles. For example trucks, trailers, crash tenders, fuel tank vehicles, pomp trucks and all-terrain vehicles. The overhaul of (automatic) transmissions and power trains is one of our specialties. Through our experience in Afghanistan, we can offer services in mission areas with our own crew.

With our department LenGo Truckparts we can offer you a wide variety of truck parts. LenGo Truckparts is specialized in used DAF parts.

For more information about the LenGo Automotive Group please check the website: www.lengoautomotivegroup.com.

Lentink Metaalwarenfabriek B.V.

Lentink, founded in 1958, is known for its specialization in the metal industry as a supplier of small and large deep-drawing products. Parts can be made under one of their twenty-four automated small (60Tons) and big (700Tons) Müller Weingarten presses. The production site is more than 320.000 ft², with over 115 employees. Lentink is well known as one of the largest and most innovative companies in the sheet steel metal processing industry in the Netherlands. The most common sheet steel press operations, such as deep drawing, cutting, punch nibbling and bending, are part of their daily activities. The same goes for their press brakes, laser cutters, powder coat paint lines and assembly lines. The concept of “continuous improvement” is ingrained in the employees and quality processes.

Preferred supplier of:

The energy sector, Consumer products, Industry, Agriculture, Sanitary, Automotive, Fire protection, Food, Transport and Green facilities industry. Their goal: SMART-realizing customer wishes, with a guaranteed high product quality.

Quality standard

They work in accordance with ISO 9001, 14001 and Ecovadis (CRS /ISO26000)

Processes

Processable materials: steel (incl. alloys), stainless steel, aluminium, titanium, copper, brass etc.

Material thickness in the range of 0.3mm to 12mm material. Engineering and development of products, transfer and progressive tools, moulds, production equipment and machines. In house tool department and long-term collaborative with high Tech toolmaker companies.

LiveDrop B.V.

Enabling Secure Data Transfer Solutions in RF-Denied Environments

LiveDrop is a deep-tech company revolutionizing secure communication through a patented offline data transmission protocol. Designed for mission-critical environments, our technology enables data exchange and interoperability without the use of radio frequencies, ensuring operations remain undetectable, unjammable, and uncompromised. At the heart of LiveDrop is a line-of-sight protocol that transmits encrypted data via dynamic visual signals. Using standard displays and cameras, LiveDrop transforms any screen into a secure data transmitter and any camera into a receiver, completely air-gapped and invisible to traditional spectrum detection tools. This makes LiveDrop uniquely suited for defense forces operating in high-risk, spectrum-denied, or compromised environments. LiveDrop enables secure data exchange between individuals, systems, and devices, without emitting RF signals. For example, it can securely transmit mission-critical information from a command center to a field unit, or enable communication between drones and ground teams, all while minimizing electronic signature exposure.

Why It Matters Modern MDO warfare demands secure, resilient, interoperable and silent communication. RF protocols can be intercepted, jammed, or spoofed, creating critical vulnerabilities on the battlefield. LiveDrop provides a stealth alternative:

- Undetectable in the spectrum
- Platform- and hardware-agnostic
- Unidirectional and fully air-gapped
- Cross-platform communication without digital handshakes
- Works on Windows, Android, and iOS
- Impossible to jam or spoof

Beyond Innovation—Operational Simplicity LiveDrop offers intuitive software that requires minimal training and integrates seamlessly into existing workflows. It enables secure communication without requiring connectivity, Bluetooth, Wi-Fi, Satcom, 4/5G or physical contact. Our solution has been validated in collaboration with strategic partners across defense and security sectors. We are actively supporting NATO-aligned initiatives and working with specialized units to scale LiveDrop's operational impact.

Lloyd's Register EMEA

Who we are

Lloyd's Register started out in 1760 as a marine classification society. Today, we're one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructures for clients in over 75 countries worldwide. The profits we generate fund the Lloyd's Register Foundation, a charity which supports engineering-related research, education and public engagement around everything we do.

Our approach

In a world of increasing complexity – overloaded with data and opinion – we know that our clients need more than technology to succeed. They need an experienced hand. A partner to listen, cut through the noise and focus on what really matters to them and their customers. Our engineers and technical experts are dedicated to assurance. That means a commitment to embracing new technology and a deep rooted desire to drive better performance. So we consider our customer's needs with diligence and empathy, then use our expertise and over 250 years' experience to deliver the smart solution for everyone. After all, there are some things technology can't replace.

Louwers Mechanical Parts B.V.

Louwers Mechanical Parts B.V. is a company that was established in 1946 (Mierlo, North Brabant) and specializes in the creation of high-class mechatronic components, spare parts, and modules for specialty markets. We are a serious supplier to business enterprises that manufacture in chemical, petrochemical, semiconductor, medical, food, glass processing, and motor industries. Our highly advanced, completely climate-controlled facility has a huge and modern machine park, which enables us to perform a wide range of mechanical operations in one building. We specialize in precision machining, including CNC turning and milling, and are experienced at machining ferrous and non-ferrous materials, including exotic alloys like Inconel, Hastelloy, and Monel. We constantly invest in new people, technologies, and resources at Louwers. Our extensive knowledge of materials and our skilled craftsmanship allow us to also provide additional services like laser welding, TIG welding, soldering, hardening, and stress-relief annealing. On top of that, we provide quality control procedures like chemical resistance testing and 3D measurement and provide cleaning and packaging services from our cleanroom facility. Our team of very committed and multidisciplinary experienced professionals and young ambitious players promises each project to be produced to the top. This combination together generates innovative ideas and a solid core of knowledge and expertise. With over 75 years of history and a commitment to excellence, Louwers Mechanical Parts B.V. is a trustworthy partner in the supply chain of high-quality machines and processes. Louwers Mechanical Parts B.V. serves a large number of clients operating in the following industries:

- Semiconductor industry
- Analytics industry
- Medical industry
- Chemical and petrochemical industries
- Aviation and aerospace industries
- Optical industry
- Food industry
- Defense

Top Notch Machines We are willing to invest and innovate with our clients to facilitate the production process. **High Quality** Quality assurance operations include testing the chemical resistance of metals, determining what cutting speeds to use and how to increase the abrasion-resistance of certain types of metals, as well as the careful treatment of various liquids. **Platform** PVS, NMC, NGP **Certificates** ISO 9001:2015 | Iso 14001:2015 (in process)

Machinefabriek Emmen B.V.

The Trusteel Group's ambition is to become the major player at the top of the Dutch manufacturing industry. We want to strengthen our position in a number of growth markets and conquer new markets, operating increasingly outside the Netherlands. We aim to accomplish this by providing outstanding construction support and engineering, by using smart and sustainable solutions and by improving our marketing. We also aim to intensify collaboration between our group's eight divisions. By taking advantage of economies of scale and pooled knowledge, we can better serve our customers with appropriate, sustainable solutions. Jointly, we can oversee the entire chain, from the concept through to completion, and thereby give our customers total peace of mind. And by continuing to invest in innovation and digitalisation, we are also able to keep pace with customers' changing requirements.

Sustainable enterprise remains a key topic within the Trusteel Group, and we endeavour to meet the needs of our customers with solutions that minimise impact on the environment and on society. We do this by developing sustainable solutions for industries like the recycling industry, using smart technologies and building circularly with steel. Making our own operations more sustainable also plays an important role. We configure our business processes as efficiently as possible and actively work to reduce our own CO2 emissions. We generate renewable energy using solar panels and promote the reuse of buildings, products, materials and raw materials. This ensures that we minimise our environmental footprint and can continue to successfully build a future-proof living environment.

Machinefabriek Geurtsen Deventer B.V.

Since 1926, Machinefabriek Geurtsen has been a reliable partner for the development and production of high-quality technical components. With a team of over 140 specialized technicians, we manufacture and assemble complex parts and modules for various manufacturers in the defense industry. We manage the entire process, from the realization of the first prototype to scaling up to full series production.

Geurtsen as your production partner As a high-tech one-stop partner, Geurtsen supplies various manufacturers in the defense industry with serial production of modules in accordance with specified quality requirements. We are able to deliver this added value because all required expertise is housed under one roof including mechanical engineering, software engineering, manufacturing, assembly, and functional testing of complete systems.

Areas of expertise At Geurtsen, we produce components with a continuous focus on quality, reliability, and precision. Our expertise includes:

- Process control
- Ensuring a stable and well managed production process, guided by experienced project managers and production engineers.
- Production engineering
- Optimizing manufacturability, minimizing risks, and developing test setups and tooling for functional validation.
- Manufacturing
- Applying advanced technologies such as CNC milling, CNC turning, and certified welding.
- Assembly and testing
- Precisely assembled systems, tested for full functional performance.
- Quality and reliability

All our components and systems comply with applicable technical and functional standards and are delivered with the required certifications and documentation.

MARI Technology Holland B.V.

MARI Technology Holland is gespecialiseerd in trillings- en schokisolatie voor de maritieme defensie-industrie. MARI ontwikkelt innovatieve klantspecifieke isolatieoplossingen voor veeleisende en complexe toepassingen. Met een ervaren team van defensiespecialisten en engineers realiseert MARI maatwerkoplossingen die voldoen aan de strenge eisen van maritieme defensietoepassingen.

MARI beschikt daarnaast over een uitgebreid portfolio met schokveren, trillingsdempers en componenten die systemen aan boord beschermen tegen schokken en trillingen, waardoor de operationele betrouwbaarheid van kritische apparatuur gewaarborgd blijft.

Door voortdurende innovatie en nauwe samenwerking met MoD's, system integrators en partners levert MARI hoogwaardige, betrouwbare en duurzame oplossingen, producten en dienstverlening binnen de maritieme defensie-industrie.

MARIN

Those operating in an environment that's as dynamic as the sea itself need access to expert knowledge and independent research. Maritime research institute MARIN is a provider of advanced hydrodynamic and nautical expertise to the international maritime and offshore industry and governments. We do this based on the latest calculation and testing facilities, full-scale measurement and simulators, and by working together with our extensive innovation and research network. All this accumulated expertise helps us to realise our goal: the development of cleaner, safer and smarter ships and maritime constructions. Founded in 1932, MARIN (Maritime Research Institute Netherlands) is based in Wageningen and employs a staff of 370. MARIN, challenging wind and waves.

Marshall Aerospace Netherlands

Marshall Aerospace Netherlands BV is a division of Marshall Aerospace, Cambridge, United Kingdom.

Marshall Aerospace is the UK's leading independent aerospace contractor with a worldwide reputation for engineering excellence. Decades of experience in aircraft design, manufacture, maintenance, conversion, modification and logistic support are firmly backed up by a dedicated team of over 1,500 highly trained personnel and an exceptional range of facilities housed in 1.2 million square feet of hangar space.

Marshall Aerospace has all the capabilities of an OEM covering all aspects of military, commercial and corporate aircraft support. Operating in these areas, the breadth of expertise and experience of Marshall Aerospace allows the company to work on a large variety of aircraft types and projects, whilst also remaining flexible to fulfil the requirements of any customer at any time and location. Marshall Aerospace has a world wide customer base and whilst much of the Company activity centres at its Cambridge facilities, in recent years Marshall continues to expand its operations and locations of support around the world.

Marshall Aerospace Netherlands BV is part of this continued expansion of Marshall, being a Design Office thereby extending the capabilities of the Cambridge Aircraft Design Office and being an approved EASA Design Subcontractor. Marshall Aerospace holds EASA and UK Ministry of Defence Approvals, including EASA Part 21G and Part 21J.

Masévon Technology B.V.

Masévon Group is a leading developer and producer of advanced high-tech systems, based in Hardenberg, the Netherlands. The company serves top-tier international markets, managing the entire production process from development to manufacturing.

This is made possible by the unique combination of five complementary companies: Masévon Technology, Masévon Advanced Systems, Haarhus Advanced Constructions, Tuin Mechanical Parts, and Vernooij Vacuum Engineering.

Masévon Group offers a wide range of services, including system development, system integration, vacuum technology, machining, welding and cleanliness solutions. These services are supported by state-of-the-art facilities, such as high-quality grey -and cleanrooms, advanced machining and welding departments. Our expertise spans various industries, including Semiconductor, thin film coating, Defense, Big science, and medical technology.

At Masévon, we believe in the power of collaboration. Our employees are passionate about technology, creative problem-solving, and hands-on approaches. We foster a culture of continuous learning and discovery, where multidisciplinary teams work together to develop customer solutions.

Our core values of reliability, transparency, and integrity contribute to a dynamic and no-nonsense work environment.

Masévon's mission is to make complex challenges simple and manageable by leveraging technological knowledge and expertise. We aim to be a market leader in system development and integration, with a focus on customer satisfaction and sustainable growth. By combining our strengths and expertise, we seek to support businesses worldwide in achieving their strategic goals.

Masterpiece Technologies B.V.

Masterpiece Technologies BV, headquartered in Noordwijk, is a leader in providing specialized engineering and manufacturing solutions across various industries such as aerospace, defense, RF communication, and semiconductor. With decades of experience, we partner with top-tier defense and military companies to deliver high-quality components that meet the industry's most stringent standards.

Commitment to Excellence: Our mission is to provide innovative technology, quality solutions, and exceptional service. From initial concept through to mass production, we combine our multidisciplinary expertise to deliver efficient and cost-effective results that keep our clients ahead of the competition.

Expert Capabilities: Masterpiece Technologies specializes in the research, development, and production of high-performance components. Our capabilities include:

- **CNC Machined Parts:** Expertly crafted for aerospace, aviation, and defense applications.
- **RF, Microwave, and Antennas:** Advanced RF communication solutions for defense and secure communications.
- **Sapphire Optical Components:** Custom sapphire optics for high-performance defense and aerospace systems.
- **Injection Molding (RIM Technology):** Precision molding for complex components.
- **3D Printing (Plastic & Metal):** Rapid prototyping and production of complex geometries.
- **EDM Wire Cutting:** Precision cutting for intricate parts.
- **Coating & Surface Treatments:** Enhanced durability and performance for all components.

Proven Track Record: Masterpiece Technologies has been supporting the defense industry with precision-engineered components that are integral to mission-critical applications. We understand and comply with all defense-related requirements, ensuring that our products consistently perform at the highest level.

Meilink Borculo B.V.

The Meilink Group specializes in packing and transportation of investment and high value goods throughout the Netherlands and Europe. Packaging of machinery, electronics, production lines, spare parts etc.etc.

Explanation of our core-activities:

- Designing: Custom made packaging of any kind. Often designed by our engineering team.
- Possibility of testing of products and packaging on f.e. shock, drop, vibration, compression, climate or humidity.
- Manufacturing: Wooden, plywood and fibreboard (Tri-Wall) export cases and crates, in all types and sizes and with very short 'Just In Time' delivery if necessary. Also production of re-usable flightcases; production to military specifications
- (Mil-Spec) if needed.
- Packaging: we offer a full contract and export packing service, including container stowing. Packaging can be done in one of our plants or at your site; conditioning against corrosion and all climates and weather influences; Marshalling yard service; all export- and customs documentation;
- Freight forwarding: To complete our scope of services to our customers one of our Cargo Offices can arrange the transportation of packed capital goods regardless of weight and size, by road, sea or air; IATA-Cargo agent. Our comprehensive worldwide network of agents ensures trouble-free door-to-door delivery; also agent for 'sellers-interest' insurance policies.

Mekano B.V.

Mekano Group: Your Partner in Technical Freelance Professionals for Industry

Since 2001, Mekano Group has been the trusted link between freelance technical professionals and industrial companies in the Netherlands and Belgium. With our head office located in Boxtel, we operate throughout the Benelux region.

Engaging independent specialists provides industrial organizations with the agility to meet shifting project and production demands. Mekano Group manages the entire freelance hiring process — from sourcing to invoicing — efficiently, transparently, and in full compliance.

Our services include:

- Targeted recruitment, candidate interviews, and professional profiling
- Comprehensive documentation checks (Chamber of Commerce, insurance, certifications)
- Immediate availability through active talent pools
- Consolidated invoicing
- Full compliance with regulations (including Dutch DBA law)

Our database includes over 5,000 technical freelancers, with more than 350 professionals hired each week. Their expertise spans mechanical and electrical engineering, from machine builders and maintenance technicians to draftsmen, engineers, and project leads.

Mekano Group is built on openness and transparency. We are committed to delivering the perfect match between client and freelancer — efficiently and reliably.

Metal Morphosis B.V.

Metal Morphosis (Metal Morph) builds high-tech metal forming machines for customers worldwide. Metal Morph metal spinning machines can achieve unparalleled accuracy and efficiency for the production of cones and cylindrical parts. Starting from tubes or blanks, from large to small, from steel and aluminum to Inconel and Chrome 42, from thick to thin: Metal Morph machines provide you with extreme high tolerances and superior surface quality.

Smart metal spinning machines

Metal Morph machines are unique in their market for their ability to combine position and force control. This makes our machines self-correcting: always ensuring you of an end product of the desired quality.

Industries:

- The Aerospace & Defense industry
- Food Processing
- Automotive
- Infrastructure & Public Space
- Biotech & Life Sciences
- Agriculture
- Domestic Appliances & Personal Care

As long as conical or cylindrical products of some sort of metal need to be produced, Metal Morph can build the machine to make them!

Metal spinning: a suitable production method for the Aerospace & Defense Industry

- Final product exhibits greater strength than the initial material
- Smooth surface finish
- Adaptability & flexibility to easily produce a variety of different products
- Additional processes can be performed in a single cycle
- Rapid production technique: extremely efficient
- Minimal to no material wastage
- Cost-effective tooling and maintenance
- Reduced energy expenses

Far more cost-effective production method than traditional casting or forging.

Microflow AVISA B.V.

Microflow AVISA delivers highly advanced products and services to the defence & security markets based upon its unique and proprietary concept of Passive Acoustic Distributed Sensing (PADS).

The main capabilities offered include:

- Counter battery target acquisition
 - target acquisition
 - fire control
 - predicting impacts
- Vehicle (crew) survivability
 - small arms fire
 - board weapons
- Ground based short range air defence
 - helicopters
 - drones

Acoustics is a sensor category that is:

- passive
- all weather
- non line of sight
- complementary and synergetic to vision

The hardware platform is universal, allowing sheer firmware based upgrades. Both ground and vehicle hardware platforms are on offer.

Milispec International B.V.

Since 2001, when Milispec International was founded by John van der Hoeven, it is growing as a supplier of speciality oils, lubricants and portable tests and analysing equipment.

With the heart in the Netherlands, Milispec International is proud to supply NATO approved oils, lubricants and analysing equipment across the European Union. In compliance with our corporate values of Quality, Reliability, Innovation and Partnership, our goal is to offer each of our customers the best possible products and service.

QUALITY

Milispec International is a company dedicated to the delivery of quality goods and services. Our products meet the highest standards customary to military use and other severe operating conditions like aerospace and the off shore industry. In order to maintain and guarantee the quality level of our products we only use ISO-accredited laboratories and production facilities. Our portable sampling and analysing kits for fuel and oil quality testing in the field have proven to be durable and easy to use.

RELIABILITY

Doing business with Milispec International means doing business with a reliable partner. Milispec products are key in the proper operation and maintenance of a wide variety of equipment and systems; without these consumables they will eventually fail in their performance.

At Milispec International we understand our customers' dependency on our products and we make sure they are at the right location, at the right time and in the right quantities with complementary training and advice if required.

Milrem Robotics

Milrem Robotics is a leading provider of innovative robotics and autonomous systems solutions for unmanned ground Vehicles (UGVs). The autonomous technology solutions extend the capabilities of the war fighter and serve as a force supplier on the ground while keeping troops at a safe distance.

The unique modular design and specialized mission payloads offer commanders unrivalled optionality on the battlefield. Milrem's unmanned ground vehicles have been delivered to NATO members throughout Europe and North America. The company also complies with the requirements of the Cyber Essentials Scheme.

Milrem Robotics BV

Was established in 2021 and is a unique Robotics center in the Netherlands where development, training, customer support, system engineering, simulation, operational analysis and concept development and experimentation come together in one unique center where countries acquire their knowledge and systems for their RAS (Robotics and Autonomous Systems) development in all aspects. We provide innovative autonomous systems for challenging environments.

Modulen & Engineering Menzing B.V.

Menzing takes ownership of the full process from design to shipment of serially products. We are a partner for leading European companies who need the advantages of a brand identity, a decreased dependency on the supply chain and a process director from design to delivery; a sustainable product design for circular business models. We aim for solutions with a high functional quality, the optimal use of materials and focus on sustainability in development.

We believe in design for rental/lease; design for long-life; we provide TCO strategies and we strongly believe in your brand identity.

Our design thinking approach is extremely hands-on, characterized by efficient, creative sessions with our clients and prototyping throughout the process. All focused on managing the full process from design to delivery. Step in the Menzing Product Launch at any level. Experience your brand identity machines by Menzing, owned by yourself but designed, developed and delivered by Menzing.

Our process of serially produced machines starts already from 50 machines per year. Take advantage of our over 300 worldwide, multi-continent supply-chain partners. Ask our specialists for a meeting to talk about the opportunities for your company.

We create design, prototyping, and assembly tools; we use our worldwide supply chain partners; we realize serially assembly including factory acceptance tests; all within Menzing; all with Menzing as the process director.

We love to work with ambitious companies, from grow-ups to multinationals. Together we realize industrial products with your brand identity. Driven by innovation and with an eye for sustainability and affordability, we deliver high-quality products.

Mogema B.V.

Mogema is a high-tech expert in machining, welding, assembly and vacuum technology, specializing in fully-qualified (ultra) large and accurate machine frames, vacuum chambers and mechatronic (sub) systems. We serve the semiconductor, medical & analytical, oil & gas and defense industries as well as the scientific community with our unique combination of competences. Founded in 1956 and part of Aalberts since 2001, we are based in 't Harde (the Netherlands).

Mogema covers the product lifecycle from engineering to system integration and testing in order to provide a one-stop shop for large machine frames, functional modules and vacuum chambers. Drawing on our profound manufacturing and cleanroom expertise, we can offer our customers a single-source high-level quality buy.

Mogema has specialized in the manufacturing of large vacuum chambers and ultra large machine frames from a variety of (non) ferrous materials. Products up to 8 m x 4 m x 4 m can be machined with exacting tolerances down to 0,01 mm in a climate-controlled environment. Advanced tools are available for deep-hole drilling over a wide range of depths and diameters. Manual as well as robotized welding procedures according to the highest standards, whereas cleanroom integration safeguards that all products and systems meet the cleanliness requirements.

- system design & engineering
- new product industrialization
- accurate machining
- cleanroom integration
- vacuum technology

Munters Netherlands B.V.

Moisture is a main factor in corrosion processes and electronic failures. By lowering the humidity, the corrosion speed can be reduced and in some cases corrosion can even be halted. Electronic equipment will show less electronic failures in a dry environment. Also, a low humidity will prevent fungus, mould and condensation. In the military environment dehumidifiers can be used on active as well as stored equipment. Storage: Maintenance intervals can be lengthened, resulting in considerable savings in main storage costs. The equipment can be deployed immediately, and in some cases even be placed back without additional maintenance activity. Active: The MTBF of equipment is lengthened considerably (vehicles, aircraft, ships, radar systems, communication equipment, etc.). The amount of CND's (Could Not Duplicate) or NFF's (No Fault Found) will decrease. Due to the introduction of COTS electronics, humidity control is a very important factor.

Through its worldwide network, Munters has the international experience to supply dehumidification solutions to Armed Forces. Our reference list is very long: Tracked vehicles (Leopard, Abrams, Leclercq, YPS, Bradley, CV90, etc.), armoured wheeled vehicles (Patria, Fuchs, LAV, etc.), shelter and container systems, Patriot, Hawk, ammunition magazines, ships (of all sizes, from small craft to battleships and submarines), aircraft ('Air Force One', P-3C Orion, C-130 Hercules, F-27 Maritime, NATO E-3A AWACS, EP-3E ARIES II, Tornado, F-4, F-16, F-18, F-111, MiG-29, Saab Viggen, Saab Gripen, NH-90, Dauphin, Lynx, EH-101, Space Shuttle (NASA), Satellites (ESA, NASA), RPV and Drone systems, underground facilities, etc.

Munters Netherlands BV is part of the Munters group. The mother company Munters AB is a public company on the Stockholm (NASDAQ) Stock Exchange. Munters headquarters is in Stockholm, Sweden. Munters Business areas are Air Treatment (which includes above defence activities), AgHort, Datacentre Cooling and Mist Elimination. Annual sales is around 700 Million Euro (2017). Munters has subsidiaries in more than 30 countries around the world. Munters Netherlands BV is ISO 9001:2015 and VCA certified.

National Air Cargo BV

National Air Cargo is an experienced logistics solution provider for government and defence missions worldwide. National has consistently been recognized as an industry leader in Defence Logistics by catering to the needs of military transports. Being a CRAF carrier and by moving sensitive, high-value, and highly classified cargo to the world's most complex locations, National has always worked faithfully to the US DOD.

National delivers a broad spectrum of tailor-made solutions that aids base operations and life support, support contingency and permissive environments for classified and unclassified requirements. While providing complete supply chain management services through a vast global operations network, the global offices are specially trained and equipped to move shipments safely and reliably, nearly anywhere in the world.

As specialists in transporting military vehicle spares, aircraft parts, high value goods, weapon systems, arms and ammunition, other ITAR controlled items, HAZMAT and general cargo, National earned its name as a "bespoke integrator" in the industry. With global expertise, National has operated from remote locations in Africa to the FOBs in complex war zones. Additionally, National serves the governments of crisis-hit countries, areas of political instability and volatile security.

The National Airlines branch offers customized cargo charter choices for direct shippers, multinational manufacturers, e-commerce organizations, entertainment groups, and government agencies. With an exclusive cargo fleet of B747-400F National offers reliable and industry specific focused charter solutions. The passenger aircrafts A330-200 & B757-200 offer not only inflight entertainment and digital service offers but personalized, comfortable, and exclusive journeys to worldwide destinations.

Navtrain International BV

Navtrain International is the Dutch naval training and consultancy company, who provides its services to maritime organisations, such as navies, coast guards, shipyards as well as related defence industry. Our services are built on four pillars:

1. Training

We offer our services to any organisation, in need of professional crew readiness training, e.g. when taking newly delivered vessels into service. We also provide this to shipyards as part of their delivery package.

Our training curriculum:

- Crew Readiness Training
- Team training & command team training
- Firefighting & Damage control, Machinery Breakdown drills
- Air Control, Flight Deck Officer, Flight Deck Crew
- Boarding Operations & Force Protection

2. Consultancy

Our consultancy services cover a wide package, e.g. CONOPS-development, naval systems and equipment, maritime operations, fleet management and support in acquisition trajectories. In addition we have expertise in setting up training and simulation facilities.

3. The Maritime Warfare Course (MWC)

Navtrain's Maritime Warfare Course (MWC) offers a range of modules, educating and training naval OPS-room-teams. The curriculum comprises Tactical modules, Operational Planning Modules and an Amphibious module. The courses are given at Navtrain's premises in The Netherlands, where we make use of a state of the art tactical gaming simulator. In addition, there is a train-the-trainer programme and transfer-of-knowhow programme available, to facilitate the MWC locally at customer's premises.

4. Personnel outsourcing

Navtrain has a wide network and outsources former navy personnel to any organisation that is in need of a specific expertise.

NCIM-Groep

NCIM's core business is staff augmentation with IT Specialists for system integration, support, and staffing projects in technological, scientific, and military settings, often in highly secured domains. The highly qualified IT professionals support clients with work on mission-critical projects and programs.

NCIM's professional staff holds academic degrees ranging from BSc and MSc to PhD and has excellent IT skills. Most (>95%) of the 400 IT professionals hold active Security Clearances at NATO/EU Secret or higher levels and work on classified secure and challenging high-technology projects.

NCIM has obtained an outstanding reputation in the Dutch Defence, NATO, Europol and Public Security Domain by making customer satisfaction its top priority. NCIM is characterized by entrepreneurship, innovation and agility.

NCIM is known for its adaptive approach, customer intimacy and personal touch in augmenting client teams. NCIM emphasizes the importance of long-term relationships and invests as much time as necessary to bolster these relationships. The company is known for its reliability and good price-to-quality ratio. NCIM currently holds ISO 9001 and 27001 certificates.

NCIM provides solutions in various Defence and Public Safety areas, ranging from NATO, the Dutch Army, the Dutch Airforce, Europol, Eurojust, OPCW, the Supreme Court of Justice, the Dutch Parliament and the Netherlands Forensic Institute. Apart from the Defence and Public Security domain NCIM has built up a good name and reputation in various private and public organizations like the Dutch Chamber of Commerce, ING Bank, ABN Amro and the Dutch Rail Road Organization.

Nedal Aluminium B.V.

Nedal develops, produces and sells aluminium profiles and lighting columns. We are proud to be the first Aluminium factory in the Netherlands and to have more than 85 years of experience and history. Based in Utrecht, in the Netherlands, we deliver to clients all over the world. Our three divisions are Nedal Extrusion, Nedal Lighting columns and Nedal CityChargerR.

Today, we provide all different sectors from transport, to automotive, public amenity, offshore and even more. We believe that the possibilities of Aluminium extrusion are infinite and that aluminium is a special metal that will help us and our clients to shape a sustainable and resourceful planet. As part of our proactive commitment to the environment, safety and energy management we comply with internationally recognized quality and environmental standards. For example we are a member of the Aluminium Stewardship Initiative.

Nedal stands for quality and reliability, establishing and expanding further manufacturing steps that integrate new and innovative technologies. Our team is a combination of long-lasting employees and young talents. This allows us to serve our clients with persistent knowledge and expertise as well as with innovative ways of thinking. Nedal excels at tailored solutions and is dedicated to offering its clients a unique and perfectly tailored end product.

Nedinsco BV

Nedinsco: A WORLD LEADER IN HIGH PRECISION OPTRONICS

Nedinsco BV is a leading Dutch company based in Venlo, specializing in the advanced development and production of opto-mechatronic systems. Renowned for our commitment to excellence, we develop innovative solutions that ensure superior visibility in even the most challenging environments. Our robust research and development capabilities, coupled with world-class manufacturing, assembly and clean room facilities, ensure the highest quality standards across our entire product range.

Nedinsco's high-precision offerings are widely used in the defence sector, seamlessly integrated into world-class land and naval systems. From high-end cameras to day and night vision solutions, sensor platforms, submarine periscopes, boresights and active protection systems, Nedinsco delivers a comprehensive range of products tailored to meet the demanding requirements of military operations. Our expertise spans mechanical, optical, electronic and software domains, positioning us as a trusted provider of military-certified systems that excel in performance and reliability.

Nefab Packaging Netherlands

Nefab Packaging Netherlands BV is part of the Nefab Group, a global industrial packaging manufacturer. The group employs over 3000 people of which 200 highly skilled multi-material packaging engineers. Nefab operates from two locations in the Netherlands. One in the middle of the Netherlands in Voorthuizen and the other location in Son. Our ISTA-certified Packaging Engineering Center and Test lab is located in Son, this helps us to develop and test a substantial amount of these multi-material solutions. Nefab Packaging always strives to create functional and cost-effective packaging while minimizing environmental impact and maximizing efficiency.

Nefab Packaging is a global provider of packaging solutions for governments agencies (NATO) and multinationals in the Telecom, Energy, Vehicle, Healthcare Equipment, Military and Aerospace industries.

Nefab Packaging core highlights

- *In-house packaging solutions.* We develop, test and produce custom-made and standardized packaging. Our engineers develop smart, functional and multi-material solutions which can thoroughly tested in our certified ISTA testing laboratories prior to production. All our packaging is aimed at providing maximum (product) functionality and strives for last mile optimization.

NATO supplier. We are a tier one supplier for some of the largest NATO military forces in the world offering a multitude of (highly customized) defense packaging solutions abiding to the various standards and norms set by: NATO (Stanag), MIL-STD & MIL-SPEC, ISTA/ ASTM, Dangerous Goods, NEN and ISO.

Network Innovations B.V.

About Network Innovations

Network Innovations (NI) is a satellite communications integrator, focused on the provision and support of systems which enable our customers to communicate anywhere on the planet. Incorporated in 1989, we have grown consistently and profitably through a team of professionals located at offices around the globe. Our EMEA region is served from our office in Eersel, The Netherlands; we are headquartered in Calgary, Canada.

We specialize in the successful development and delivery of turn-key communications solutions for the land, maritime, government and defense markets. Our flexibility to custom-design solutions and integrate various satellite communications technologies for customer and industry specific needs, is one of our key differentiators.

Design, integration, delivery of hardware and software, billing, portals, logistics and SLA's are what we help our customers with. Our capabilities reach beyond satellite communications, with offerings in LTE and network solutions.

Network Innovations holds a deep dedication to doing what's right for our customers and we have built a network of industry partners so that you get the right solution for your mission. We know, in critical situations, you rely on communications. We offer a 24/7 help desk, because when it really matters, you can trust that we are there for you.

Nevesbu B.V.

Founded in 1935, Nevesbu is an independent naval architect and platform systems integrator, based in the Netherlands. Nevesbu devises advanced design, engineering and support services to the submarine, naval vessel, floating offshore energy and special ship industries worldwide.

By combining our specialist technical knowledge of shipbuilding, complex maritime constructions and installations with the development and application of the latest technologies, we translate even the most complex issues into feasible and high-quality solutions. Nevesbu fully supports clients from advisory in program definition up to the complete design & engineering of a ship and its systems, on-site building supervision, procurement of marine systems, class approval and support during operation. We do this for newbuild vessels as well as modification and life extension projects.

With our structured and integrated approach - encompassing design, organisation and communication, supported by expert naval architecture and marine engineering - Nevesbu ensures a mature design with an exact balance between requirements, costs, risks and technology.

Neways Electronics

Neways is a global innovator in mission-critical technology for the safety & security sector as well as the semiconductor, connectivity and smart mobility sectors. We develop and produce high-tech:

- Complex electronics, modules, and assemblies
- Printed Circuit Board Assembly (PCBAs)
- Specialized Cables and Wires
- Microelectronics

With more than 50 years' experience and over 500 engineers in our company, we are the technology innovation partner for the most demanding customers in the industry. We bring together professionals and cutting-edge technology, offering our unique knowledge in complex electronics. We have a strong engineering base that allows us to bring unique solutions across the lifecycle of our customers' products, and our engineers deliver rapid fit-for-production prototypes that reliably scale to volume. Our world class production facilities deliver unique solutions: from microelectronics to advanced and robust cable harnesses, to the highest-grade cleanroom assemblies available in the industry. Additionally, through Neways Circular Solutions, we offer a unique set of solutions for the later stages in a product's lifecycle: from redesigns, to revalidations, to repairs and refurbishments; all geared towards giving systems a robust and capable new lifecycle. Our facilities span the globe, and are located in the Netherlands, Germany, Slovakia, the Czech Republic. At Neways, we are proud to provide high-tech electronics and solutions for leading defense and security companies constantly pushing the boundaries of technology to create a safer world.

NLR - Netherlands Aerospace Centre

Royal NLR is a leading international research centre for civil and military aerospace research, technology development, test and evaluation (RDT&E). NLR thereby bridges the gap between research and practical applications, while working for both government and industry in the Netherlands and abroad. NLR stands for practical and innovative solutions, technical expertise and a long-term design vision. This allows NLR's cutting-edge technology to find its way into successful aerospace programs of OEMs like Airbus, Embraer and Pilatus, and (defence) programs such as ESA's IXV re-entry vehicle, the F-35, Apache-helicopters and European programs such as SESAR and Clean Sky 2.

NLR can offer you access to state-of-the-art facilities and our unique experience for RDT&E. We help you with de-risking your product introduction and bridging the valley of death by facilitating RDT&E. We can support you with prototyping, establishing pilot factories, and initial production runs up to sustainment.

Some of our programs and facilities

- Pilot factory for thick walled composites.
- Additive Manufacturing with industry driven workshops
- Wind tunnels covering a large spectrum from low speed to supersonic
- World leading for advanced wind tunnel models
- Training and simulation facilities and concepts
- Facilities for RDT&E of drones/RPAS, drone operation and counter drones
- Programs for future Air and Space power development
- Programs for rapid development and future factory set ups

Royal NLR has been an ambitious, knowledge-based organization for a hundred years now. Together with our partners, we can help shape the fascinating world of tomorrow.

Nokia Solutions and Network Netherlands B.V.

Nokia Netherlands supplies telecommunication solutions for communication service providers, industries, and the public sector. Nokia Netherlands is part of Nokia, a European high-tech company based in Espoo, Finland. With a turnover of 22.2 billion Euros in 2021, Nokia is a market leader, present in more than 130 countries across the world. We have been investing more than 130 billion Euros in research and development, since year 2000, to build technology leadership and transform the industry through innovation. Nokia provides next generation fixed and wireless mission-critical broadband telecommunication networks, that are essential to power the new digital services that will drive forces operational excellence and leadership. Our solutions for public safety and defence markets include:

Mission-critical broadband mobile networks:

- 4G/LTE and 5G private wireless networks,
- Secure-MVNO solution,
- Deployable 4G/LTE and 5G networks, with partners.

Mission-critical transport and backhaul networks:

- Full packet microwave radio links,
- Optical networks,
- IP/MPLS networks,

- Fibre access networks,
- Data center networks.

Software platforms and applications:

- Mission-critical Push-to-Talk/video,
- Scene analytics platform,
- Device Management platform,
- Public Warning System.

Professional services:

- Managed services,
- Nokia and 3rd party maintenance and care services.

Sustainability is a key component of Nokia strategy and purpose. We Adhere to the highest standards of integrity and security and are a trusted partners of more than 250 public safety and defence customers across the globe and in the Netherlands.

OneLogistics B.V.

Established in 2006, OneLogistics was specifically setup to support the F-35/F135 program dealing with European rules, regulations & complexities impacting the F-35 supply chain. Since 2017 OneLogistics operates the regional warehouse and sustainment logistics as an OSD directed source for both the F-35 AirVehicle as the F135 Propulsion. Over time we will support +700 F-35's in the European Region.

Our integrated supply chain solutions are designed full focus on readiness, availability, resilience, scalability, agility, compliance & innovation. OneLogistics supports you with regional (bonded) warehouse & logistics services. delivering innovative supply chain solutions. Warehouse-, transport-, customs-, compliance- & performance management are integrated in our Control Tower solution. As system backbone we use the ILIAS Solutions system widely used in F-35, F-16 and many other weapon systems. We supply fast, reliable, efficient, safe & secure integrated logistics services based on our Control Tower with (NATO) screened staff

A seamless cooperation with our industry & government partners such as NLMOD/ Air Support Command delivering innovative supply chain solutions from a central and well accessible location in Europe: the Netherlands. We provide supply chain simulations, value chain mapping and detailed studies on how to positively impact metrics and KPI's in a high velocity Performance Based Contracting environment and also in Contested Logistics situations.

OPTICS11 B.V.

OPTICS11 develops and supplies state-of-the-art fiber optic sensing systems for unmatched performance in the most challenging environments.

They are active in the field of underwater acoustics (hydrophones, towed arrays, streamers), NDT research (including acoustic emission) and SHM (Structural Health Monitoring of bridges, tunnels, roads). Currently the company employs about 55 people at their location in Amsterdam. There is also a small R&D center located in Dublin (Ireland). In the view of the promising fiber sensing market and the growth ambition, there are ambitious expansion plans to add 35 additional employees.

Application areas for OPTICS11 technology include besides submarines, Autonomous Underwater Vehicles (AUVs), geographic surveys and sensor systems for monitoring underwater activity. OPTICS11 is collaborating for many years with Defense, as in general the technology is very relevant for them.

PA Consulting Services B.V.

We accelerate new growth ideas from concept, through design and development to commercial success. And we revitalise organisations with the leadership, culture, systems and processes to make transformation a reality.

We believe in the power of ingenuity to build a positive human future.

This is PA's purpose, the lighthouse guiding what we do, how we do it and, most importantly, why we do it. It means we're proud to work with clients who make a positive contribution on ground-breaking and innovative projects that improve people's lives.

For us, ingenuity is a mindset. We're optimists who believe that when you put bright people and brilliant technology together, amazing things happen. It isn't just transformative and fascinating. It means delivering actual results every day, helping find new opportunities for our clients, communities, and the wider world.

It's this mindset that creates the environment for progress. And with this at the heart of who we are and what we do, we believe that a positive human future is perfectly achievable.

Palantir Technologies NL

Palantir was founded in 2003 and builds data-driven operations and decision-making software to empower some of the world's most important institutions. We got our start in intelligence and defense, assisting the United States in counterterrorism investigations and operations, and then applied our frontline deployment learnings to support commercial enterprises. We now serve 50+ industries and offer three principal software platforms: Palantir Gotham, Palantir Foundry, and Palantir Apollo.

For over a decade, Palantir Gotham has surfaced insights for global defense agencies, the intelligence community, disaster relief organizations, and more. Palantir Foundry is transforming the way that organizations operate by becoming a central operating system for their data, for both individual institutions and entire industries. All the while, Palantir Apollo coordinates ongoing delivery of new features, security updates, and platform configurations to help ensure the continuous operation of critical systems – and allowing our customers to run their software in virtually any environment.

As of December 31, 2021, more than 2900 Palantir employees work in offices around the globe, including in New York, Palo Alto, London, Amsterdam and our headquarters in Denver.

Patria

F35

Patria (formerly NEDAERO)

Patria is an international provider of defense, security and aviation life cycle support services, pilot training and technology solutions. Patria provides its aerospace and military customers with equipment availability, continuous performance development as well as selected intelligence, surveillance and management system products and services. Patria's mission is to give its customers confidence in all conditions, and the vision is to be the #1 partner for critical operations on land, sea and air.

Decades of experience serving customers requiring high-quality standards Patria Group's Dutch-based subsidiary Patria Netherlands BV can lean on more than 40 years of experience for its specialized services in the manufacturing, MRO (Maintenance, Repair and Overhaul) and distribution of components and systems for civil and military aircraft and helicopters. Worldwide customers like Airbus, Lockheed Martin and Spherea rely on our high-quality products and services in their supply chain. The manufacturing of new parts (Fuel Management Systems, Remote Frequency Indicators, Flight Line Testers) takes place in fully equipped workshops with high-tech production- and test-equipment. Patria Netherlands BV is the only Dutch aerospace company holding a triple AS-certification in the Netherlands.

All components are being delivered in accordance with the highest standards and expectations within the Aerospace Industry.

Innovative and state-of-the-art masterpiece is the FOG (Fiber Optic Gyro) Program. The FOG family consists out of FOG70 and FOG80, all sensors suitable for flight stabilization and attitude control of aircraft, helicopters, drones, missiles, ships and other applications.

Patria offers broad expertise to military governmental organizations, as well as to industrial actors in the security critical sector. F-35, F-16, NH90, Super Puma/ Cougar are familiar platforms on which Patria has years of experience and expertise. In the Netherlands the Dutch Defense organization is the main military reference customer since many decades.

PHOTONIS Netherlands B.V.

Photonis is a global manufacturer of electro-optic components used in the detection and amplification of ions, electrons and photons. The company is focused on mission critical components aimed at high demanding customers. Photonis Netherlands is part of the EXOSENS group.

Market orientation

Photonis innovates and engineers quality components for integration into a variety of applications such as night vision optics, digital cameras, mass spectrometry, physics research, space exploration and many others. The wide range of Photonis products and applications are used in several markets:

- Analytical Instrumentation
- Defence
- Medical
- Nuclear Instrumentation
- Security and Surveillance
- Space and Physics

(Digital) night vision

Photonis is one of the world leaders in the design and manufacturing of both state-of-the-art night vision image intensifier tubes and night vision camera cores for military and commercial applications. Photonis products are used in all NATO countries and are largely deployed worldwide. Its image intensifier tubes and night vision camera cores are integrated into equipment of the world's leading suppliers of optical systems. Photonis provides the tools that enable detection of threats across a variety of challenging conditions and increase safe operations.

Photonfirst Technologies B.V.

PhotonFirst is a deep-tech venture and provider of photonics-based sensing solutions for Aerospace and Defense applications. Our technology leverages lightweight optical fibers that integrate into high value assets, functioning as highly precise and durable sensors. Our solutions help customers to enhance asset uptime, reduce maintenance costs, and extend operational lifetime.

Our sensing products are applied in:

- Structural health monitoring
- Load monitoring
- Impact detection
- Overheat detection
- Battery monitoring

Photon First's photonics-based solutions are designed for extreme environments, offering high resilience, low weight, and a compact form factor. They can be deployed on various Aerospace and Defense platforms, including:

- Helicopters
- Military drones
- Fixed-wing aircraft
- Space launchers
- Unmanned surface vessels (USVs)
- Frigates
- Submarines

Our solutions comply with the requirements of military standards, ensuring reliability in the most demanding conditions.

Policy Research Corporation BV

Introduction Policy Research

Policy Research Corporation is an independent management consultant, specialized in complex strategic, organizational and policy issues; not only in studying these issues, but also in solving and implementing them. Policy Research mainly operates on the cutting edge of public and private. Analyses rely increasingly on solid supported research, so that they are transparent and verifiable, and the discussion can be conducted based on facts. In combination with tracking an open and clear process approach, our research projects are influential: acknowledged analyses and many proposals are implemented.

Clients of Policy Research are CEO's, board of directors and management of ministries, semi-public organisations and businesses. Through the various projects in the field of Defence, Security and Cyber security for the Dutch government and private clients Policy Research has acquired deep and extensive knowledge and ideas about relevant developments and issues concerning cyber security, partnerships between businesses and the military (e.g. efficient maintenance of (weapon)systems), and other strategic and organisational issues.

Policy Research works according to the highest quality standards and has a quality system certified by Lloyd's Register Quality Insurance (ISO 9001:2008). Policy Research strives for quality in terms of both content and form of its reports and presentations, as in the execution of projects and the treatment of clients.

HYTECH - POMMEC

Hytech-Pommec

Hytech-Pommec is a leading European manufacturer and global supplier of hyperbaric solutions.

Hytech-Pommec designs and manufactures special hyperbaric equipment for governmental organizations, including customs, army engineering corps, navy, special forces and coastguards. Governmental organizations have specific requirements, such as lightweight, transportable and low magnetic profiles.

Some of the versatile systems we manufacture include:

- containerized decompression chambers
- hyperbaric dive simulator systems
- dive bell and handling systems
- hyperbaric submarine rescue facilities
- escape training facilities
- hyperbaric hospital facilities
- surface supplied dive control systems
- low magnetic solutions
- fly away diving systems for control panels and decompression chamber

Products

- deck decompression chambers
- launch and recovery systems (LARS)
- transportable decompression chamber (DART and ATEL)
- mobile dive control systems
- dive umbilicals
- equipment and tools
- underwater air lift bags
- personal diving gear

PIA Service B.V.

PIA Service is an expert in all disciplines required for your industrial automation. We offer full support as system integrators for process and machine controls.

We have:

- Hard- and software-engineering
- Panel building departments
- Service departments for projects from start to finish.

PIA Service stands for Processing & Industrial Automation (PIA) Service. Established in 2007 as a sole proprietorship, it has grown to where we stand now, a business operating with 45 employees. We operate in the Netherlands and internationally. Our work is best served in an open relationship with our customers. You can count on us to provide an automation solution with support that fits your business.

Everything we offer is visualized in 3D before the building phase starts. We are able to envision our designs through this technology which allows us to pre-fabricate our control units. We have an extensive workplace and warehouse of 1.500 square meters where our control panels are built.

Our control panel department includes two different sections: control panel building and assembly. We can assemble multiple small control panels, cable trees or distribution boxes against affordable prices.

PON

Pon is a company operating globally and in many markets. We are the number one car importer in the Netherlands, with a strong position in the States.

We find ourselves in the top 5 of bicycle manufacturers and are well established in the world of marine solutions, excavation, energy supply, flow control (valves and circuit breakers) and industry services. Pon is the car importer of Volkswagen, VW Bedrijfswagens, Seat, Skoda, Audi, Cupra, Porsche, Lamborghini, Bugatti, Bentley and importer of Caterpillar and MAN motors both land based and naval. With several Pon owned dealers as well as contracted dealers Pon is able to maintain and manage all kind of multi brand fleets.

We are one of the leaders in mobility in the Netherlands. Four million Dutch cyclists use a Pon bicycle daily. Two million people drive a car imported by us. 130,000 people use our mobility service cards every day. More than 100,000 people use a Swapfiets, and on average 100,000 Dutch travelers use our smart mobility solutions.

We move millions of people, every day. As a mobility expert and market leader, Pon is a great sparring partner for customers and partners. Together we work on the development of sustainable and carbon neutral solutions for the transport of people and goods. From electric bicycles to electric excavators. From connected-car-solutions to mobility service cards and green shipping.

As a family business, we invest continuously in new, sustainable mobility solutions and technical innovations. Pon uses an approach that goes back to their early beginnings: no-nonsense, well-thought-out, pragmatic – with the objective to put ideas into practice as fast as possible.

We move you to a better world.

Profile Equipment B.V.

Profile Equipment has been developing and supplying high-quality solutions for defence, police and other government services since 2008, with a strong focus on ballistics, carrying systems and personal equipment. We specialise in designing, limiting and improving equipment that is used directly on or around the wearer – from ballistic vests and plate carriers to modular carrying systems and accessories.

Our products are developed in close collaboration with the requirements and are tailored to the practical requirements of the operational field. Thanks to this approach, we combine innovative materials and techniques with robust functionality and maximum comfort. In addition, we support the integration of peripheral equipment such as radios, night vision equipment and sensors so that everything works seamlessly together in one system.

With valuable experience in specialist projects, we deliver reliable, customised solutions that contribute to safety and effectiveness on mission.

Providence Europe B.V.

Providence provides government, defence, and law enforcement customers with bespoke capability development initiatives, equipment procurement solutions, and best in class operational training.

Since 2009 we have offered best of breed surveillance equipment and built a business around optimising, adapting, and integrating commercially available tech into solutions for complex operational challenges. Through close consultation with customers, our products and solutions are tailored to deliver decisive effect in the field, on target, or on operations.

Specialist training in physical and technical surveillance, covert action, and low signature ops is another key value proposition offered since the beginnings of Providence. Our people, methods, and enablers are each carefully selected for their ability to add maximum value to client operations. We pride ourselves on understanding our customers' work, the nuance of how and where they operate, and how tech, equipment, specialist support, and training combine to develop and maintain a winning edge.

ProQares B.V.

ProQares: your partner in protection

When protective equipment is required, you want only the best. ProQares helps to ensure that users can rely on their CBRN protective products under critical work conditions.

In our laboratory in The Netherlands we provide comprehensive global testing services for Personal Protective Equipment such as respiratory protective devices, chemical protective clothing, gloves and boots as well as COLPRO units. ProQares delivers more than just a standard test report. Our specialists are also able to guide

you through the test results and support you in its interpretation. Whether to achieve compliance with industrial or military standards, to pass acceptance tests in the procurement of new equipment or to give your organisation confidence in the quality of equipment in stock: we are your helping hand.

Our company is built upon years of experience and specialized knowledge. With state-of-the-art equipment and access to chemical warfare agents (CWAs) and a wide range of industrial chemicals ProQares is a leading expert in material swatch testing, system testing and on-site testing. We can even develop tailor-made tests according to your specifications and requirements. And together with the responsible quality and safety expert, ProQares can set up a dedicated quality program for the future as well.

As a result, companies and governments worldwide rely on our high standard of knowledge and high quality data. our flexible, independent and fast data delivery has resulted in exceptional trust from manufacturers and end-users.

QuinteQ Energy B.V.

QuinteQ Energy B.V. is a Dutch cleantech startup that markets the most advanced energy storage flywheel in the world. QuinteQ is a Dutch company, but the basis for this technology is rooted in the USA. The technology has been developed by the Boeing Company and QuinteQ has acquired the worldwide exclusive license through an industrial participation contract. QuinteQ launched itself in the Dutch market in 2019 and since then the company has been work hard with product development, financing and market development of all kinds of military and civilian applications of the flywheel.

One of QuinteQ's key activities is a Defense Technology Program contract with the Dutch Ministry of Defense. The scope involves the test & demonstration of QuinteQ's flywheel energy storage systems to stabilize and optimize energy systems in land based operations.

In line with the Defense Energy and Environmental Strategy (DEOS), it is expected that in the next 10 to 20 years the energy generated in forward operating camps will largely consist of solar energy and possibly wind energy. The volatility of these generation methods means that the microgrid needs a stabilizing element which can absorb such fluctuations, shave generation and load peaks and can improve and guarantee the necessary power quality.

Together with the Energy Transition and Concept Development and Experimentation Teams, QuinteQ has developed a business case which shows a potential saving of minimal 40% in diesel consumption. This has led to the pilot engagement in which QuinteQ is offered an opportunity to test & demonstrate the performance of its flywheel energy storage systems at the Fieldlab Smartbase in Ede.

With the Dutch Ministry of Defense as the launching customer and several Dutch and European follow-up programs under contract, QuinteQ is set for scaling up in both defense and civil applications.

REASeuro

REASeuro offers solutions for all issues where explosives and UXO are part of the challenge. REASeuro has been supporting (inter-)national governments and private businesses with clear propositions for more than 27 years with all possible issues involving explosives.

Education

In the field of explosives, REASeuro offers the most complete range of education and training in The Netherlands, both in the field of conventional and improvised explosives, onshore and offshore. We provide our training in classroom settings (both physical as streaming) but also online (via desktop or app), which enables the student to follow the course in the convenience of the student's own setting and time.

Advice

A Historical Research informs about the possibility of finding Explosive Remnants of War (ERW) within any project area. Our academically-schooled historians identify and review all acts of war that may have resulted in explosives being left behind in the project area. Besides that we produce Project Risk analyses in being able to mitigate all risks related to UXO.

Operations

For onshore, inshore, near-shore and offshore operations, REASeuro is the perfect partner for UXO clearance and disposal. From project plan to detection, clearance, disposal and release of the project location; REASeuro takes care of it.

CTER

Improvised Explosives (IEDs) education focusses on theoretical and practical preparation for the safe, effective and efficient handling of activities in case of bomb letters, bomb threats or actual discoveries of an explosive. In addition to education, we offer operational support through, among other things, preventive and targeted searches, the use of explosives detection dogs, support in case of calamities, intelligence, review of security plans and the like.

Our motto is: **Your safety, our concern.**

Refitech B.V.

Founded in 1989, Refitech has a proven track record in the engineering and series production of industrial composite components. The company delivers tailored components for various markets, including defence & law enforcement, but also Machine building, UAVs and Aerospace and the Automotive Industry.

In addition to its specialized production of 3 dimensional made-to-measure, customer specific components, Refitech offers a range of standard carbon fibre products like sheets, round and square tubes with associated connectors and telescopic tubes. These standard products can be purchased directly online via www.carbonwebshop.com

Additional services include composite engineering, prototyping, mould production, component assembly (including interfaces) and inserts. In addition, components can be CNC finished using water jet cutting and/or milling.

RH Marine Netherlands B.V.

RH Marine is an independent system integrator and innovator of electrical and automation systems in the maritime industry, and delivers tailored solutions for complex Defence, Safety & Security ships. Our in-house capabilities include: Project management, consultancy, system design, engineering, commissioning, installation, site management, training and service support.

Not just the Royal Netherlands Navy and Dutch shipyards belong to the military customers but also other navies including: Belgium, Germany, Great Britain, Greece, Indonesia, Morocco, Oman, Poland, Singapore, Thailand, Turkey and South Korea sail with RH Marine systems.

RH Marine supports and advises the customer from the design phase through the entire life cycle of the ship. This end to end approach allows for optimal configuration of the operational goals, and minimization of the life cycle costs. The team ensures safe, sustainable, comfortable and cost efficient continuity of operations for RH Marine's customers by integrating smart and cost effective solutions since 1860. RH Marine is certified by Lloyds Register Quality Assurance and complies with ISO 9001, OHSAS 18001 and ISO14001.

Rheinmetall Defence Nederland

Rheinmetall AG is the listed management holding of the Rheinmetall Group, based in Düsseldorf, Germany. Rheinmetall's structure encompasses five divisions, all of which will be directly run by the executive board of Rheinmetall AG.

- Vehicle Systems
- Weapon and Ammunition
- Electronic Solutions

- Sensors and Actuators
- Materials and Trade

Rheinmetall Defence Nederland B.V. (RD-NL) in Ede is part of the Vehicle Systems division and is a 100% subsidiary of Rheinmetall Land Systems GmbH. RD-NL is the Dutch partner of the Boxer consortium in which the armoured wheeled vehicle Boxer was developed and built together with the German industry. The Dutch Boxer vehicles were developed and built in Ede, currently Boxer vehicles are being assembled for other countries and Ede supports the development of Boxer for other countries. In addition to new production and development of Boxer, maintenance and further development of Boxer and other military vehicles are carried out.

Rheinmetall Group develops, assembles and supplies products to defence and Police and automotive customers.

Ridderflex & Plastics B.V.

Ridderflex & Plastics specializes in manufacturing industrial rubber, plastic and polyurethane components. Throughout the years we have established a strong presence in the Petrochemical, Marine, Offshore Wind, Heavy Civils, and Transportation sectors.

Our products are used in all areas of industry where high performance is essential for demanding applications making us a reliable partner in the Defense and Security sector.

We co-engineer, develop, produce, measure and test all our essential components in-house, in the Netherlands. Completely custom-made and according to industry standards to provide – among others:

- Custom made plastic parts (o.a PE, POM, PA6, PTFE, PEEK)
- Custom made rubber parts (o.a NBR, SBR, CR, EPDM, FKM)
- Custom made polyurethane parts
- Seals and gaskets
- Vulcanization of steel parts
- Extrusion items such as pipe/tubing, fenders, thermoplastic coatings, weatherstripping, plastic films and sheeting.
- Spraying of high-quality polyurethane coatings

We operate an ISO 9001:2015 certified facility in Ridderkerk, and are an experienced partner to various classification-, certification- and advisory agencies. We would like to welcome all NIVD members to reach out to us in case you have any questions or require any advice.

RINA Consulting B.V.

With 160 years of experience across a wide range of industries including Energy & Mobility, Marine, Certification, Real Estate & Infrastructure and Industry, RINA is a multinational company that helps clients build strong, successful businesses. Through a global network of 4,000 talented professionals operating out of 200 offices in 70 countries, we support market operators across the entire lifecycle of their projects, whilst assisting them in renewing their products, technologies and services. Entrusting a project to us means being sure that everything will be taken care of, and our mindset allows us to apply a simple approach to complex situations. We work with organisations for whom safety, reliability and security are critical and where digital technologies underpin innovation and competitiveness, striking a balance between cost effectiveness and sustainability goals without compromising operational outcomes. With over 250 core consultants in Space & Defence alone, we provide a comprehensive range of services to enable defence capability, optimise operations, ensure compliance and stimulate R&D, including:

- ICT & software engineering
- System engineering
- Security and cyber security
- Safety analysis
- EMC engineering & testing
- Flight dynamics
- Test equipment design & development
- Hardware development
- Integrated Logistics Support & Manuals
- Training & learning

and our customers value the strength and depth of our expertise, drilling deep into human factors, Process advisory, Management system consulting, Product legislative compliance, and Supplier qualification & management.

With a history of working with government defence ministries, space agencies and prime contractors, our capabilities support programmes across all domains and throughout the entire lifecycle. Our data scientists, analysts and digital experts work alongside our traditional engineering and consultancy capabilities to ensure that we offer the best possible advice and solutions, and our ability to react quickly to changing requirements and be flexible and agile in our approach enables us to provide sustainable and value-added solutions to our customers.

robin

radar systems

Robin Radar Systems B.V.

Robin's revolutionary drone and avian radars provide a unique 360° and 3D view of airspace. Accurate detection, tracking and classification technologies deliver actionable information for increased safety and precise mitigation.

Our drone radars are mission-proven worldwide and integrate into full systems for fast, accurate updates in an equally rapid and unpredictable world. They protect infrastructure, events and VIPs from rogue drones, and are permanently deployed at military and civil airports including London Heathrow.

Our avian radars are deployed at airports around Europe, including Amsterdam Schiphol, Frankfurt, Berlin and Copenhagen. The Royal Netherlands Air Force (RNLAf) deploys our bird radars at scale, protecting all national airbases and bombing ranges in the Netherlands.

Robin has a colourful technical heritage which began in aviation in 1980. In 2010, Robin CEO, Sietje Hamminga, spun out the technology from TNO to make it commercially available.

Today, Robin is one of the fastest-growing technology companies in the Netherlands. Listed in the top three most innovative Dutch companies, Robin has been named as an official Great Place To Work consecutively since 2021.

Despite growing at pace, with 300+ systems deployed worldwide, our culture of innovation remains central to everything we do. With 29 patents and counting, we work closely with clients and partners to continue lifting our technology to new heights

Rohde & Schwarz Benelux B.V.

Rohde & Schwarz, a global technology group, aims for a safer and more connected world through its Test & Measurement, Technology Systems, and Networks & Cybersecurity Divisions. With a history of innovation, the company, founded by Dr. Lothar Rohde and Dr. Hermann Schwarz, now focuses on advanced technologies like AI, 6G, cloud and quantum technologies. As a privately-owned, independent company, Rohde & Schwarz ensures long-term stability and high added value what is making it a reliable partner. Rohde & Schwarz Benelux B.V. (RSBNL), a subsidiary of Rohde & Schwarz GmbH, operates in the Benelux area with over 40 employees and was established in 1979. In 1988 RSBNL became a competence centre for Naval Communication Systems and as a provider of comprehensive solutions, with international recognition for proficiency in diverse sectors. The evolution of Rohde & Schwarz Benelux (RSBNL) from a sales office to a centre of excellence is demonstrated by its significant projects with various prominent organizations, including: The Ministry of Defense in both the Netherlands and Belgium, KPN, Air Traffic Control entities in the Benelux region, Telecom authorities within the Netherlands and Belgium, EMC test facilities, RTBF and several other notable organizations.

More specific for military applications:

- HF/VHF/UHF-transceivers, including ECCM, (Have Quick, SATURN), land mobile, airborne and naval application.
- Tactical radio-communications.
- Message Handling Systems.
- Radio direction finders for HF/VHF/UHF.
- Antenna-systems.
- Radio monitoring.
- IT-security products.
- Cellular Networks.
- Integrated Internal & External ship communication systems.
- HF/VHF/UHF radio and satellite communication system, integrated in shelters/containers.
- Precision time and frequency systems.

RollDock B.V.

Roll Group offers a total solution on transportation, lifting and installation of heavy cargo. Operating under one name, the forces of the companies RollDock, BigRoll and Roll-Lift are strengthened. RollDock owns five and operates six dock-type vessels, which all have the option of three loading modes - Roll-On/Roll-Off, Float-In/Float-Out and Lift-On/Lift-Off. The semi-submersible aspect of the RollDock vessels enables other ships and floating equipment to sail into the dock of the RollDock vessel. The high dock walls and the possibility to provide incoming ships with cooling water and power make the RollDock vessels even more suitable for the transport of naval ships.

Transport of naval ships

Naval ships must be transported accurately and often with the necessary discretion. Roll Group have been the partner of choice for navy's and naval ship builders to provide the logistical solutions for the worldwide transportation of valuable equipment, such as submarines, corvettes and fast missile craft. Roll Group gained a lot of experience and knowledge over a large number of projects, working according to strict country rules. Each project is meticulously planned and handled with the utmost precision and care. Our engineers are able to design custom made frames and saddles, which perfectly fit to the shape of the hulls.

Besides this niche industry, Roll Group's asset base ensures the ability to serve a wide range of markets and industries, such as: Oil & Gas, Petrochemical, Renewable Energy, Power, Civil Construction, Dredging, Offshore and Yachting.

On land, at sea

Roll Group's philosophy is that our land/sea combination enables us to offer 'Factory to Foundation' solutions - to bring heavy cargo from the place of manufacturing to its final destination for installation. Besides the RollDock vessels, Roll Group owns three ice-classed BigRoll Module Carriers. Two Module Carriers are ready to be equipped with DP2, the third vessel already has DP2 installed. On the land side Roll-Lift operates a large number of modern heavy lift cranes, Self-Propelled Modular Trailers (SPMT's), Conventional Trailers, Gantries and Jacking & Skidding equipment.

RSM Netherlands Business Consulting Services B.V.

RSM chairs the Trade Compliance Platform of the NIDV and actively supports the design of a defense treaty between The Netherlands and The United States in cooperation with Ministry of Foreign Affairs, Ministry of Defense and Ministry of Economic Affairs.

RSM International is present in more than 120 countries providing assurance, tax and consultancy services, including:

- EU and US export controls, sanctions and embargo's;
- Privacy, cyber-, and physical security including Cyber Maturity Model Certification (CMMC);
- VAT and customs;
- Due diligence, including third party screenings and trainings;
- US government contracting including FAR/DFAR;
- Immediate incident response and special (look-back) investigations;
- Compliance- and security audits, reviews and assessments.

RSM helps to manage international trade compliance, security, privacy and ethical practices in meeting expectations, industry standards, and to comply with laws & regulations.

Design, implementation and periodic evaluation and adjustment of trade compliance and security commitments and measures are increasingly recognized as an integral part of companies' efforts to mitigate compliance, security and reputational risks and to gain the trust of key stakeholders. Our less-is-more philosophy is designed to build company specific solutions that meet legal and regulatory requirements but avoid extensive procedures and lengthy internal processes and handbooks.

SAAB

Saab Nederland B.V.

Saab Nederland is a Dutch subsidiary (approximately 150 staff) of the Swedish Defense & Security company Saab AB, aiming at supporting the Dutch society with its solutions and expertise. We consider ourselves 'multi-domestic', which means that we cooperate with Dutch industry in most projects and are active member of the sector, chairing NIDV's Policy Platform on Sustainability and NIDV's Working Group on Operational Military Healthcare.

Markets

Our product areas for The Netherlands are:

- Advanced Weapon Systems, such as RBS15 (anti-ship), Trackfire (Remote Weapon System), NLAW (anti-tank) and Carl Gustav (multi-role)
- Aeronautics, for example pilot training, advanced aerostructures and deployable maintenance facilities
- C4I, including 9Land, 9Air, SAFE and TactiCall
- Underwater Systems, for example submarines, Seawasp and Sabertooth
- Surface vessels, including CB90 (combat boat) and composite super structures
- Sensors in multiple domains such as airborne and surface
- Signature Management, including Mobile Camouflage Systems, Personnel camouflage and 2D/3D nets
- Ground Based Air and Missile Defense systems, such as C-UAS and RBS70 NG
- Deployable Healthcare services and medical solutions, Role 1 to 4 (land and naval)
- CBRN systems, including scalable sensor boxes, system integration and control systems
- Cyber Security and Electronic Warfare systems
- Air and Maritime Traffic Management systems, including Remote Tower, Advanced Surface Movement & Control, and Vessel Traffic Management

Saab firmly believes that it is a human right to feel safe. That is our vision and we develop products and services to protect people in a rapidly changing world. We are also active in making defense forces around the world more sustainable.

Safety Masters BV

Safety Masters is manufacturer and supplier of Personal Protection clothing focussing on Military, Firefighting , Police and the Oil and gas industry. Our products are made of high-performance fabrics. Safety Masters strength lies within the potential to create and produce any customized design and any order size desired for our customers .

We are a total safety supplier and are capable of delivering the complete equipment to ensure the users safety. BSST is an independent owner operated company. We have been developing and producing body armor solutions for the last 20 years, with an emphasis on personalized solutions for protection against ballistic, stab and blow threats. Together with our partner companies, we are able to offer our customers individual concepts and premium solutions. Common sense is the basis of our decision making: our flexibility and unbureaucratic structure allow us to respond to the requirements of our customers. Our reputation as an honest and reliable partner, our business management mindset, focusing on long term planning, sustainability and economic stability are the result. Since the foundation of the company in 2003, Safety Masters has established a steady growth and a good reputation as a garment maker in the Personal Protection market due to our in-house knowledge, ambition and flexibility. We see developing new products as a challenge to meet the personal needs of the customer. Customization and flexibility are part of our Business DNA. Our priority is to ensure the safety of the user with the focus on quality, personalized customer service and value for money.

Business goals & strategy

Our export ambitions lie in enlarge worldwide , especially on the Military, Firefighting and Police. Our strategy is to keep growing and expanding our business to international markets. By using our knowledge, the ongoing search for market opportunities and our ambition to keep moving as a company specialised in personal protection clothing, we are confident to achieve this goal. Safety Masters is located in the southern of the Netherlands. Our company is settled in an highly industrialized region and one of the most knowledge intensive areas in Europe. The area is known as an innovation and knowledge region and is home of the Technical University, Design Academy and the High Tech Campus Eindhoven.

Science and Technology BV

At Science and Technology (S[&]T) we make sense of data for a safer and healthier life on Earth. As an innovation partner we help our customers to make sense of their valuable data. We are specialized in information systems that support complex decision-making or (semi-) autonomous systems. Our experience spans the entire technology chain that forms a decision support system, from the development of sensor systems to complex data processing, advanced data analysis and sophisticated data visualization. With our solutions and services we focus on Defense, Security, Space, Science, Sustainability and Environmental applications.

Since its founding in 2000, S[&]T has grown to a diverse group of about 150 professionals, where 90% of them hold a B.Sc, M.Sc and/or PhD degree in Computer Science, Applied Physics, Aerospace Engineering, Electrical Engineering, Mathematics or Astronomy. The S[&]T headquarters is in Delft, The Netherlands, with local offices in Oslo and Rome.

Talents

We support our clients' search for talent and needs for expertise with our own talent acquisition and consulting services called S[&]T Experts Pool (STEP).

Projects

We are an experienced R&D partner and are ready and willing to take on long, challenging projects together.

Solutions

Data is powerful when transformed into actionable insights. Our solutions support our clients in their journey towards a more information-driven approach.

Highlights of our expertise

Software Development – Remote Sensing – Situational Awareness – Space Surveillance
- Robust Navigation – Space Weather.

Some of our customers

Leading, high-tech companies, research institutes and or governmental bodies, including: Airbus, Thales, Serco, Telespazio, Leonardo, OHB, IBM, CGI, TNO, NLR, DLR, ASTRON, SRON, KNMI, Dutch Defence, NCIA, Bundeswehr, ESA, EUMETSAT, EUSPA .

SECTRA

Sectra Communications BV

Cybersecurity solutions and services for a new era

Sectra assists authorities and defense forces in Europe to protect society's most sensitive information, and hospitals throughout the world to enhance the efficiency of care. Thereby, Sectra's vision is to contribute to a healthier and safer society.

The company was founded in 1978 and has its head office in Linköping, Sweden.

Within the business area of Secure Communications, Sectra develops products and services that protect some of society's most sensitive information and communications. Our mission is therefore to provide security that improves the availability and efficiency of society's most critical functions. The offering includes secure voice and data communications, with solutions certified at the national level and by the EU and NATO, as well as security analysis and monitoring of critical IT systems, such as electricity and water supply. Sectra's operations are conducted from its offices in Sweden, the Netherlands, Finland and the USA.

Sectra provides the encrypted mobile phone Sectra Tiger/S 7401 and required infrastructure for NATO. In the Netherlands, Sectra has a framework agreement for secure communication systems with the Dutch Ministry of Defense and the General Government, including all ministries and other governmental organizations. The Sectra Tiger service is hosted in ABDO approved premises in the Netherlands. It includes the use and service of both the Sectra Tiger/S 7401 mobile phone, encrypted mobile or fixed telephony for use up to and including the SECRET security level, and Sectra's secure Tiger/R smartphone and Sectra Mobile VPN (secure workspace) solutions, for use up to and including the RESTRICTED security level. The solutions protect voice and data communications from eavesdropping and has been developed to provide mobility and flexibility to those individuals and organizations handling high-level classified information.

SEKO Government Services & Defence

SEKO's global organization, with over a 150 offices worldwide, supports the execution of transport and logistics procurement for the US,NL,BE,DE Government, other NATO countries and top defence contractors around the globe. As a lean, nimble and customer- centric organization , our fast decision making process, and our ability to implement customized solutions continue to redefine defence logistics and supply chain solutions. Whether it is supplying into a conflict zone in connection with military exercises and maneuvers, or providing solutions on warehousing & distribution of ITAR/EAR/FMS goods. The SEKO government services & defence team is up to the task.

Our Services

- Inland and overseas transportation service by Air , Road , Sea and Rail.
- Export compliance desk and screening.
- Country Transit licenses needed to transport ITAR/EAR goods worldwide.
- Customs services (export / import / fiscal clearing)
- Vessel and Aircraft chartering.
- Project and out-of-gauge cargo, vehicles , weapons systems and arms.
- Warehousing & distribution ITAR/EAR/FMS goods.
- Handling and transport of explosives & ammunition.
- Final mile delivery into conflict or disaster areas.

SEKO GDS, your special forces in supply chain solutions.

Serco Netherlands B.V.

Serco's purpose is to impact a better future. In Defence, our deep public service ethos means we are uniquely able to provide the best services to governments and military organisations, contributing to the security of nations.

Serco is a leading provider of Defence services with a long history of supporting Ministries of Defence (MOD) across multiple countries. From acquiring systems to operating military bases, we are a trusted partner to governments, playing a vital role in national security and keeping citizens safe.

Our Defence services span five key sectors: Air, Land, Sea, Space, and Emerging Technology. In the Air sector, we provide critical technical, airfield, and airport support services for MODs, OEMs, and civilian airport operators globally. In the Land sector, we deliver military base management, logistics support, and facilities management to defence, paramilitary, and national security customers. In the Sea sector, we support the world's navies in the design, integrated product support, autonomous systems, and maintenance of their vessels. In the Space sector, we support over 10 space and government agencies with launch preparations, space missions, Earth observation, and ground segment operations. In Emerging Technology, we make fundamental changes through digital technologies and AI, improving processes and customer experience.

Our international, cross-sector reach allows us to share best practices and continually improve our services. Serco combines engineering, project management, facilities management, people development, training, and technical capabilities to help governments build resilience, enable greater interoperability, and adapt to new threats. A major global Defence business, our customers trust Serco for agile, resilient services and innovative solutions that advance mission readiness, protecting citizens and nations in a volatile world.

SMI Plaatwerk B.V.

SMI Groep: Your Partner in Metalworking and Construction

The SMI Groep provides complete solutions in metalworking and construction for various industries, with a strong focus on defense, medical technology, and mechanical engineering. With around 300 employees and specializations in sheet metal work, machining, assembly, and construction - frame building, we deliver high-quality products and services that meet stringent quality standards.

Our certifications, including ISO 9001, ISO 3834-2, and DIN 2303 Q2 BK1, underline our commitment to quality and reliability. For the defense sector, we have extensive experience in various projects, such as:

- Building vehicle chassis and suspensions.
- Producing racks for communication equipment.
- Processing armor steel for protective applications.

With modern production facilities and a focus on precision and efficiency, our specialists work closely together to deliver customized solutions that meet the specific requirements of our clients. Whether it involves single units or series production, we always deliver as agreed.

At the SMI Groep, we combine craftsmanship with advanced technology to deliver durable and reliable products. For defense, we are the ideal partner thanks to our experience, certifications, and customer-focused approach.

Software Improvement Group (SIG)

The world becomes increasingly digital and data-driven. Organizations depend strongly on well-functioning software. But do we know for sure if these systems are built correctly? Are they secure, scalable, and performing well? Are there no hidden risks? Outages or security leaks within organizations that run on critical software could easily result in reputational damage, safety issues, and financial impact.

Why SIG is relevant to you

You would like to rely on your software, avoid issues and security risks in mission critical systems and avoid endangering the safety of your people in the field. Good software quality is essential. We can help you achieve this. Our mission at Software Improvement Group (SIG) is to get software right for a healthier digital world by combining our software assurance platform, Sigrid, with expert knowledge to dig deep into the build quality and security of software systems.

How we work at SIG

Our SIG software analysis laboratory holds a unique ISO/IEC 17025 accreditation for software quality analysis. We make this lab accessible to our clients through our Sigrid platform. Sigrid continuously measures software build quality, including security, architecture, maintainability, and productivity – and makes findings easily accessible to CIOs, architects, and developers alike. We are completely independent and we have no hidden interests regarding our clients and suppliers, which means clients can always trust the facts we observe and advise them in the best possible way.

How we help governmental organizations

We empower you to make fact-based decisions to:

- reduce risks
- improve (cyber)security
- speed up software changes
- ensure maintenance can be tendered
- help prevent outages of critical systems

In case of tenders and outsourcing contracts we help you to ensure quality in the delivered software solution. Contract terms for software quality help to avoid this common pitfall.

Solico Engineering B.V.

Solico is an engineering company specialised in design of composite constructions.

Composites or fibre reinforced plastic materials are well known for their lightweight and high strength properties. Additional advantages can be the nonmagnetic properties, electrical- and thermal insulation plus RCS and EMP. With these materials we have realized numerous successful designs:

- Submarine composite superstructure and casing panels
- ASW Frigate composite superstructure and mast
- Sonar domes for M- , LCF and ASW frigates
- Composite Mission Module for Boxer armoured vehicle
- Composite fast interceptors
- Modifications to all composite minehunter "TRIPARTITE"/"ALKMAAR" class
- Non-magnetic reels
- Oto Melara gun shielding And many more

Solico was founded in 1989 and is fully independent from any material supplier or production facility. This way, we are able to produce a detailed design combined with the optimal production method. More info at www.solico.nl

Standard Aero Netherlands B.V.

Founded in 1911, StandardAero has become one of the world aerospace industry's largest independent maintenance, repair and overhaul (MRO) providers. StandardAero offers extensive MRO services and custom solutions for business aviation, commercial aviation, government/military and industrial operators. Nearly 7.000 professional, administrative and technical employees work in more than 50 major facilities around the world, with additional strategically located regional service and support centers all across the globe.

Services include OEM authorized and approved MRO capabilities for aircraft and rotorcraft engines, auxiliary power units, components; airframe services including major alterations for both fixed-wing and rotorcraft; FAA authorized avionics capabilities; comprehensive engineering services; and custom exterior and interior design, completion, and paint. We provide these capabilities through our network of specialized facilities and mobile service teams.

StandardAero has extensive OEM-authorized and certified capabilities for engine and airframe MRO, along with substantial in-house repair capabilities. StandardAero also has comprehensive engineering and technical resources to design tailored solutions for modifications, retrofits, upgrades, and life extension programs. Our maintenance, repair, and overhaul processes incorporate the most stringent standards our customers expect. Our world-class and advanced quality systems carry these repair certifications: FAA, JAA or EASA, ISO 9001:2000, ISO9002, ISO 14001, Transport Canada AMO, and other national regulatory bodies.

In the Netherlands, StandardAero is located at the Woensdrecht Airbase, where in partnership with the Royal Netherlands Airforce (RNLAf), MRO&U on the Pratt & Whitney

F135 is performed. The F135, installed in the F35 – Lightning II, is the latest addition to the StandardAero fighter engine portfolio. This engine line is managed out of a brand new, purpose built F135 engine depot facility at the Woensdrecht Airbase. Together with the RNLAf, StandardAero is ready for the future of fighter MRO!

Starion Netherlands B.V.

RHEA Group B.V. based in the Netherlands has two offices located close to some of our clients at ESA's European Space Research and Technology Centre (ESTEC) and the Galileo Reference Centre. For nearly 30 years our staff have been working in the space, security and system engineering sectors, contributing to the development of, and providing solutions to, the most complex systems and missions. Our staff deliver the highest quality in secure design, development, testing, roll-out, training, operations and maintenance for business-critical systems. Our concurrent design and engineering experts use a powerful design methodology for the early stages of projects that involve multiple engineering and business disciplines, supported by RHEA's Concurrent Design Platform (CDP4®) software. The concurrent design and engineering approach significantly reduces both the cost and duration of feasibility studies, and minimize overall risk early in a project's lifecycle. RHEA extends on these benefits by integrating security-by-design into the Concurrent design and engineering making sure that also security and cyber security requirements are taken into account from the early design stage. We work with, and provide solutions to complex systems, such as spacecraft design, ship building and food manufacturing, as well as defence programmes. Our security products and solutions provide clients with a holistic approach to cybersecurity. We can develop complete cyber resilient programmes, protect clients against cyber-attacks, build and support security operations centres and services and deliver cyber-range capabilities for cyber-attack preparation, testing and training. We also offer effective continuity and disaster recovery planning to help organizations survive an emergency and get back to work quickly. One of the key areas of our space sector offering is providing secure and efficient satellite ground segment solutions, including increased levels of automation through our MOIS tool, cloud based and as-as-service solutions. Leading to a cheaper more agile and flexible solution that can be used in test, operations preparation and real mission operations, simplifying over all the satellite ground segment and the mission operations. RHEA Group B.V. is part of RHEA Group, an international company that employs nearly 600 staff. Our clients include: ESA, EUMETSAT, AIRBUS, OHB, GSA, EC, national space agencies, national defence ministries, Astroscale, NorthStar, etc. Our technical knowledge base combined with the practical experience of our engineers ensures we deliver the highest level of expertise for every project. Our approach is always customer centric, delivering the best solutions and services to our clients.

SurCom International B.V.

SurCom International is a provider of high-quality C4ISR surveillance and communication products and systems. We have been successfully doing this for more than 31 years with a team of skilled people, most of whom have a military background. To meet the demanding requirements of the modern warfighter, law enforcement and public safety personnel, we work closely with renowned national and international manufacturers of electronics and electro-optics.

Surveillance and Communications (C4ISR) solutions can be stand-alone products or fully integrated multi sensor systems for the land, air, or seaborne environment. To this end SurCom maintains a comprehensive portfolio of tactical and strategic radio and satellite communication products, in addition to advanced electro-optics for day and night surveillance and targeting applications.

We maintain a secure engineering and office facility in the city of Ede, with ample workspace for [vehicular] systems integration. Our modern laboratory features specialized equipment for RF, EMC and climatic testing. Training, setting to work and maintenance can be carried out in-house or on-site.

SurCom is a member of the NIDV (Association of Netherlands Industries for Defense and Security). For our US partners we are TRACE International (Transparent Agents and Contracting Entities) certified and an US State Department approved ITAR broker. We are accredited to the ISO 9001:2015 and AQAP 2110:2016 Quality Management Systems.

TBRM Manufacturing Solutions B.V.

TBRM delivers a comprehensive suite of services encompassing manufacturing assembly, testing, and series production as well as product development, engineering solutions, including systems design, mechanical engineering, mechatronics, software, and electronics. Our integrated approach combines deep technical expertise with advanced manufacturing capabilities.

TBRM Manufacturing

Assembly of mechatronics, electrical and mechanical products, modules, equipment and machines. Total responsibility of the supply chain. ISO class 5/6 cleanroom, equipment assembly area, module assembly area and ESD safe assembly area. Complete EU-based supply chain for components not manufactured in-house. Component manufacturing of machined parts in-house manufacturing of CNC-milled components, varying from single pieces to higher volumes. Mostly for industrial purposes. 10 milling machines (3-, 4-, 5- axis) highly automated with loaders and co-bots.

Component manufacturing of cables & wires in-house manufacturing of single wires, multi-wires and cable trees. Complex and small series in facilities in Geldrop, the Netherlands. Simple and mid-volume series in partner facility in Slovakia.

Prototyping manufacturing of one-offs, tools, production tools engineering products, new product introductions. On top of other in-house capabilities, also prototyping capability for sheet metal & welding manufacturing.

TBRM Engineering

Engineering of advanced engineering products based on customer requirements. Specialized in feasibility studies, analysis, contract design, co-development for OEM. Integrated Way-of-Working for customers, resulting in seamless cooperation and optimal result. Creation and maintenance of TPD. Apart from engineering also offering of service agreements (SLA) for continuous support. With flexible support offering hybrid methods: on-site, local office, off-shore.

Technolution B.V.

Technolution Prime

Technolution Prime is our brand of high assurance solutions, products, and services for securely exchanging information up to the highest governmental confidentiality levels. We are the technical market leader in the Netherlands for high assurance technology in fit-for-purpose solutions for customers in defence, safety, and security. We have the knowledge and technology to protect classified data and guarantee secure communications.

Security made simple

Our products are approved by NBV (Dutch National Bureau for Connection Security) and integrate well with existing IT infrastructures. All of our products have a strong functional focus, which allows for relatively short development cycles. Due to the use of programmable logic and FPGAs, they offer high data speeds, high hacker resistance, and enduring flexibility.

High Assurance solutions for:

- secure data communications
- domain separation

About Technolution

Since Technolution's inception, security and network security have been the core values of our company. Security should not just be considered as the lock on the door at the end of a project, but as a founding principle for every project. This way of thinking is deeply rooted in our DNA and it is interwoven into all our projects and products. Technolution has offices in the Netherlands, Sweden, and the USA.

Teijin Aramid B.V.

Materializing ambitions

Teijin Aramid is a global leader in high-performance aramid fiber, a subsidiary of the global Teijin Group. We're working to transform potential into reality, to materialize ambitions for our partners across diverse industries. Specializing in high-performance aramid fibers, our materials are used in automotive and aerospace industries, ballistic protection and more. Our products, including Twaron®, Teijinconex®, and Technora®, aren't only about high performance – they're about creating impactful, industry-specific advancements. At the heart of our operations is purpose and expertise that drive us to innovate, collaborate, and deliver reliable, recyclable aramid solutions that add lasting value.

Our vision for a sustainable future is rooted in a circular economy, balancing high product performance with carbon neutrality. By embracing renewable raw materials, energy, and innovative recycling methods, we are building a future for sustainable, high-performance aramid fiber manufacturing. Let's join forces to shape a better, more sustainable future. Together, we can turn your 'what if?' into reality

Telerex Nederland B.V.

Telerex excels at advising its clients on the right components for creating the optimal finished product. Telerex is founded in 1970, and imports and distributes electronic and electromechanical products. We simplify and optimize the supply chain with its global procurement network, planning and on-time delivery. With over 60 employees and offices in Antwerp and Breda, we offer building blocks for the Original Electronic Manufacturing (OEM) market.

MAJOR PRODUCTS / SERVICES

- Connectors & Cable Assemblies
- Thermal Management of Electronics
- EMC Shielding, RF Filtering and RF Absorbing products
- Electronics Enclosures
- Displays
- Embedded Computing
- Power Supplies & Solutions

Key Benefits

1. Engineering support, built to order & customized products and systems
2. Telerex simplifies the supply chain with its global procurement network, planning and on-time delivery.
3. We are the most preferred partner for the OEM and professional market in the Benelux for electronic and electromechanical modules.

Why Telerex

People and equipment are regularly put to the test within the armed forces. Hence, there are heavy training programs for staff and an equally heavy set of requirements and standards for the equipment they use. As a supplier of professional electronics Telerex takes many factors into account when it comes to components or equipment for the military sector.

Company Structure

Telerex is member of the Eight Lakes group, a strong independent, financially growing group with offices in Belgium, the Netherlands, France, Scandinavia, and Taiwan. With over 320 employees the Eight Lakes group generates an annual turnover of more than 170 million euros.

Tenfold Group B.V.

Een perfect fit voor uw verpakkingsvraagstukken

Tenfold Group staat voor u klaar als ambitieuze verpakkingspecialist. Gedreven door kennis, ervaring en een passie voor de meest efficiënte en effectieve oplossingen, creëren wij 'The perfect fit'. Wij helpen bedrijven en organisaties toegevoegde waarde te creëren rondom belangrijke thema's als productbescherming, duurzaamheid, retourverpakkingen, schadereducties, ergonomie, kostenbeheersing en track and trace oplossingen.

De kracht van Tenfold

Om samen een passend antwoord op de meest uitdagende verpakkingsvraagstukken te vinden, is Tenfold modulair ingericht in vijf divisies.

- Tenfold Industrial Packaging
- Tenfold Packaging Supplies
- Tenfold High Tech Packaging
- Tenfold Supply Chain Services
- Tenfold Logistic Services

Tenfold Industrial Packaging

Tenfold Industrial Packaging is gespecialiseerd in het ontwerpen en vervaardigen van verpakkingsoplossingen op maat. Wij ontwerpen verpakkingsoplossingen die perfect aansluiten op uw product, specificaties én uw processen. Zo ontwikkelen we samen de verpakking voor kostbare machines, apparaten en onderdelen, uiteenlopend in formaat en omvang.

Tenfold High Tech Packaging

Tenfold Group biedt verfijnde verpakkingsoplossingen voor high-tech industrieën, gericht op precisie, duurzaamheid en innovatie. Met diepgaande expertise in sectoren zoals energie, medische, lucht- en ruimtevaart, defensie en logistiek, levert Tenfold Group op maat gemaakte diensten die aan strenge eisen voldoen. We gebruiken milieuvriendelijke materialen en processen om de ecologische voetafdruk te minimaliseren. Onze cleanroom verpakkingsoplossingen beschermen gevoelige producten tegen contaminatie. Tenfold Group integreert industriële verpakkingen en logistieke diensten voor een efficiënte supply chain operatie, waarbij we als partner bijdragen aan het succes van onze klanten. Heeft u een verpakkingsvraagstuk? Neem dan vandaag nog contact op met Tenfold en wij praten er graag over mee.

Thales Nederland B.V.

The people we all rely on to make the world go round – they rely on Thales. In a world that is increasingly fast-moving, unpredictable and full of opportunities, they come to us with big ambitions: to make life better and to keep you safer. Combining a unique diversity of expertise, talents and cultures, our employees design and deliver extraordinary high-tech solutions. We are leading the digital transformation, focusing on artificial intelligence, big-data & data analytics, connectivity and internet of things and cybersecurity. With 80.000 talents working in 68 countries, of which 2.200 employees are based in the Netherlands, we are one of the biggest high-tech employers in the field of safety and security.

We help our customers think smarter and act faster, mastering ever-greater complexity and every decisive moment along the way, in the fields of:

- Aerospace
- Defence & Security
- Ground Transportation
- Space
- Digital Identity & Security

In the Netherlands, we are located in six locations with our office in Hengelo as our headquarter. Together with an extensive ecosystem of knowledge partners, customers and suppliers, we work on radars for naval vessels. Thales adapts to the changing market of navies all around the world. We have developed a range of sensors optimized for these activities and can supply each navy and coast guard with tailored mission management systems. In addition, we are specialized in cyber security solutions, transportation systems, communication equipment for land forces, cryogenic cooling solutions, research & development for radar tech (in collaboration with TU Delft) and research & development for serious gaming (in collaboration with the University of Twente). In 2019 Thales completed the acquisition of Gemalto to become a world leader in Digital Security. Thales Nederland's product portfolio is characterized by innovation. Thales delivers decisive technology for decisive moments.

The IP Company BV

Specialist in wireless communication and track & trace onboard of Naval ships

The IP Company is a software development company in the field of wireless communication systems (WiFi, TETRA, Private LTE), with more than 20 years of experience. The IP Company did develop a system that enables wireless situation awareness. The four Holland Class OPV's and the Karel Doorman JJS of the Royal Netherlands Navy are since 2008 equipped with the Wireless Communication & Messaging System (WCMS). This system makes everyday communication more efficient and ensures communication and messaging in critical situations.

The right information to the right people, fast and secure to a secure smartphone or tablet.

WCMS

All major ship components are equipped with a sensor that sends autonomous status information to the platform management and combat systems on board. The WCMS ensures that messages and calls are automatically routed to the correct crew member on duty using our workflow management software.

- Voice communications.
- Facilitates internal and external voice communications. Crew members can communicate in multiple (group) conversations simultaneously.
- Damage control messaging
- Notifies crew members directly during emergencies. Alerts and warnings are sent via secure smartphones to the correct crewmembers on duty.
- Location-based services.
- Locates crew members or assets, accurate to within 50 cm.

Dedication and Customization

The dedicated team at The IP Company will work along with the client to offer the best solution in every situation. Close collaboration and short lines of communication make The IP Company a great partner.

Titomic Europe B.V.

Titomic is the world's leading provider of cold spray solutions, revolutionising manufacturing across various industries, including aerospace, defence, and energy. Unlike traditional manufacturing processes, Titomic's technology utilises a unique cold spray method to create near-net-shapes directly from powder. This innovative approach significantly reduces waste and material costs, making it an efficient and sustainable option.

One of the primary benefits of Titomic's technology is its ability to manufacture stronger, lighter parts from metals such as titanium and Inconel at industry-leading speeds. Additionally, it allows the utilisation of multiple metals in a single part, leveraging the strengths of various metals simultaneously. This capability is exclusive to Titomic's cold spray technology.

In the realm of additive manufacturing, Titomic's solutions are used to create high-performance components such as ballistics shielding, propulsion systems, and pressure vessels. These components are essential in industries where durability, strength, and performance are critical.

Titomic also excels in repair and maintenance, particularly in Maintenance, Repair, and Overhaul (MRO) and BDR applications. Their technology can combine dissimilar metals, such as aluminium onto steel, offering versatile and cost-effective MRO solutions. It has proven its effectiveness within the aerospace and automotive sector, where reliability and precision are paramount.

The no-heat method of repair is a significant advantage, allowing for the maintenance of heat-sensitive substrates without damage. Furthermore, Titomic's technology enables in-situ repairs without the need for disassembly, drastically reducing downtime and improving efficiency. This makes Titomic's cold spray solutions an invaluable asset for industries requiring quick and reliable maintenance.

T-Minus Engineering B.V.

Leading the way to suborbital space.

T-Minus Engineering is a vertically integrated rocket design, manufacturing, and launch company. In the years since foundation in 2011, over 75 rockets have been launched from countries all over the world, by the team of specialists in aerospace, electronics, and manufacturing fields.

The company offers unique capabilities in the field of rocket development and production, amongst them the in-house production of solid rocket propellant and -motors using high-strength composite materials, development of rugged on-board electronics and aerodynamic/flight simulation and analysis.

The defence market is increasingly important to T-Minus due to the increased reliance on and interest in the space domain by various countries.

T-Minus is an agile, fast-moving company that can tailor vehicles and missions to the desire of the customer. Rockets provide two unique capabilities: reaching high speeds and reaching high altitudes and space. The company supplies and operates a range of rockets that reach hypersonic speeds and maximum altitudes anywhere between 1 and 250 km. It also provides the capability to innovate and produce new vehicles that are suited to the latest desires of a customer. This does not only provide quick and easy access to space, but also the ability to train and test with rockets as (radar)training targets for ballistic missile defence and ground-based air defence. Reaching a customer's target is our mission success.

TNO Defensie en Veiligheid

TNO (The Netherlands Organisation for Applied Scientific Research) plays a crucial role in the defense sector by providing innovative, applied scientific research solutions aimed at enhancing the safety and security of the Netherlands. As an independent research organization, TNO focuses on developing technologies and knowledge in areas critical to ensuring the country's defense capabilities are robust, sustainable, and adaptive to emerging threats. In the defense domain, TNO's contributions span a wide range of applications, including but not limited to:

- **Cybersecurity:** Developing advanced cybersecurity technologies and methodologies to protect critical infrastructure and information systems against cyber threats.
- **Sensor Technology:** Creating sophisticated sensor systems and surveillance technologies to improve situational awareness and threat detection capabilities.
- **Simulation and Training:** Offering advanced simulation tools and training solutions to prepare military personnel for complex missions and scenarios.
- **Material Science:** Innovating in materials science to develop lighter, stronger materials for military equipment, vehicles, and protective gear.
- **Ballistics and Explosives:** Researching ballistics, explosives, and countermeasures to enhance the safety and effectiveness of military operations.

TNO collaborates closely with the Dutch Ministry of Defence, other government agencies, the defense industry, and international partners to ensure that the Netherlands maintains a leading edge in defense technology and strategic capabilities. By focusing on research and innovation that address both current and future security challenges, TNO contributes significantly to the national and international defense community, supporting peace and security efforts globally.

Trelleborg Antivibration Solutions

Trelleborg is thought-leader and international recognized solution provider in the field of shock, vibration and noise control. With excellent technical know-how in combination with proven market knowledge and experience Trelleborg designs, develops and engineers innovative solutions for the most complex and challenging situations for leading clients worldwide for almost 100 years.

Trelleborg understands all difficulties in the area of vibration, shock and noise control entirely. We bring up the best and most cost effective solution for every challenge, regardless of its complexity. Trelleborg defines and engineers all deliverables necessary for solving your problem, ranging from standard to tailor-made solutions. Trelleborg' state-of-the-art portfolio contains all products and services to provide you with the optimal solution for relatively simple as well as the most complex challenges.

Products

- Vibration mounts
- Expansion joints
- Shock mounts

Services

- Assessment of current situation (on site)
- Analysis design including construction drawings
- Structural design and stress analysis
- Vibration measurement and analysis, if needed on site
- Solution definition based on:
 - standard products
 - customized products, or even
 - tailor-made new products, including prototyping
- Complete simulation of solution to ensure its effectiveness
- Testing including certification by independent certification authorities
- Onsite support during installation

Trelleborg understands both business and technology and brings both worlds together in satisfying customers' needs in rapidly changing environments.

TRIANGULAR GROUP ACADEMY

Triangular Group Academy B.V.

Triangular Group is a multifaceted organization committed to enhancing safety and resilience through specialized training, intelligence, and services. The company operates through several subsidiaries, each contributing to its overarching mission of contributing to a safe, secure and resilient society. Triangular Group Has been growing and has reached over 500 employees as of 2024.

Triangular Group Academy (TGA) is a premier training and knowledge institute focused on professionals in the safety and security domain. TGA provides instruction and development tailored programs for military, police and emergency services. Their trainers, whom have backgrounds in the Dutch armed forces, intelligence services, and police units, are dedicated to sharing their expertise to foster a safer society.

Triangular Group Intelligence (TGI) is a leading private investigation firm specializing in precise and reliable intelligence and security services. Our offerings include strategic and operational intelligence, market entry support, risk assessment, security advisory, litigation support, and cyber threat intelligence.

At TGI, we help clients identify and mitigate security risks through effective incident response and recovery operations. Our experts provide strategic advice and operational support, enabling informed decision-making and strengthening overall security posture.

Triangular Group Services (TGS) specializes in providing customized logistical and support services, specifically for the safety and security domain. TGS offers an extensive range of services, from additional manpower and organizing exercises to comprehensive logistics and support packages. TGS is committed to providing tailored support to meet the needs of their customers, such as the Dutch Armed Forces.

Triangular Group Leadership Centre (TGLC) focuses on developing leadership skills within organizations. By utilizing the experience from former special forces operators, the leadership courses are provided which focus on personal growth and reaching the next level in your leadership skills.

TriOpSys B.V.

About TriOpSys

TriOpSys, part of the ICT Group, is an experienced Dutch IT systems integrator with its core focus on Mission Critical systems. Since 1998, we work closely with our clients in these domains: Defence (Simulators, Command & Control), Space & Climate (Data processing), Public Safety & Security (Control Rooms, Cyber Security) and Traffic & Mobility (Air Traffic Control, Road and Maritime Traffic Management). The professionals of TriOpSys can support you at any time in your IT project and for the entire life cycle of your system. From consulting to software development to 24/7 system management: we have the expertise, skills and experience. Our projects vary from scrum/agile projects to delivering fixed-price projects. In addition, we also provide support based on time hire or as a service.

Areas of expertise

- ICT consultancy
- Software development
- IT infrastructure
- Cyber Security
- System integration, integrating your products in our clients' systems
- Requirements and Use Case analysis
- Systems Management & Maintenance
- Decision support
- Situational awareness
- Remote sensing
- Control Rooms
- Security Management and Incident Management
- Crowd management

Applications and Solutions

- Command and Control systems
- Data processing, data analysis and data fusion
- Simulators and Trainers
- Air/Road/Vessel traffic management and control systems

TRUE LEGENDS
IT PROFESSIONALS

TrueLegends B.V.

We are True Legends IT Professionals. Since 2015, we have focused on employing high quality IT Professionals where our community approach makes us unique. Our communities are focused on the areas of Software Development, Cyber Security, Business IT, Cloud & Infrastructure, and Data & AI where our goal is to be a partner at every stage of your IT career. That means we provide a flying start for new IT talents through our Traineeships and with our VIP Legends program we offer senior IT Professionals the unique opportunity to combine entrepreneurship and security. But of course we are also there for you if you want to get started as self-employed, be seconded or take the next step with the help of detavast.

So what is our unique community approach?

At True Legends, we have a clear approach: at True Legends, your development is our focus. We not only help you achieve success professionally, but also think along with your personal growth. We offer knowledge, advice and tools to contribute to your development. That is why we developed The Quest: a customized talent management program with the mission to make you better!

And part of that personal development also includes our contribution to sharing knowledge and providing a stage for Senior Professionals. That's why we organize our Legendary Meetups on a very regular basis. Specialists in their field and IT Professionals come together to share knowledge, network and discuss relevant topics within the world of IT. Of course also starting IT Professionals are welcome!

The X factor

Finally, it should also be fun. Our Professionals are not only known for their high quality knowledge, but also for their passion, positivity and energy. And that's where True Legends' Professionals and Consultants come together. We meet regularly on our joint days at Tech Square, over freshly prepared meals at the office and make sure that work also feels a bit like home...in other words, the X factor of True Legends!

TSC Technology Solutions B.V.

TSC Technology Solutions B.V. is an international renowned organization with offices in The Netherlands and the UK. TSC Technology Solutions specializes in the design, installation and servicing of Advanced Audio Visual Display solutions for a wide variety of applications including Command & Control and Simulation. TSC Technology Solutions specializes in particular in 3D Stereoscopic /Virtual Reality display solutions with over 14 years of experience for several market sectors.

Furthermore, TSC Technology Solutions offers a range of products to provide the ability for network centric warfare simulation by streaming/recording/playback capabilities of high resolution computer graphics, video and DIS/HLA signals across a standard LAN/WAN network fully synchronized.

TSC Technology Solutions has delivered various complex simulation projects for several different applications including Ship Bridge Simulation with fields of view ranging from 180-360 degrees. Other projects include an F-16 Flight Simulator, Dome Simulation and various Driving Simulators for the automotive industry.

TSS International B.V.

TSS International BV is your one stop shop for Armour Mobility. Whether your armoured or otherwise protected vehicle is in need of runflat inserts, heavy duty wheels, brake upgrades, suspension systems, self-sealing fuel tanks, vehicle intercoms or blast protection products, TSS is at your service to find the best solution to fit your requirements.

Founded in 1976, TSS International's primary goal has always been to keep vehicles moving under the harshest conditions. The cornerstone of the business has always been runflat inserts for Civilian Armoured Vehicles (CAV), but over the years the product portfolio has been expanded to offer more peace of mind to the vehicle builder and the end users. With its unique position and experience, TSS is able to offer a high quality product range where products are complementary to each other and often even synergetic by coordinating the engineering of the individual components.

Since 2023, TSS is also able to supply energy absorption products for ballistic helmets and vests, as a consequence of the close collaboration with SKYDEX Technologies, Inc. SKYDEX IsoFit Helmet Protection Systems® and Ballistic Trauma Reductio Layers (BTRL) are super lightweight, low profile and high performance additions to your personal protective equipment.

TSS is proud to partner with Hutchinson, Inc., Skydex, MOV'IT, JRZ, B&G Electronics and to supply to various (OEM) premium vehicle manufacturers who deliver VR7, VR9 and several STANAG level certified armoured vehicles. TSS is a long time member of NIDV, Fleet Forum, ESTA and registered supplier for UNGM and NAMSA.

Tuinte Holding B.V.

HIGH-TECH MANUFACTURING PARTNER As a high-tech one-stop partner, Tuinte helps OEMs and first-tier suppliers to improve their competitiveness and capacity for innovation. The better your business performs, the better we at Tuinte perform. As a high-tech manufacturing partner, we add value to your production process. With parts, modules, complete mechanical engineering or a combination of these. Innovative technology that makes you successful.

Aerospace and Defence Components, tooling and machines for the aerospace and defence industry have to meet high quality requirements. It is crucial that goods delivered are 'first time right'. You can imagine the consequences if mistakes crept into the manufacturing process. Further requirements may apply depending on the products or machines to be supplied. We meet the high demands of the aerospace and defence industry, to which we supply complex parts, tooling and machinery.

What we do in the aerospace and defence industry Tuinte has already carried out many different projects in this industry. For example, we supply enclosures for electronics, have recently developed test fixtures and supply various complex components, for example for radar equipment or fire control systems.

We can help you with:

- Engineering of machines or components
- Building machines
- Supplying complex parts, where we can use our skills, such as welding, structural and sheet metal fabrication, CNC milling and CNC turning.

As a player in the aerospace and defence industry, why choose Tuinte?

- We understand what is important in this market
- We have more than half a century of experience
- We produce the parts, tooling or machines for you ourselves
- We can meet very rigorous requirements, for example in cleanroom production, ESD safety and traceability
- Tuinte is a reliable family company, in business since 1964
- Some 100 professionals make what we say come true
- Our components, tooling and machines have the Tuinte quality we are proud of

Unica Datacenters B.V.

Unica is the largest independent provider of technical services in the Netherlands with an international focus on energy, datacenters, IT infrastructure, offices, high-rise buildings, hospitals and sustainable buildings, ICT and healthy living and working environments. Unica offers its clients all-round, technological solutions for these projects. As an all-round technical service provider, Unica offers a suitable answer to all these technical issues. We are happy to share our extensive expertise in the areas of energy, ICT, security and electrical and mechanical engineering. Together with our clients, we arrive at a high-quality, tailor-made solution that meets all requirements in the areas of comfort, safety, communications, sustainability, healthy buildings and cost savings. And with its network of companies, Unica is never far away.

Unica and NIDV

Unica already services the Ministry of Defense in various projects (including GrIT, the large ICT renewal programme). In addition, in collaboration with Thales, Unica is working on Defensie Bewakings- en Beveiligingssysteem (DBBS), which will replace more than 45 different existing systems at almost all Defense-areas of all units in the Netherlands. Unica became a participant in the NIDV in December 2021 and can reach and strengthen existing contacts in its network via new routes, as well as make new contacts and develop new markets in the Security Domain (Police, etc.). Unica is a member of the NIDV Information Provision platform, in which more than 35 companies participate. We warmly welcome Unica and rely on their input and cooperation with the other NIDV members.

Unica in figures

- € 825 million annual turnover (2023)
- Approximately 4,000 employees
- Nationwide coverage with over 25 locations throughout the Netherlands
- Network of more than 40 companies in 9 business clusters

Urban Industries B.V.

Urban industries is a subsidiary of a well-established German company, Urban Metallverarbeitung GmbH. Our core business is metal works, and we specialize in shaping armored plating, thick aluminium and other tough alloys (but we are not limited to these materials!).

We process small parts of e.g. 10cm up to large parts of 8m. Our ambition is to go to 16m if required by our customers.

We take pride in delivering products where others cannot meet requirements. With respect to our competitors, we stand out due to the quality we deliver, precision of our end products with respect to tolerances, on-product quality and on-time delivery. We do not restrict ourselves to the make industry but also take our responsibility as advisor in up- and downstream production processes. We participate in design reviews and make proposals to increase quality and cost-effectiveness for the products we make.

We currently only make semi-finished parts but we strive towards delivering complete solutions in the future. To achieve this, we are currently busy with building a new ~10.000m² factory in the South-East of the Netherlands.

The factory in The Netherlands shall be equipped with multiple small CNC milling tools, 2 large flatbed CNC milling tools (8x3m), different sizes of presses: 300T/3m, 1000T/6m & 2000T/8m, a laser capable of cutting up to 30mm thickness (8x3m) and a sandblasting facility.

In the foreseeable future we will also acquire (robot) welding facilities and create an assembly line. Coating and other finishing steps are also on our wish list but first things first.

We value mutual respect, both as people and as businesses. We believe in making companionships, not competitors. We believe in the benefit of mutual collaboration where everyone can focus on their own specialism. Only together we grow stronger.

VABO Composites

At the forefront of maritime and naval industries, VABO Composites is a leading innovator, specializing in the design and manufacturing of lightweight doors and hatches tailored exclusively for maritime and naval applications.

In the maritime and naval sector, VABO Composites stands out for its expertise in crafting custom-engineered lightweight doors and hatches. These specialized components are meticulously designed to enhance the efficiency and agility of marine vessels, ensuring optimal performance under various conditions. By utilizing advanced composite materials and cutting-edge manufacturing techniques, VABO Composites creates doors and hatches that offer superior strength and durability while significantly reducing weight.

Additionally, VABO Composites excels in developing custom constructive composite elements, providing a wide array of tailored solutions to meet the unique needs of maritime and naval projects. Our team of skilled engineers collaborates closely with clients to design and manufacture innovative composite elements that enhance the structural integrity and functionality of marine vessels.

With a focus on engineering lightweight doors and hatches, as well as offering custom constructive composite elements, VABO Composites remains at the forefront of maritime and naval innovations. Our dedication to delivering high-quality, customized solutions underscores their position as a trusted partner for maritime and naval projects, setting new benchmarks in the industry and shaping the future of marine engineering.

Van Halteren Metaal B.V. Part of Van Halteren Technologies

Van Halteren Metaal B.V. (VHM) is active in the defense market since 1969 and has extensive relations with international customers. VHM is one of the leading defense industries in the Netherlands and serves as the Dutch partner for various global defense manufacturers. VHM's 100+ motivated employees operate a modern production and assembly facility in the heart of the Netherlands. We provide our customers the beneficial of a total in-house solution, all through the development stages and up to the final production and assembly lines.

VHM's four departments operate individually or as a multi-disciplined team:

- Land Systems - manages large scale projects including turn key integration of systems. E.g. manufacturing and assembly of the PzH2000NL turrets as well as the complete turret assembly and vehicle integration of the CV9035NL armored vehicles.
- Training Systems & Technology - VHM is the world leading supplier of Howitzer Crew Trainers including simulated ammunition for training and lifetime support. It also produces other types of trainers such as driver and tank turret trainers.
- Road Wheels - develops and produces road-, idler-, sprocket wheels, track pads for military vehicles all over the world.
- Machining - VHM's machine shop is fully equipped with state of the art lathes, welding machines, etc. It is capable and qualified for welding and machining large (armored) steel structures.

VHM has a long-time outstanding reputation with its customers and is well known for its innovation, proactive approach and full commitment to its markets and business.

Van Halteren Naval Technologies BV Part of Van Halteren Technologies

Van Halteren Naval Technologies BV is specialized in the design, production, installation and service of custom built HVAC & R equipment and services such as:

- Design- , Upgrades- and Tropicalisation studies;
- Oil free magnetic bearing Chilled water units;
- Conventional chilled water units;
- Low magnetic Chilled water units;
- NBC / CBRN filter systems;
- Provision stores;
- Engine room ventilation;
- Self-contained units;

Above products and services are for surface combatants, submarines and naval auxiliary and associated systems for the Naval and merchant market, some examples:

- Midlife upgrade Walrus Class Submarines;
- New built LMV Singapore Navy;
- New Built Logistic Support Vessel, Norwegian Navy;
- Midlife upgrade Portuguese M-Frigates;
- Replacement of the Chilled water units on the Dutch and Belgium Minehunters;
- Tropicalisation HVAC upgrade NFN Frigate Norwegian Navy;
- Retrofit Chillers Bay-Class UK Navy.

Van Halteren Technologies B.V. Part of Van Halteren Technologies

Van Halteren Technologies is capable in the design, manufacturing, installation, repair, servicing and modernization of drive and control systems and equipment for naval applications.

Van Halteren Technologies is an experienced partner when it comes to different types of transfer systems. All systems are based on either replenishing ships at sea with solid goods or refueling ships with liquids.

The process of replenishment and refueling ships at sea can take place in critical situations, from being underway in rough weather conditions to experiencing freezing temperatures at the arctic seas. In order to ensure a safe and reliable exchange of solid goods and fluids in various conditions at sea, Van Halteren Technologies Replenishment systems meet the industry quality standards with respect to technology, functionality, safety, economy and class conformity. As a partner already in the engineering phase, Van Halteren Technologies is able to develop systems making use of creative innovations to exceed these industry standards plus it can save you maintenance time and costs, not to mention improving availability over the complete life cycle.

Products and solutions:

Replenishment at Sea Systems (RAS)
Helicopter Transport Systems (HTS)
Control Systems

Van Vliet Logistics B.V.

GENERAL

Van Vliet Logistics B.V. is a freight forwarding service provider, situated in the village Zevenhuizen (ZH) near the city of Rotterdam. Their main activity is arranging local and international transport of general cargo by road.

OUR SERVICES

Overview of services:

- Road Freight (general cargo, groupage/LTL/FTL)
 - Urgent / courier transport
 - Dangerous goods transport (ADR)
 - TAPA transport
 - Special and heavy transport
 - Temperature controlled transport
 - AOG transport
 - OOG Cargo
 - White Glove Solutions
 - Industrial assemblies and relocations
- Other services
 - Production of wooden cases, crates and skids
 - Seaworthy packing
 - Container stowing and flatrack lashing
 - Cross docking
 - Project logistics services in bonded warehouse with crane capacity up to 80 ton and quayside for barging

REASONS FOR CHOOSING VAN VLIET LOGISTICS BV

- Substantial network with reliable carriers / business partners per country
- For all countries only 1 'point of contact'
- Using "Van Vliet Logistics' – control-tower-mechanism"® leads to cost reduction
- High level of knowledge in the logistics area
- Timely communication regarding your shipment
- Personal attention

Variass Electronics B.V.

Customers classify Variass as a reliable electronic production and development partner in all aspects with a high operational performance. With our 150 skilled employees we work in a high tech equipped environment with strong focus on quality and reliability. Variass Defence & Security Systems B.V. is the business unit which is responsible for the co-ordination of all Defence related projects within Variass Group B.V. (founded in 1992 and turnover 60M€). Variass is Part of the Metis Group with a total turnover of 150 million Euros.

Customer benefits:

Customers find Variass a reliable partner in all aspects. Variass is a support and innovation partner for his customers on for e.g. technical, reliability and logistical issues. With extensive data driven and simulations we detect issues and risks before the production has started. To maintain our support to the customers, Variass continuously invests in people, machinery, buildings, hard- & software and (cyber) security.

Core business:

Variass is a supplier of industrial electronic products and systems. Variass offers a total package of services from development, engineering to complete logistics. From prototyping to serial production and scale up. Our quality, logistic reliability and flexibility are beyond any discussion.

Capabilities

- Development, engineering, prototyping and serial (re-)production in electronics.
- Box building and system assembly.
- Supply chain including end of life management and other risks.
- Cable assembly.
- State of art SMT-lines with SPI and 3D AOI in line with X-ray and CT-inspection.
- Assembly of complex flex and flex-rigid PCB's.
- Conformal coating.
- The widest logistic service thinkable: from idea to world-wide deliveries

VDL Defence Technologies

VDL Defence Technologies; Your Technology Partner

VDL Defence Technologies combines the capacities and capabilities of the companies within VDL Groep for the defence and safety industry, giving you a central point of contact.

VDL Defence Technologies is specialized in the development, engineering and production of mechanical and mechatronic solutions including complete products and system integration for, among others, military and special purpose vehicles and performing subcontracting technologies for industrial suppliers.

Life cycle management is one of the focal points within VDL Defence Technologies regarding maintenance, upgrade, conversions and modifications of modules, complete systems and vehicles.

Development and engineering are a strong competence of VDL Defence Technologies. Our team has the required knowledge and capabilities for the defence and safety market, including the ABDO 2006 security clearance. Apart from the regular ISO certifications like 9001 and 14001 we are certified according AS9100, specifically for the aerospace industry. In addition to this our TL certifications and extensive knowledge regarding the processing of armoured steel. The combination of engineering and manufacturing, our own worldwide network makes us both unique and a reliable sub-contractor in the Netherlands and abroad. Therefore VDL Defence Technologies is your technology partner for a safe and secure society.

Certifications

Verebus Engineering BV

Verebus is a technical service provider with knowledge and experience in the field of asset management and documentation services. For owners of complex assets, or suppliers thereof, we can shape the entire maintenance and operating philosophy and provide documentation and instruction. We make maintenance and operation efficient in terms of functionality and costs, easy by clear instructions and safe by correct and understandable information.

Our current service can be summarized in four bullets:

- Integrated Logistics Support (ILS): ILS optimises the use of a complex system throughout its lifecycle in terms of availability, efficiency (costs) and safety.
- Technical Documentation: Verebus has expertise in correctly and clearly describing complex assets or systems and in implementing software solutions for the documentation.
- Reliability Centered Maintenance (RCM): RCM is a method to make dynamic maintenance plans that lead to less downtime, lower costs and a better insight into risks.
- Training: Under the name "Verebus Academy" we provide training for all aspects related to the above expertise.

Verebus is one of the few external experts of the Royal Netherlands Army to provide ILS support. We could offer bridgehead support for (foreign) OEM's.

Verenfabriek De Spiraal B.V.

De Spiraal develops and produces technical springs, leaf springs and industrial wire products. With more than 70 years of experience and the present craftsmanship, we gladly think along with our principals from the initial stage. We already take advantage of our technical knowledge when drafts are being made. We are therefore able to supply products to our customers, which meet their specific demands.

We invest in our customers and colleagues. Our products are of high quality since we ensure people to be the central aspect. Besides, we are always searching for the newest production techniques and methods. We direct our processes as efficient and flexible as possible. We are therefore able to minimize delivery times and to handle urgent orders.

We are versatile and can almost always meet the demands of our customers. With our modern, extensive and advanced machinery we have the right equipment for almost any order.

ViNotion B.V.

ViNotion B.V. was founded in 2007 as a spin-off from the 'Video Coding and Architectures' group, part of the Eindhoven University of Technology (TU/e). The company, headquartered in Eindhoven with 19 employees, has over 15 years of experience as a fully independent entity in the field of intelligent observations. ViNotion plays an expert role in the field of intelligent observation systems based on image recognition through machine and deep learning, and embedded software for real-time processing in or near the camera. Camera systems include road-side cameras, vehicle mounted systems and drone surveillance.

ViNotion develops and offers systems for video surveillance and analysis of human and traffic flows, with a focus on safety. In addition, ViNotion offered custom development of computer vision technology for system manufacturers (OEM). Their ViSense® platform, with a large set of standard components, allows fast development of smart real-time camera systems allowing OEMs to rapidly introduce new AI-based vision functions onto the market.

Since 2010, ViNotion is developing a change detection for counter IED. In the National Technology Project Change Detection 2.0, ViNotion has demonstrated the principle of stereo cameras in combination with a set of multi-spectral camera sensors. In the EDA C-IED project VMEWI3, this principle has been integrated into an Multi-Camera Head for application on an unmanned vehicle.

For OEM partners, ViNotion is also developing surround view systems for armoured or unmanned vehicles to create situational awareness and visual interpretation. With support of the Dutch ministry of Defence, they started a National Technology Project BIRDS to study the user perception of a surround view system using a multi-camera setup on armoured vehicles.

ViNotion participated in several EU funded projects including Horizon Europe and EDA. The collaboration with the consortium partners will leverage the expertise by combining the knowledge in low-power embedded real-time video processing with defence operations.

VIRO B.V.

About VIRO

VIRO is an open and progressive engineering firm: we help our clients to successfully combine technology, ambition, innovation, and performance. We specialise in product engineering, mechanical engineering and industrial projects. Our focus in these areas is on engineering and project management. Using a powerful combination of expertise and experience, we help our clients to push back boundaries and improve performance.

Worldwide

Our offices in the Netherlands, Belgium and Germany employ 900 people working on projects worldwide for clients in aerospace, attraction building, automotive, defence, energy, food, industrial & utility building sectors, the maritime sector as well as in mechanical engineering, the process industry, and the semiconductor industry.

Our added value

VIRO specialises in developing and optimising parts, assemblies, systems, and partial systems for the Army, Navy, and Airforce. This includes tooling and testing equipment, whether basic or technologically advanced. In addition to mechanical engineering, we offer Defence our expertise in Engineering Analysis (including using the finite element method [FEM] of analysis), Software & Control, electrical engineering (including cable routing), and testing & simulation. VIRO has been certified for NEN-EN-ISO 27001. Our multidisciplinary expertise and experience working with the standards and protocols provided by the Ministry of Defence ensures that we are a strong and stable partner to our clients in this market.

voestalpine Automotive Components Bunschoten B.V.

voestalpine Automotive Components Bunschoten is an innovative technical company with over 75 years of production experience. As part of voestalpine A.G. in Linz Austria we can rely on the joined expertise of over 50.000 people in 50 countries on 5 continents.

In its business segments, voestalpine is a globally leading steel and technology group with a unique combination of materials and processing expertise. With its top-quality products and system solutions, it is a leading partner in multiple challenging industries. voestalpine is also the world market leader in railway systems, tool steel and special sections.

voestalpine is fully committed to the global climate goals and is working intensively to develop technologies which will allow it to decarbonize and reduce its CO₂ emissions over the long term.

In Bunschoten we produce steel and aluminum products, using cutting edge technologies in our 165.000m² production facility. We have a broad universal machine park with over 100 individual production cells, able to produce build-to-print parts with limited part investment and upkeep cost. This high level of flexibility allows us to easily follow the demands changes in today's dynamic situation.

Due to our Automotive background we have a sound understanding of market requirements in both quality, process stability and project management.

With in-house engineering, project management, sales, purchasing and logistics we can provide a one-stop-shop solution for all your technical requests.

Please feel free to contact us and discuss your request in pressing, assembly, coating and packaging requirements.

Vonk B.V.

Vonk B.V. is a stock-keeping import-distribution wholesaler with additional customization options in the field of plastic and aluminum packaging such as injection-, roto molded and deep draw cases, containers, 19" racks and IBC transport containers, explosion-proof chemically resistant mobile light sources for use on and around people and temperature-controlled refrigerated transport boxes without an energy source. We think along with our customers to provide their wishes with custom additions, which are also devised together with the users and are suitable for long-term, sustainable, reliable and environmentally friendly use.

Activities

- Advice, development, prototyping (including testing) of lightweight plastic transport crates and supervision of the delivery process.
- Advising on mobile light units, flashlights, headlamps, helmets and hand lamps. Explosion-proof, rechargeable, IR, UV and energy efficient.
- Advising in logistics chains, where quality and design are important to make boxes part of a larger logistics whole.
- Advising on refrigeration, temperature-regulated transport packaging.
- Advising on IBC ADR transport packaging for dry materials.
- Advising in 19" rack transport packaging.

Markets Vonk B.V. works with other suppliers with its technically high-quality and innovative products within industry, offshore, defense, police, fire brigade, ambulance and other safety services from the perspective that our commitment is to serve the safety of all professional users in the field.

Mission With our commitment to Peace and Security, we think mission-oriented 'out of the box'!

VOVU Machining

VOVU Machining is a supplier and partner to the world's leading companies in the segments:

- Defense
- Automotive
- Aerospace
- Hightech

We serve these markets together with our 60 employees from Uden. Our core activities are automated precision machining (turning & milling), assembly and Grade 4 cleaning. Materials range from aluminium, stainless steel to high-end materials & plastics.

OUR PROCESS

Preparation

Our NPI team carefully prepares the production of your precision parts; no matter how complex or critical your final product is. Even fixtures and clamps for your part are in-house developed and produced so we can optimize and control the entire process.

Programming

After careful preparation, our machines and systems are programmed, using the most modern software. After some functional tests, an initial production follows and after the FAI process, your product is ready for "repeat-exactly" production.

Producing

After preparation and production, we are able to produce your product in both high and low volumes without human intervention. That means easy scaling up and constant responsiveness to your needs. Our portfolio ranges from the production of individual parts to complex, "turnkey" (sub)assemblies. Our customer base includes top-tier OEM's.

Capabilities

- High quality and automated operations
- Assembly
- Repeat-exactly' production
- Grade 4 cleaning and packaging

V.S.E. Vehicle Systems Engineering B.V.

VSE: Specialist in military vehicle performance

In military operations, reliability is everything. Vehicles must navigate challenging terrains and perform flawlessly under extreme conditions. Poor steering or suspension systems can jeopardise missions, compromise safety, and cause delays—risks no military organisation can afford. With decades of experience, VSE develops advanced rear axle steering and hydraulic suspension systems tailored to military needs. Our steering solutions, with over 110,000 systems delivered, enable vehicles to reach even the most remote locations. Our suspension systems, trusted in over 10,000 applications, improve comfort, stability, and traction, both on-road and off-road.

Why choose VSE?

We are your trusted partner for fully integrated solutions, combining mechanical, hydraulic, electronic and software expertise. From design to deployment, our approach ensures vehicle optimisation.

We design and manufacture the RAMS critical components (hydraulic cylinders, electronic controls, manifolds and sensors) in-house to ensure the highest quality and reliability at every stage. No two jobs are the same, and neither are our solutions. Whether you're equipping a single prototype or scaling up for fleet operations, our custom systems are designed to meet your unique needs, ensuring operational excellence and efficiency.

Your mission, our commitment

We understand the stakes of your job—the need for flawless performance under pressure, the comfort of reliable equipment, and the consequences of compromised safety. We are committed to helping you succeed. With our systems, your vehicles will not only overcome the challenges of today, but stand ready for the missions of tomorrow.

WE-Metal B.V.

WE-Metal: Expert in welding of special materials

WE-Metal B.V. is a leading Dutch supplier of high-quality sheet metal solutions, based in the Netherlands and operating as a reliable partner for OEMs and system suppliers in a variety of sectors, including the defense, crane and concrete industries.

Core competencies

WE-Metal delivers high quality parts and assemblies through:

- Advanced laser cutting and edging/setting of metal sheet, with high accuracy and reproducibility of mainly high strength steel.
- Professional welding (Laser, MIG/MAG) of composite structures.
- Assembly of modules and semi-finished products into turnkey products.

Specialist in laser welding

WE-Metal is specialized in welding special steel grades. Through robotic laser welding with high power, very reliable welded joints can be realized.

Engineering & Co-creation

WE-Metal supports clients as a partner already in the design phase with:

- Co-engineering and manufacturability advice.
- Prototyping and rapid iterations in development processes.
- Solutions scalable to serial production.

Reliable Partner for the Defense and Security Chain

WE-Metal delivers on the basis of:

- Quality assurance and traceability throughout the chain.
- Confidential handling of customer data and products.
- Proven experience as a supplier in demanding industries (such as mechanical engineering and mechatronics).

WhisperPower B.V.

WhisperPower is a Dutch company, known for its innovative power solutions, specializing in advanced generator systems and hybrid power technology. The core business revolves around the design, development, and production of high-performance, fuel-efficient generators. These generators are commonly used in both civilian and military applications, offering reliable, sustainable, and cost-effective energy solutions in remote or off-grid environments. Wherever you need energy, 120/ 230 or 400 V single or 3 phase, 50 or 60 Hz, or 12, 24 or 48V DC, WhisperPower has the total solution in house. One of WhisperPower key differentiators is its expertise in hybrid systems. Hybrid power solutions combine traditional generators with energy storage systems like lithium-ion batteries, fast battery chargers and powerful inverters. In the Hybrid power system, the diesel generator will work only when necessary to recharge the battery. This synergy allows WhisperPower systems to reduce fuel consumption and emissions, while providing continuous, stable power in challenging conditions. The company technology is particularly relevant to markets where efficiency, reliability, and sustainability are paramount. In defense and military sectors, for example, WhisperPower hybrid generators are used in a range of applications, from providing power to field operations to supporting critical infrastructure in remote locations. The hybrid approach is well-suited to military needs, as it reduces logistical burdens, extends operational endurance, and helps minimize the carbon footprint of military operations. WhisperPower generators are also used in marine applications, commercial industries, and off-grid living, where off-the-shelf solutions may not suffice. The products are designed to handle complex power requirements while maintaining durability, ease of use, and minimal environmental impact. By integrating renewable energy solutions with traditional power generation, WhisperPower ensures that their products can adapt to a wide range of user needs, whether in challenging environments or in routine commercial use. The company has carved out a niche by combining cutting-edge hybrid technology with practical power solutions, positioning itself as a global leader in the evolving energy market. As industries look for ways to reduce their environmental footprint while maintaining reliable energy access, WhisperPower offerings are well-placed to meet growing demand in diverse sectors like defense, marine, and off-grid power solutions.

Zeusch Aviation BV

Zeusch Aviation is a Dutch aviation company based at Lelystad Airport (EHLE). With its fleet Zeusch Aviation provides numerous Special Operations like Aerial Surveillance, Survey & Mapping and Broadcast RF-Relay services.

Fleet

The Zeusch Aviation current fleet consists of five Beechcraft King Air 200 and two King Air C90A aircraft. These aircraft are all multi-purpose aircraft which can easily be tuned to the specific operation requirements. From ISR/Surveillance, Aerial Survey, Mapping and Medical flights to RF communication for governmental missions. These aircraft are the Swiss-army knives of the air providing a platform to see things from a higher perspective.

We provide

- **ISR/Surveillance Flights:** In support of a variety of authorized missions of organizations like the Governmental, Law enforcement and other observers of activities over the land and water.
- **Aerial Survey & Mapping:** For maintaining, and publishing the geospatial baseline of an area's topography, natural landscape, built environment. The missionized aircraft are the dedicated platforms for accurate data collection for detailed map creation, twin cities, bathymetry etc.
- **RF-Relay Service:** Cameras are taking the imagery of live events. The data is RF-Relayed to the aircraft which on its turn relays it to the receiving (broadcasting) station. This results in a live stream of the event which can be used as entertainment but can also be used for governmental missions.
- **Medevac & Transplant Flights:** For Medevac the aircraft are equipped with the LifePort PLUS system complete with a stretcher, monitor connections and two (2) seats for medical staff. For transport of organs the aircraft is the ideal tool as next to the time-gain compared to any other type of transport, it also has the capability of reaching remote areas (short & soft runways).
- **Hangar service:** With 5600m² hangar space we can provide short- and longterm parking to both Aircraft and Helicopters.

ZF Services Nederland B.V.

ZF is a global technology company and supplies systems for passenger cars, commercial vehicles & vessels and industrial technology, enabling the next generation of mobility.

With its comprehensive technology portfolio, the company offers integrated solutions for established vehicle & vessel manufacturers, mobility providers and start-up companies in the fields of transportation and mobility. ZF continually enhances its systems in the areas of digital connectivity and automation in order to allow vehicles & vessels to see, think and act.

The company has a global workforce of 153,500 with 271 locations in 42 countries. Founded in 1915, ZF has evolved from a supplier specializing in gearwheels for aviation technology to a global mobility technology company. With its innovative portfolio, ZF is focusing on the "Next Generation Mobility".

As a division of the ZF Group, ZF Aftermarket, of which ZF Services in the Netherlands and Belgium are a part, ensures that ZF's world-leading OE expertise, knowledge and innovation is consistently carried forward into the aftermarket. Our customers' satisfaction is our highest priority; we offer support in an ever- changing environment, creating sustainability for their businesses today and in the future. With tailored solutions, excellent quality parts and first-class services, we serve both the automotive and non-automotive markets in industries as diverse as automotive, defense, marine, agriculture etc.. ZF Services Benelux, operating from our offices located in Delfgauw and Brussels, is the ZF Aftermarket organization for the Dutch and Belgium market. We support with professional advice on all questions relating to marine driveline technology and defense automotive products. Our service includes diagnosis, spare parts, maintenance concepts, repairs and overhauls.

We are ready to help you move forward with your vessels and vehicles with our Next Generation Service. Hope to meet each other soon!

SUBJECT: Severe Weather Conditions Today at 10:00

TO: Airport Control Center <controlcenter@airport.com>

Hi Control Center

I am writing to inform you about the current weather conditions in and around the airport. We are currently experiencing heavy storms, with heavy rainfall and lightning in the area.

Due to these severe weather conditions, there may be disruptions to flight schedules and potential delays or cancellations. We strongly recommend that passengers check the status of their flight with their respective airlines before traveling to the airport.

Thank you for your cooperation.

Best regards,

Henrik Jansen
